Introduction

1.1 Overview

Figure 1-1: DRPC-242-ADL-P Series

The DRPC-242-ADL-P Series is an embedded system with Intel® Alder Lake P processor and two DDR4 SO-DIMM memory (8GB pre-installed). It is designed for harsh environment applications, and supports DIN rail mounting method.

The DRPC-242-ADL-P Series accepts a wide range of DC power input (12V ~ 28V), allowing it to be powered anywhere. It is equipped with two USB 3.2 Gen2 (10Gb/s), four USB 2.0, three 2.5GbE, two isolation RS-232 ports, two isolation RS-422/485 ports, one HDMI and one DisplayPort++ to provide rich I/O options for various applications. Two RS-232 and two USB 2.0 are reserved inside for expansion.

Furthermore, the DRPC-242-ADL-P also has a PCIe x4 slot that can support half-size expansion cards.

1.2 Features

The DRPC-242-ADL-P Series features are listed below:

DRPC-242-ADL-P

- Intel® Alder Lake P processor
- 2 x DDR4 SO-DIMM memory slot (8GB pre-installed)
- 1 x 2.5" SATA 6Gb/s HDD/SSD bay
- 2 x USB 3.2 Gen2 (10Gb/s) port
- 4 x USB 2.0 port
- 3 x 2.5GbE LAN
- 2 x isolation RS232 & 2 x isolation RS422/485
- Support M.2 M Key, M.2 A key and M.2 B key expansions
- Wide range DC power input (12V~28V)
- Cold forging heat dissipation
- PCIe x4 slot expansion (optional)
- DIN rail mounting support
- RoHS compliant

1.3 Model Variations

Model No.	CPU
DRPC-242-ADL-P-CCS	Intel® Celeron® 7305 (5-core, 15W TDP)
DRPC-242-ADL-P-i3CS	Intel® Core™ i3-1220P (up to 4.4GHz, 10-core, 28W TDP)

Unpacking

2.1 Anti-static Precautions

WARNING:

Failure to take ESD precautions during installation may result in permanent damage to the DRPC-242-ADL-P Series and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the DRPC-242-ADL-P Series. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the DRPC-242-ADL-P Series or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- **Wear an anti-static wristband:** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- **Self-grounding:** Before handling the board touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- **Use an anti-static pad:** When configuring the DRPC-242-ADL-P Series, place it on an anti-static pad. This reduces the possibility of ESD damaging the DRPC-242-ADL-P Series.

2.2 Unpacking Precautions

When the DRPC-242-ADL-P Series is unpacked, please do the following:

- Follow the anti-static precautions outlined in **Section 2.1**.
- Make sure the packing box is facing upwards that the DRPC-242-ADL-P Series does not fall out of the box.
- Make sure all the components shown in **Section 2.2** are present.

DRPC-242-ADL-P

2.3 Unpacking Checklist

 **NOTE:**

If some of the components listed in the checklist below are missing, please do not proceed with the installation. Contact the IEI reseller or vendor you purchased the DRPC-242-ADL-P Series from or contact an IEI sales representative directly. To contact an IEI sales representative, please send an email to sales@ieiworld.com.

The DRPC-242-ADL-P Series is shipped with the following components:

Standard		
Quantity	Item and Part Number	Image
1	DRPC-242-ADL-P Series	
2	DIN-Rail mounting kit	
1	Chassis screws	

The following table lists the optional items that can be purchased separately.

Optional	
Wi-Fi module (P/N: EMB-WIFI-KIT02I3-R10)	
DIO cable (P/N: 32031-000600-100-RS)	
European Power Cord (P/N: 32702-000200-100-RS)	
Serial cable (P/N: 32205-005401-100-RS)	
Power adapter (120W) (P/N: 63040-010120-300-RS)	
Power adapter (180W) (P/N: 63040-010180-200-RS)	

DRPC-242-ADL-P

Optional	
Power cord (P/N: 32702-000200-100-RS)	
Wall mount brackets (P/N: 41020-0578C2-00-HF*2)	
1-slot expansion chassis with riser card (P/N: TXC-DRPC-240-1S-R10)	
External fan module (P/N: SF-DRPC-240-R10)	

* Each Wi-Fi module needs two antennas and two RF cables to fully support Wi-Fi function.

Installation

3.1 Installation Precautions

**CAUTION:**

The DRPC-242-ADL-P Series has more than one power supply connection point.

To reduce the risk of electric shock, disconnect all power sources before installing or servicing the DRPC-242-ADL-P Series.

During installation, be aware of the precautions below:

- **Read the user manual:** The user manual provides a complete description of the DRPC-242-ADL-P Series, installation instructions and configuration options.
- **DANGER! Disconnect Power:** Power to the DRPC-242-ADL-P Series must be disconnected during the installation process, or before any attempt is made to access the rear panel. Electric shock and personal injury might occur if the rear panel of the DRPC-242-ADL-P Series is opened while the power cord is still connected to an electrical outlet.
- **Qualified Personnel:** The DRPC-242-ADL-P Series must be installed and operated only by trained and qualified personnel. Maintenance, upgrades, or repairs may only be carried out by qualified personnel who are familiar with the associated dangers.
- **Air Circulation:** Make sure there is sufficient air circulation when installing the DRPC-242-ADL-P Series. The DRPC-242-ADL-P Series' cooling vents must not be obstructed by any objects. Blocking the vents can cause overheating of the DRPC-242-ADL-P Series. Leave at least 5 cm of clearance around the DRPC-242-ADL-P Series to prevent overheating.
- **Grounding:** The DRPC-242-ADL-P Series should be properly grounded. The voltage feeds must not be overloaded. Adjust the cabling and provide external overcharge protection per the electrical values indicated on the label attached to the back of the DRPC-242-ADL-P Series.

3.2 Back Cover Removal

Before installing or maintaining the internal components, the cover must be removed from the DRPC-242-ADL-P Series. Follow the steps below to complete the task.

Step 1: Loosen the 5 screws on the top cover.

Step 2: Take off the back cover (Figure 3-1).

Figure 3-1: Remove the Cover

3.3 HDD Disk Bracket Removal

The HDD bracket must be removed first before installing a hard disk or M.2 modules.

Step 1: Remove the 3 screws on the side panels.

Step 2: Remove the HDD bracket as indicated by the arrows in Figure 3-2.

DRPC-242-ADL-P

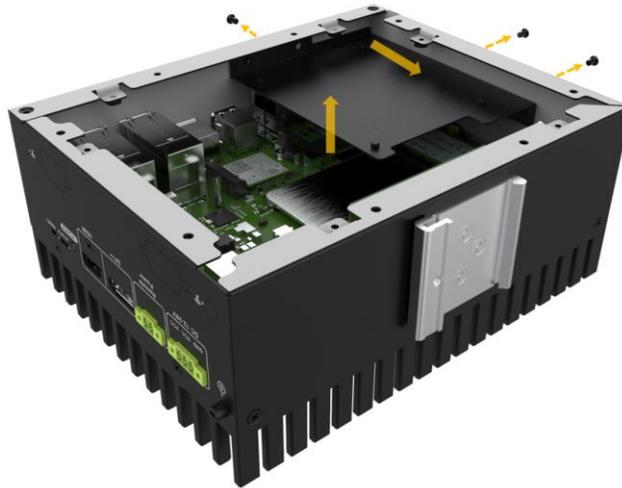

Figure 3-2: Removing the HDD Bracket

3.4 Memory Installation

The DRPC-242-ADL-P Series is pre-installed with an 8GB memory module. Users can add or replace memory with different capacity by themselves, the installation procedures are described below.

- Step 1:** Open the two handles of the memory slot.
- Step 2:** Remove the old memory module and insert a new memory module. Carefully align the memory module so the notch on the memory lines up with the notch on the memory socket.
- Step 3:** Once aligned, press down until the memory module is properly seated and the two handles fully clip into place (Figure 3-3).

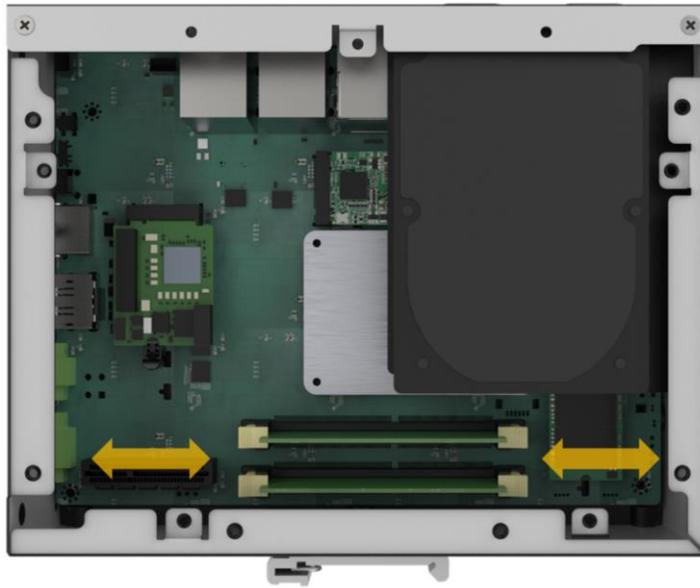

Figure 3-3: Memory Installation

3.5 Storage Installation

The DRPC-242-ADL-P Series supports two types of storage, one M.2 M Key & one 2.5" SSD. Before installing a M.2 SSD or 2.5" SSD/HDD, please follow the steps described in **Section 3.3** to remove the HDD bracket.

3.5.1 2.5-inch SSD Installation

- Step 1:** Place the HDD bracket onto the rear of the 2.5-inch hard disk. Fasten 4 screws to secure it.
- Step 2:** Plug in the hard drive cable, and install the HDD bracket back into the DRPC-242-ADL-P Series (pay attention to the positioning stud) using 3 screws (Figure 3-4).

DRPC-242-ADL-P

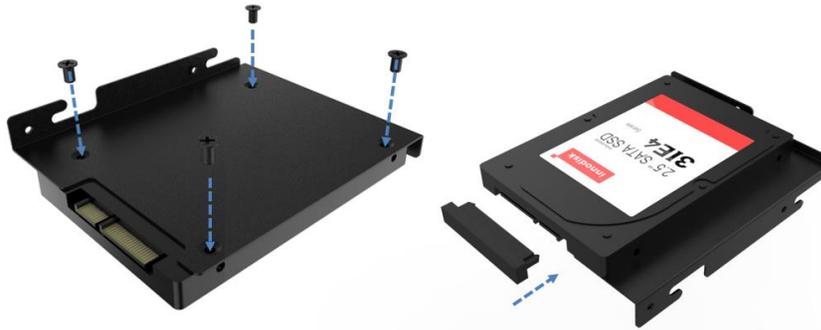

Figure 3-4: HDD Installation

3.5.2 M.2 SSD Installation

To install an M.2 B Key NVME, please follow the steps below.

Step 1: Locate the M.2 module slot. See [section 4.2.6](#)

Step 2: Remove the retention screw secured on the motherboard.

Step 3: Line up the notch on the module with the notch on the slot. Slide the M.2 module into the socket at an angle of about 20° (**Figure 3-5**).

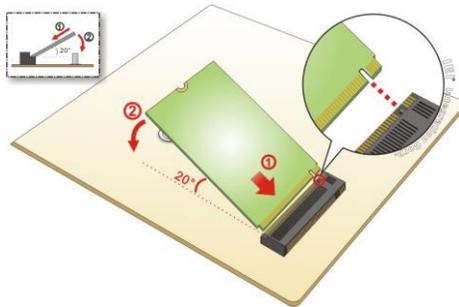

Figure 3-5: Inserting the M.2 Module into the Slot at an Angle

Step 4: Secure the M.2 module with the previously removed retention screw (**Figure 3-6**).

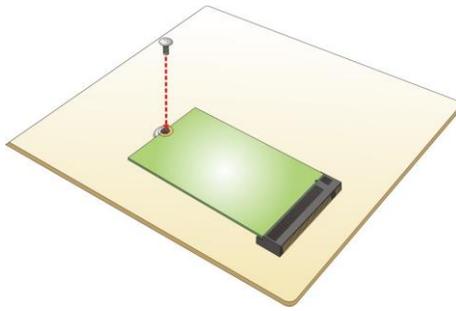

Figure 3-6: Securing the M.2 Module

3.6 Wi-Fi Module Installation (Optional)

The Wi-Fi module is an optional accessory. You can purchase it from IEI or other providers. Note that you have to purchase Wi-Fi module, internal antenna and external antenna. It is suggested to purchase an internal antenna longer than 200mm.

To install the Wi-Fi module, follow the steps below.

- Step 1:** Locate the M.2 A Key module slot. See **section 4.2.8**
- Step 2:** Remove the retention screw secured on the motherboard.
- Step 3:** Line up the notch on the WLAN module with the notch on the slot. Slide the WLAN module into the slot at an angle of about 20° (**Figure 3-7**).

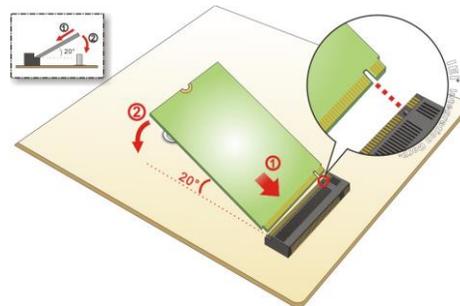

Figure 3-7: Inserting the WLAN Module

- Step 4:** Secure the WLAN module with the retention screw previously removed (**Figure 3-8**).

DRPC-242-ADL-P

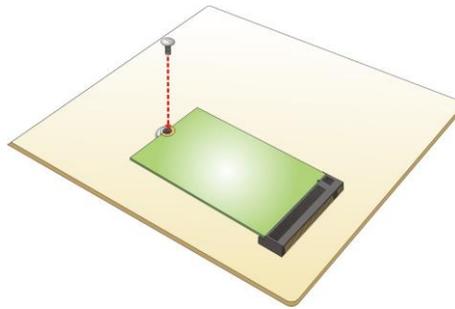

Figure 3-8: Securing the WLAN Module

Step 5: Connect the two RF cables to the antenna connectors on the WLAN module (Figure 3-9).

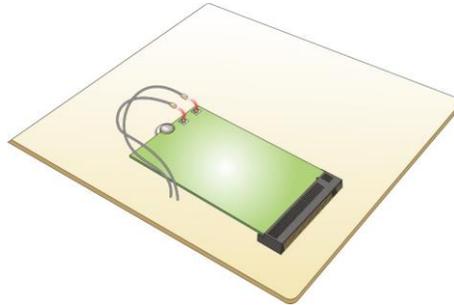

Figure 3-9: Connecting RF Cables

Step 6: Remove the nut and washer from the SMA connector at the other end of the RF cable.

Step 7: Knock out the reserved antenna holes on the chassis. Insert the SMA connector to the antenna connector holes on the rear panel.

Step 8: Secure the SMA connector by inserting the washer and tightening it with nut.

Step 9: Install the external antenna (Figure 3-10).

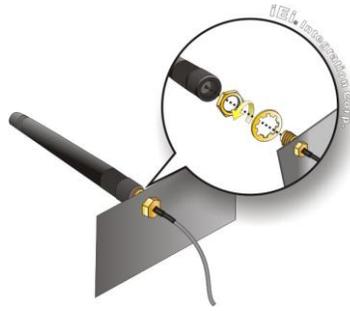

Figure 3-10: Securing SMA Connector and External Antenna Installation

3.7 IO extension Installation (Optional)

DRPC-242-ADL-P series products has reserved GPIO port, serial port, iDPM slot for function expansions. Optional cable or module are ready for purchase. To install these expansion components, follow the steps below.

3.7.1 Serial Port Installation

Step 1: Locate the Serial port connector. See Section

Step 2: Connect the serial cable to the serial connector on the mainboard. **(Figure 3-11)**

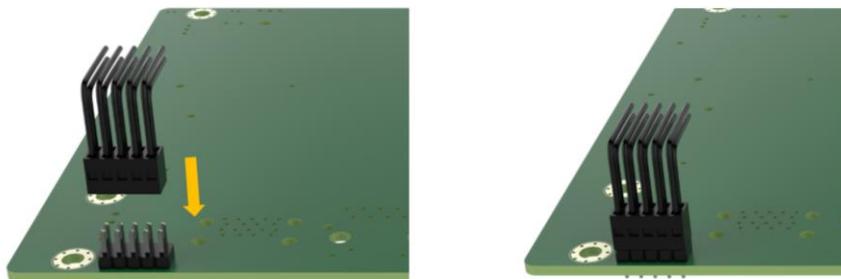

Figure 3-11: RS-232 Cable Installation

Step 3: Knock out the reserved holes on the chassis and Secure the DB9 end of the serial cable to the panel. **(Figure 3-12)**

3.8 Expansion Chassis Installation (Optional)

The **DRPC-242-ADL-P** provides an option for adding PCIe x4 function, which is achieved by installing the expansion chassis (P/N: TXC-DRPC-240-1S-R10). The installation steps are described below.

- Step 1:** Before installing the expansion chassis, ensure the fan wire inside the system will not be pressed or damaged (adjust the wiring if necessary). Align the riser card on the expansion chassis with the PCIe x4 slot inside the DRPC-242.
- Step 2:** Once aligned, insert the riser card into the PCIe slot. Secure the expansion chassis with 8 screws.
- Step 3:** To install an expansion card, open the cover on the top cover of the expansion chassis by removing 6 screws. Remove the blank bracket and install the PCIe card. Reinstall the bracket screw and the top cover after installing the card (Figure 3-15).

DRPC-242-ADL-P

3.9 Back Cover Installation

Install the back cover, and fasten the 5 screws on the side.

Figure 3-16: Back Cover Installation

3.10 System Fan Installation (Optional)

When encountering high performance and high heat, additional cooling was needed. The optional external fan can help the DRPC-242-ADL-P Series solve the thermal problem.

To install the optional external fan, follow the steps below.

- Step 1:** Remove the 4 screws (2 on the front panel, 2 on the rear panel) on the DRPC-242-ADL-P Series as shown in the figure below.
- Step 2:** Install the expansion fan module (SF-DRPC-W-R10) to the DRPC-242-ADL-P Series, and secure it using the 4 screws removed previously.
- Step 3:** Connect the fan cable to the fan connector on the side panel.

DRPC-242-ADL-P

3.11 Mounting Brackets Installation

DRPC-242-ADL-P Series comes with standard rail mounting bracket and supports optional wall mounting bracket. Follow these steps to install

3.11.1 DIN-Rail Installation

Step 1: Turn the embedded system over.

Step 2: Align the retention screw holes in each bracket with the corresponding retention screw holes on the rear surface.

Figure 3-18: Align the retention screw holes

Step 3: Secure the brackets to the system by inserting retention screws (**Figure 3-19**)

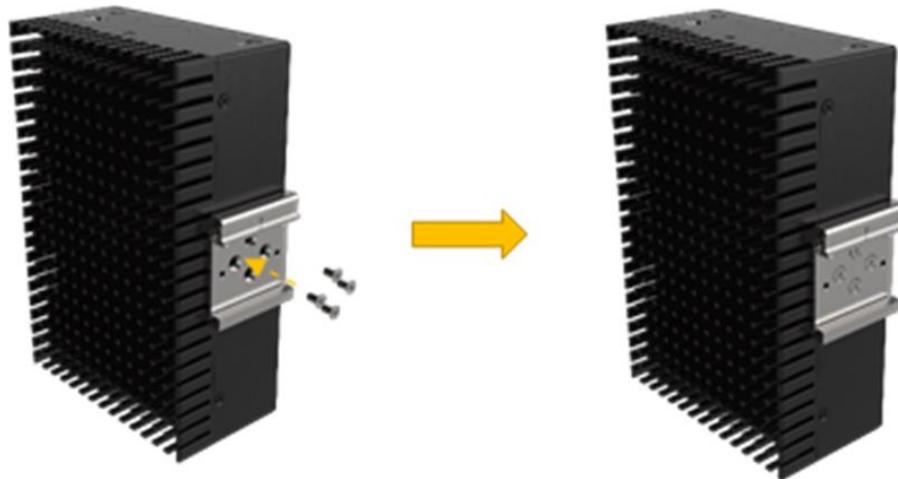

Figure 3-19: DIN Rail Mounting Bracket Installation

Step 4: Attach the upper edge of the mounting bracket at an angle. Push the system towards the DIN rail until mounting bracket hangs securely.

3.11.2 Wall Mounting Installation

DRPC-242-ADL-P Series can be mounted by using the optional wall mount bracket, follow the steps below to install.

Step 1: Turn the embedded system over.

Step 2: Align the retention screw holes in each bracket with the corresponding retention screw holes on the bottom surface.

3.12 External Peripheral Interface Connectors

The DRPC-242-ADL-P Series has the following connectors. Detailed descriptions of the connectors can be found in the subsections below.

- Ethernet
- Power button
- Power DC jack
- HDMI
- DP
- USB

3.12.1 HDMI/ DP Connector

To connect the HDMI/DP devices, please plug in HDMI/DP connector in the right direction as shown below:

Figure 3-24: HDMI/DP Connection

3.12.2 LAN Connectors

The LAN connectors allow connection to an external network

Step 1: Locate the RJ-45 connectors. The locations of the RJ-45 connectors are shown in **Chapter 1**

Step 2: Align the connectors. Align the RJ-45 connector on the LAN cable with one of the RJ-45 connectors on the **DRPC-242-ADL-P** Series. See

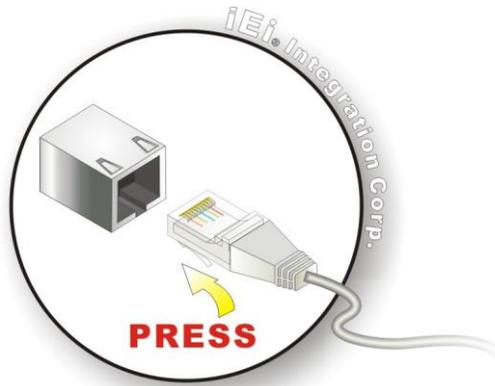

Figure 3-25: LAN Connection

Step 3: Insert the LAN cable RJ-45 connector. Once aligned, gently insert the LAN cable RJ-45 connector into the on-board RJ-45 connector

The RJ-45 Ethernet connector has two status LEDs, one green and one yellow. The green LED indicates activity on the port and the yellow LED indicates the port is linked.

3.13 Power Connector

**WARNING:**

To Make sure a power supply with the correct input voltage is being fed into the system. Incorrect voltages applied to the system may cause damage to the internal electronic components and may also cause injury to the user.

The power of the system needs more than 12V5A

Step 1: Connect the power source to the power input jack.

Step 2: Push the power button, and the power LED on the front panel turns on.

3.15 Maintenance

To configure the jumper settings, please follow the steps below.

Step 1: Remove the top cover. See **Figure 3-1**.

Step 2: Locate the jumper on the embedded motherboard.

Step 3: Make the jumper settings in accordance with the settings described and defined in the following sections.

3.15.1 Flash Descriptor Security Override Jumper

To update the ME firmware, please follow the steps below

- Step 1:** Before turning on the system power, short the Flash Descriptor Security Override jumper.
- Step 2:** Update the BIOS and ME firmware, and then turn off the system power.
- Step 3:** Remove the metal clip on the Flash Descriptor Security Override jumper to its default setting
- Step 4:** Restart the system. The system will reboot 2 ~ 3 times to complete the ME firmware update

BIOS

5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

NOTE:

Some of the BIOS options may vary throughout the life cycle of the product and are subject to change without prior notice.

5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. **Using keyboard:** Press the **DEL** or **F2** as soon as the system is turned on.
2. **Using touchscreen:** Press the **Setup** button on the upper right corner of the BIOS Starting Menu.

If the message disappears before the **DEL** or **F2** key is pressed, restart the computer and try again, then the BIOS Starting Menu will appear. Select "Setup" and press Enter to get into the BIOS Setup.

Figure 5-1: BIOS Starting Menu

5.1.2 Using Setup

The BIOS Setup menu can be navigated by using a keyboard or a touchscreen.

5.1.2.1 Keyboard Navigation

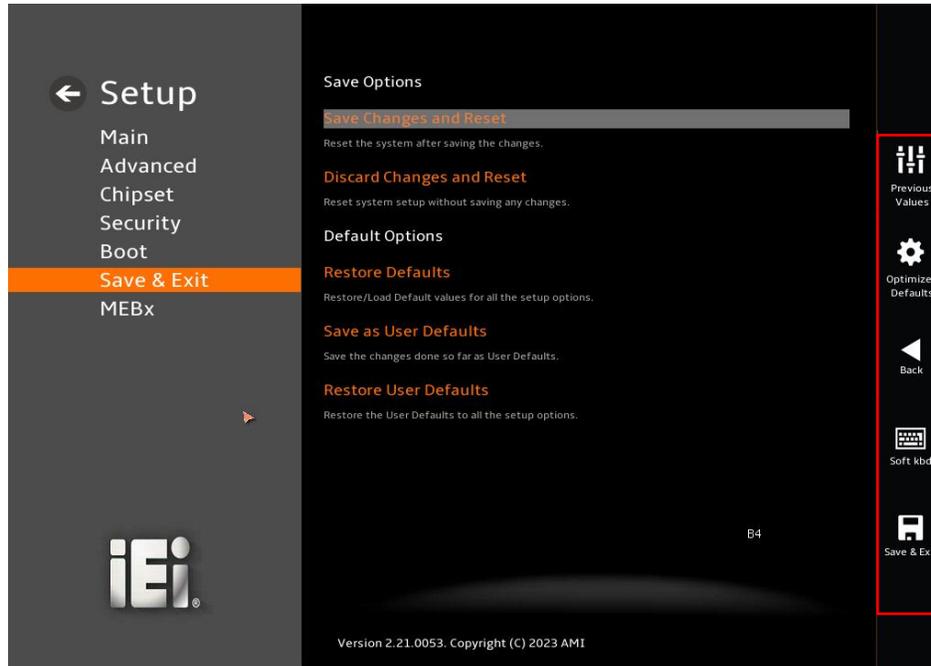

For keyboard navigation, use the navigation keys shown in (Figure 5-2).

Key	Function
Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes
-	Decrease the numeric value or make changes
Page Up	Move to the previous page
Page Dn	Move to the next page
Esc	Main Menu – Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2	Load previous values
F3	Load optimized defaults
F4	Save changes and Exit BIOS
<K>	Scroll help area upwards
<M>	Scroll help area downwards

Figure 5-2: BIOS Navigation Keys

5.1.2.2 Touch Navigation

For touchscreen navigation, use the on-screen navigation keys shown below (**Figure 5-3**).

On-screen Button	Function
Previous Values	Load the last value you set.
Optimized Defaults	Load the factory default values in order to achieve the best performance.
Back	Return to the previous menu.
Soft kbd	Display the on-screen keyboard.
Save & Exit	Save the changes made to the BIOS options and reset the system.

Figure 5-3: BIOS On-screen Navigation Keys

5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window, press the **Esc** key.

5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, CMOS defaults. Use the clear CMOS button described in **Chapter 4**.

5.1.5 BIOS Menu Bar

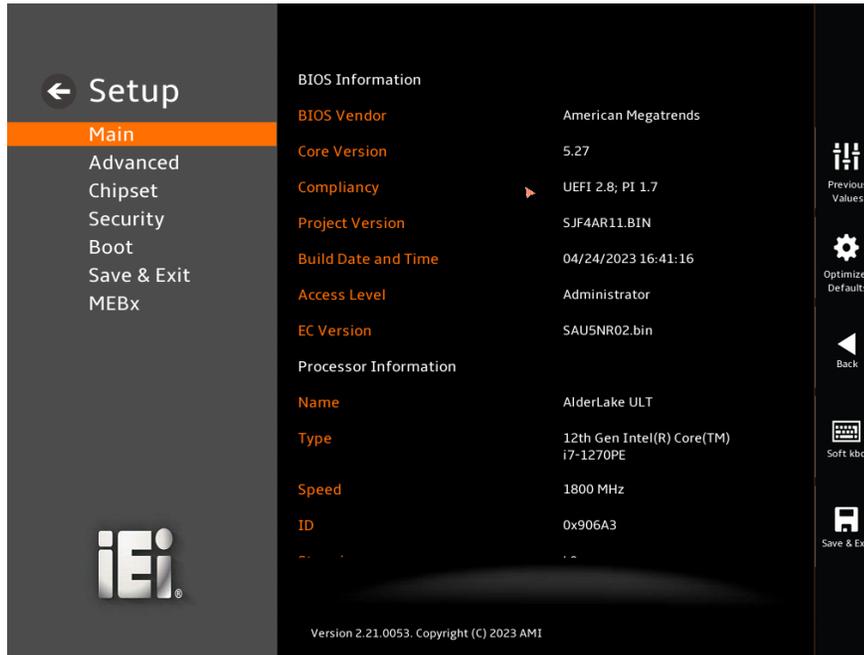

The **menu bar** on top of the BIOS screen has the following main items:

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Security – Sets User and Supervisor Passwords.
- Boot – Changes the system boot configuration.
- Save & Exit – Selects exit options and loads default settings
- MEBx – Support Intel AMT function

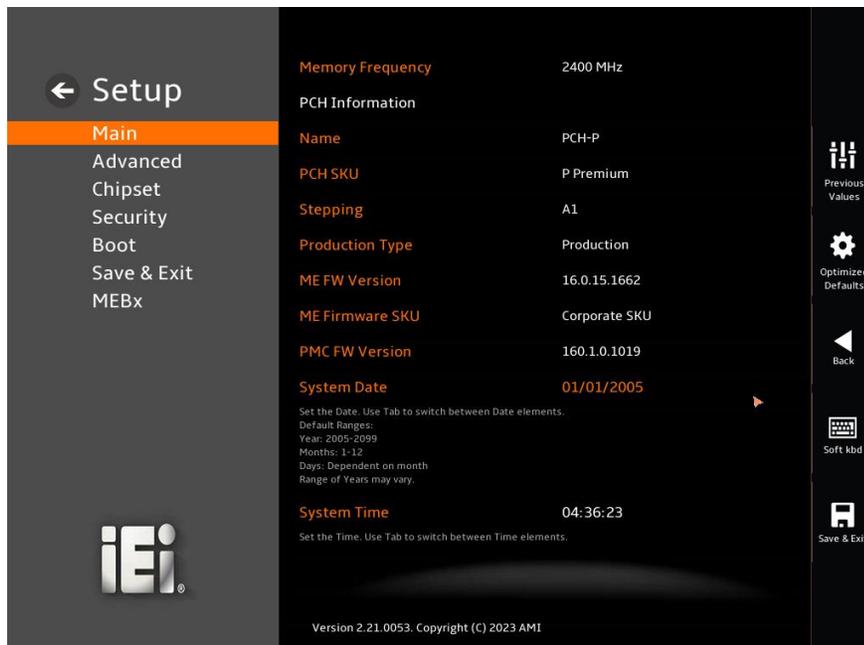

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

5.2 Main

The **Main** BIOS menu (**BIOS Menu 1 & BIOS Menu 2**) appears when the **BIOS Setup** program is entered. The **Main** menu gives an overview of the basic system information.

→ BIOS Information

The **BIOS Information** lists a brief summary of the BIOS. The fields in **BIOS Information** cannot be changed. The items shown in the system overview include:

- **BIOS Vendor:** Installed BIOS vendor
- **Core Version:** Current BIOS version
- **Compliance:** Current UEFI & PI version
- **Project Version:** the board version
- **Build Date and Time:** Date the current BIOS version was created
- **EC Version:** Current EC version

→ Processor Information

The **Processor Information** lists a brief summary of the Processor. The fields in **Processor Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the Processor Details
- **Type:** Displays the Processor Type
- **Speed:** Displays the Processor Speed
- **ID:** Displays the Processor ID
- **Stepping:** Displays the Processor Stepping
- **Number of Efficient-cores:** Displays number of CPU efficient-cores
- **Number of Processors:** Displays number of CPU cores
- **Microcode Revision:** CPU Microcode Revision
- **IGFX GOP Version:** Displays the IGFX GOP Version
- **Total Memory:** Total Memory in the System
- **Memory Frequency:** Displays the Frequency of Memory

→ PCH Information

The **PCH Information** lists a brief summary of the PCH. The fields in **PCH Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the PCH Name
- **PCH SKU:** Displays the PCH SKU
- **Stepping:** Displays the PCH Stepping
- **Production Type:** Displays the Production Type
- **Dual Output Fast Read support:** Displays the Processor Details
- **Read ID/Status Clock Freq:** Displays the Read ID and Read Status Clock Frequency
- **ME FW Version:** Displays the ME Firmware Version
- **ME Firmware SKU:** Displays the ME Firmware SKU
- **PMC FW Version:** Displays the PMC Firmware Version

The System Overview field also has two user configurable fields:

→ **System Date [xx:xx:xx]**

Use the **System Date** option to set the system date. Manually enter the day, month and year.

→ **System Time [xx:xx:xx]**

Use the **System Time** option to set the system time. Manually enter the hours, minutes and seconds.

5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 3 & BIOS Menu 4**) to configure the CPU and peripheral devices through the following sub-menus

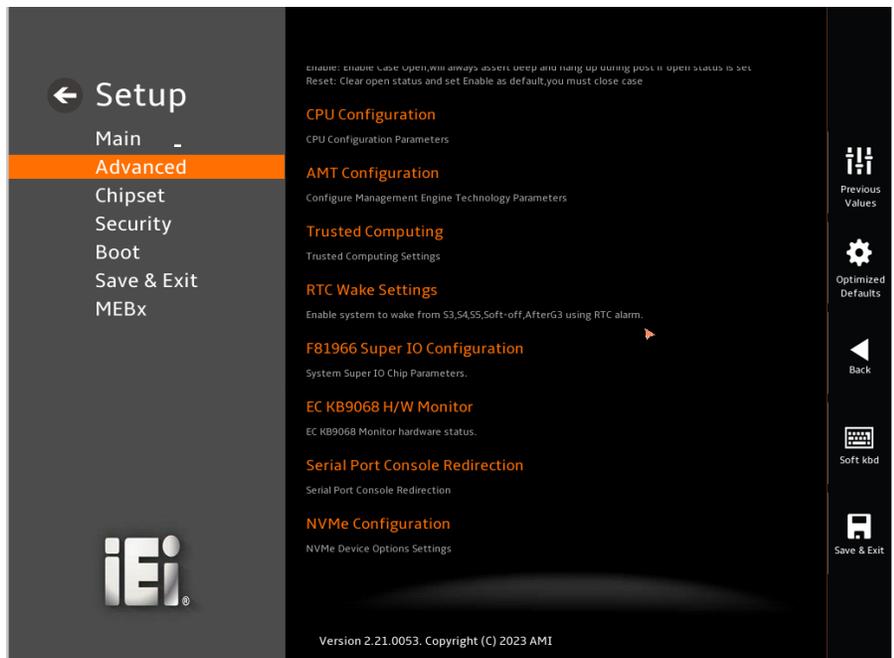

WARNING!

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

→ Intel (VXM) Virtualization Technology [Enabled]

Use the **Intel (VMX) Virtualization Technology** option to enable or disable virtualization on the system. When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

- **Disabled** Disables Intel Virtualization Technology.
- **Enabled** **DEFAULT** Enables Intel Virtualization Technology.

→ Active Performance-cores [All]

Use the **Active Processor Cores** BIOS option to enable numbers of P-cores in the processor package.

- **All** **DEFAULT** Enable all cores in the processor package.
- **1** Enable one core in the processor package.
- **2** Enable two cores in the processor package.
- **3** Enable three cores in the processor package.

→ Active Efficient-cores [All]

Use the **Active Processor Cores** BIOS option to enable numbers of E-cores in the processor package.

- **All** **DEFAULT** Enable all cores in the processor package.
- **7** Enable seven cores in the processor package.
- **6** Enable six cores in the processor package.
- **5** Enable five cores in the processor package.
- **4** Enable four cores in the processor package.
- **3** Enable three cores in the processor package.
- **2** Enable two cores in the processor package.
- **1** Enable one core in the processor package.

→ 0 Enable zero core in the processor package.

→ **Hyper-Threading [Enabled]**

Use the **Hyper-Threading** option to enable or disable the Hyper-Threading Technology.

→ **Disabled** Disables Hyper-Threading Technology

→ **Enabled** **DEFAULT** Enables Hyper-Threading Technology

→ **Intel(R) SpeedStep(tm) [Enabled]**

Use the Intel(R) SpeedStep(tm) option to enable more than two frequency ranges to be supported.

→ **Disabled** Disables more than two frequency ranges

→ **Enabled** **DEFAULT** Enables more than two frequency ranges

→ **C states [Disabled]**

Use **C states** option to enable or disable CPU Power Management. Allows CPU to go to C states when it's not 100% utilized

→ **Disabled** **DEFAULT** Disables CPU to go to C states when it's not 100% utilized.

→ **Enabled** Enables CPU to go to C states when it's not 100% utilized.

→ **Power Limit 1 [0]**

Use the + or – key to change the **Power Limit 1** value. BIOS will program the default values for Limit 1 and Power Limit 1 Time Window. For 12.50W, enter 12500.

→ **Power Limit 2 [0]**

Use the + or – key to change the **Power Limit 2** value. BIOS will round to the nearest 1/8W when programming. 0 = no custom override. For 12.50W, enter 12500.

➔ **Intel AMT [Enable]**

Use the **Intel AMT** option to enable or disable access MEBx Setup supported.

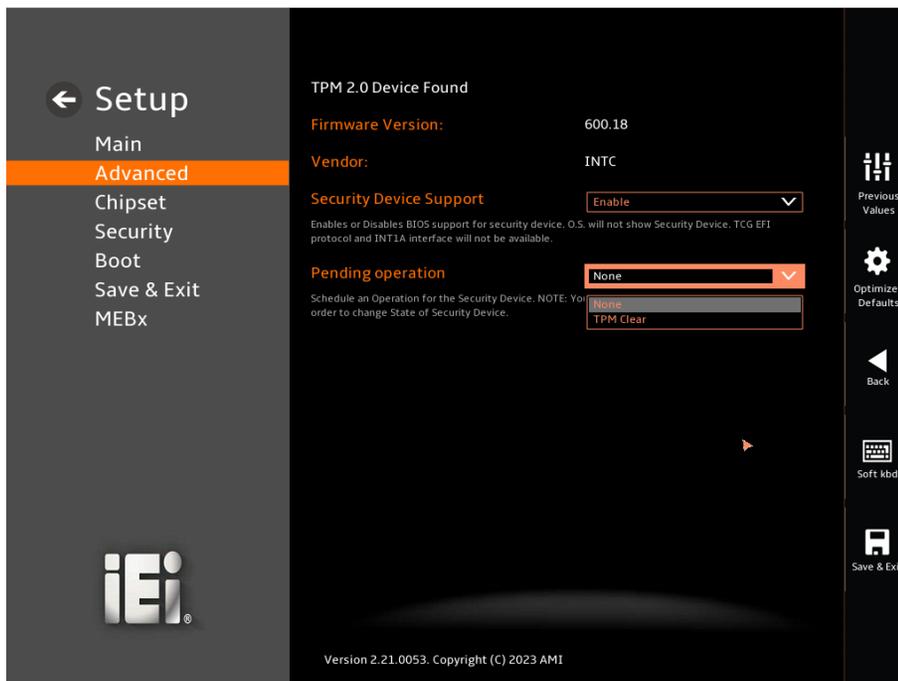

- ➔ **Disabled** Disables Intel AMT are no supported MEBx Setup
- ➔ **Enabled** **DEFAULT** Enables Intel AMT are able to access MEBx Setup

➔ **Unconfigure ME**

The **Unconfigure ME** with resetting MEBx Password to default on next boot

5.3.3 Trusted Computing

Use the **Trusted Computing** menu (**BIOS Menu 9**) to configure settings related to the Trusted Computing Group (TCG) Trusted Platform Module (TPM).

BIOS Menu 9: Trusted Computing

➔ **Security Device Support [Enable]**

Use the **Security Device Support** option to configure support for the TPM.

DRPC-242-ADL-P

- ➔ **Disable** TPM support is disabled.
- ➔ **Enable** **DEFAULT** TPM support is enabled.

➔ Pending Operation [None]

Use the **Pending Operation** option to schedule an operation for the security device.

- ➔ **None** **DEFAULT** TPM information is previous.S
- ➔ **TPM Clear** TPM information is cleared

5.3.4 RTC Wake Settings

Use the **RTC Wake Settings** menu (**BIOS Menu 10**) to enable or disable System wake on alarm event.

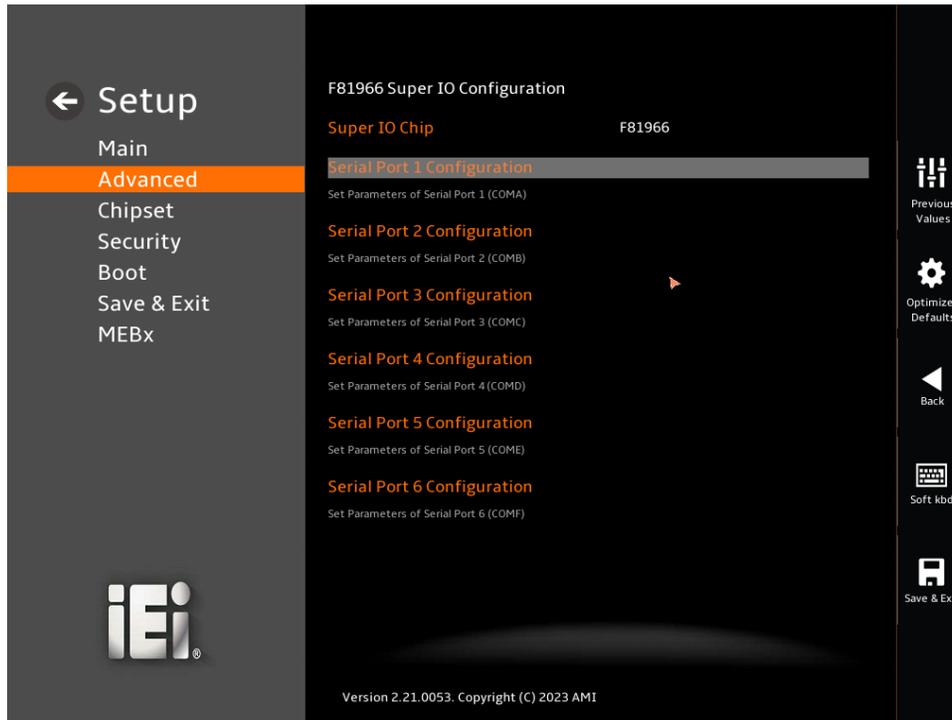

BIOS Menu 10: RTC Wake Settings

- ➔ **Disabled** **DEFAULT** Disable System wake on alarm event.
- ➔ **Enabled** System will wake on the date::hr::min::sec specified.

5.3.5 F81966 Super IO Configuration

Use the **F81966 Super IO Configuration** menu (**BIOS Menu 11**) to set or change the configurations for the serial ports.

→ Serial Port Mode [RS422]

Use the **Serial Port Mode** option to set RS422/485 mode.

- ➔ **RS422** Serial Port Mode is RS422 mode
- ➔ **RS485** Serial Port Mode is RS485 mode

5.3.5.4 Serial Port 4 Configuration

Use the **Serial Port 3 Configuration** menu (**BIOS Menu 15**) to configure the serial port 4

BIOS Menu 15: Serial Port 4 Configuration Menu

➔ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

- ➔ **Disabled** Disable the serial port
- ➔ **Enabled** **DEFAULT** Enable the serial port

➔ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

DRPC-242-ADL-P

→ **IO=2E8h;** Serial Port I/O port address is 2E8h and the interrupt
IRQ=10 address is IRQ10

→ **Serial Port Mode [RS422]**

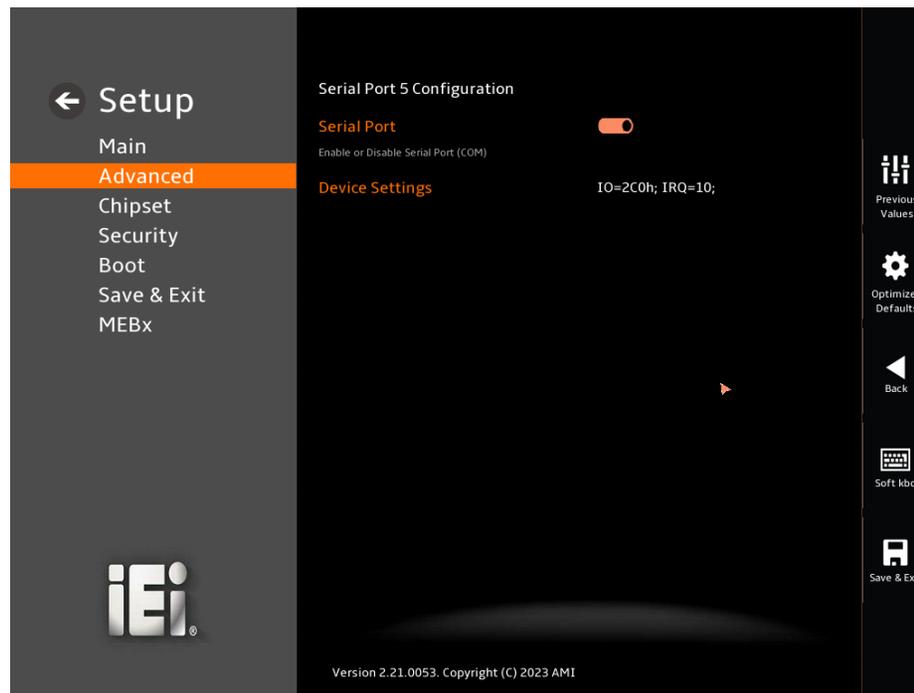

Use the **Serial Port Mode** option to set RS/422/485 mode.

→ **RS422** Serial Port Mode is RS422 mode

→ **RS485** Serial Port Mode is RS485 mode

5.3.5.5 Serial Port 5 Configuration

Use the **Serial Port 3 Configuration** menu (**BIOS Menu 16**) to configure the serial port 5

**BIOS Menu 16: Serial Port 5 Configuration Menu**

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

Use the **CPU_FAN Smart Fan Control** option to configure the CPU Smart Fan.

- **Manual Mode** The fan spins at the speed set in Manual Mode settings.
- **Auto Mode** **DEFAULT** The fan adjusts its speed using Auto Mode settings.

→ **CPU_FAN Start Temperature [65]**

If the CPU temperature is higher than this setting, CPU_FAN will start faster. Use the + or – key to change the value or enter a decimal number between 1 and 100.

→ **CPU_FAN Off Temperature [55]**

If the CPU temperature is lower than the value set this option, the fan speed change to be lowest. To set a value, Use the + or – key to change the value or enter a decimal number between 1 and 100.

→ **CPU_FAN Start PWM [30]**

Use the **CPU_FAN1 Start PWM** option to set the PWM start value. Use the + or – key to change the value or enter a decimal number between 1 and 100.

→ **FAN2 Smart Fan Control [Auto Mode]**

Use the **FAN2 Smart Fan Control** option to configure the CPU Smart Fan.

- **Manual Mode** The fan spins at the speed set in Manual Mode settings.
- **Auto Mode** **DEFAULT** The fan adjusts its speed using Auto Mode settings.

→ **FAN2 Start Temperature [50]**

If the System temperature2 is higher than this setting, FAN2 will start faster. Use the + or – key to change the value or enter a decimal number between 1 and 100.

Safety Precautions

A.1 Safety Precautions

WARNING:

The precautions outlined in this appendix should be strictly followed. Failure to follow these precautions may result in permanent damage to the DRPC-242-ADL-P Series.

Please follow the safety precautions outlined in the sections that follow:

A.1.1 General Safety Precautions

Please ensure the following safety precautions are adhered to at all times.

- ***Make sure the power is turned off and the power cord is disconnected*** when moving, installing or modifying the system.
- ***Do not apply voltage levels that exceed the specified voltage range.*** Doing so may cause fire and/or an electrical shock.
- ***Electric shocks can occur*** if opened while still powered on.
- ***Do not drop or insert any objects*** into the ventilation openings.
- ***If considerable amounts of dust, water, or fluids enter the system***, turn off the power supply immediately, unplug the power cord, and contact the system vendor.
- ***This equipment is not suitable for use in locations where children are likely to be present.***
- **DO NOT:**
 - Drop the system against a hard surface.
 - In a site where the ambient temperature exceeds the rated temperature

A.1.2 Anti-static Precautions

**WARNING:**

Failure to take ESD precautions during the installation of the DRPC-242-ADL-P Series may result in permanent damage to the DRPC-242-ADL-P Series and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the DRPC-242-ADL-P Series. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the DRPC-242-ADL-P Series is opened and any of the electrical components are handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging any electrical component.
- ***Self-grounding:*** Before handling any electrical component, touch any grounded conducting material. During the time the electrical component is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring or working with an electrical component, place it on an anti-static pad. This reduces the possibility of ESD damage.

A.1.3 Product Disposal

**CAUTION:**

Risk of explosion if the battery is replaced by an incorrect type;

Replacement of a battery with an incorrect type that can defeat a safeguard (for example, in the case of some lithium battery types);

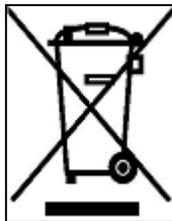

Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;

Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas;

A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union - If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union:

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords.

When you need to dispose of your display products, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

A.2 Maintenance and Cleaning Precautions

When maintaining or cleaning the DRPC-242-ADL-P Series, please follow the guidelines below.

A.2.1 Maintenance and Cleaning

Prior to cleaning any part or component of the DRPC-242-ADL-P Series, please read the details below.

- The interior of the DRPC-242-ADL-P Series does not require cleaning. Keep fluids away from the DRPC-242-ADL-P Series interior.
- Be cautious of all small removable components when vacuuming the DRPC-242-ADL-P Series.
- Turn the DRPC-242-ADL-P Series off before cleaning the DRPC-242-ADL-P Series.
- Never drop any objects or liquids through the openings of the DRPC-242-ADL-P Series.
- Be cautious of any possible allergic reactions to solvents or chemicals used when cleaning the DRPC-242-ADL-P Series.

A.2.2 Cleaning Tools

Some components in the DRPC-242-ADL-P Series may only be cleaned using a product specifically designed for the purpose. In such case, the product will be explicitly mentioned in the cleaning tips. Below is a list of items to use when cleaning the DRPC-242-ADL-P Series.

- **Cloth** – Although paper towels or tissues can be used, a soft, clean piece of cloth is recommended when cleaning the DRPC-242-ADL-P Series.
- **Water or rubbing alcohol** – A cloth moistened with water or rubbing alcohol can be used to clean the DRPC-242-ADL-P Series.
- **Using solvents** – The use of solvents is not recommended when cleaning the DRPC-242-ADL-P Series as they may damage the plastic parts.
- **Vacuum cleaner** – Using a vacuum specifically designed for computers is one of the best methods of cleaning the DRPC-242-ADL-P Series. Dust and

DRPC-242-ADL-P

dirt can restrict the airflow in the DRPC-242-ADL-P Series and cause its circuitry to corrode.

- **Swabs** - Swabs moistened with rubbing alcohol or water are excellent tools for wiping hard to reach areas. Whenever possible, it is best to use lint free swabs such as foam swabs for cleaning.

ROHS STATEMENT

The label on the product indicates this product conforms to European (EU) Restriction of Hazardous Substances (RoHS) that set maximum concentration limits on hazardous materials used in electrical and electronic equipment.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body.

CHINA ROHS

The label on the product indicates the estimated “Environmentally Friendly Use Period” (EFUP). This is an estimate of the number of years that these substances would “not leak out or undergo abrupt change.” This product may contain replaceable sub-assemblies/components which have a shorter EFUP such as batteries and lamps. These components will be separately marked.
