# Company Profile

**GIGAIPC**

**GIGAIPC** **GIGABYTE**  
GROUP

GIGAIPC, established in 2018 as an independent IPC-focused spin-off from GIGABYTE, is driven by a passion for technology and agile intuition of our customer's requirements. GIGAIPC has an exceptionally sophisticated Research & Development department, enabling us to keep up with the rapid pace of today's technology. Combined with our outstanding research and design ability, GIGAIPC also has an award-winning Taiwan-based manufacturing facility, synchronizing with GIGAIPC's R&D department to deliver high quality and reliable products. GIGAIPC is a young and energetic organization driven by surpassing our customer's expectations, and we promise to offer our customers not only high-quality computing platforms but also world-class service and support. As a result, GIGAIPC's service centers have been established in most major cities worldwide, and our global presence is still being actively expanding, all ready to offer the best service to our customers.

GIGAIPC is an Associate member of the Intel® Internet of Things Solutions Alliance.

## "Building a SMARTER Tomorrow"

The strengths of GIGAIPC are based on the advantages, skills and expertise we have built to realize this vision, including being customer focused and striving for high quality. GIGAIPC is determined to keep reinforcing these strengths as our principles to achieve maximum customer satisfaction.

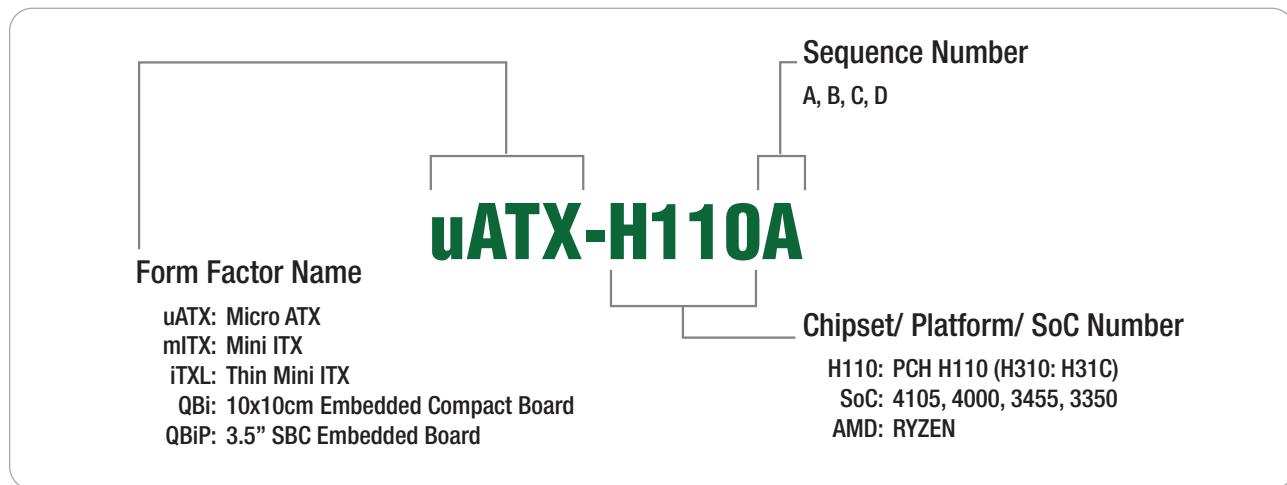

## Key Advantages to work with GIGAIPC

<b>Technology</b>	1. Intel®, AMD etc. Key vendor direct support 2. Latest technical and over 10 years RD development experiences 3. Large coverage rate of design verification
<b>Flexibility</b>	1. Huge off-the-shelf products combination and rich ODM/OEM experiences 2. Multiple manufacturing sites for different high-mix and low-volume requirements 3. Task-force team with multiple functions to align customer's requirements
<b>Quality</b>	1. Component IPC, audit and approval system 2. Rich resources and equipments on design and manufacture quality system 3. Emphasizing closed-loop of PDCA cycle for continuous improvement
<b>Service</b>	1. Worldwide RMA service coverage more than 80 service centers globally
<b>Capability</b>	1. Customization capability 2. Direct field application engineer support and quick response 3. Customized manufacturing process, quality control and delivery solutions

Smart Whiteboard  
Collaboartion without Limits

## Smart Whiteboard

Nowadays, video conferences have become the new norm in the corporate world. For which devices that allow smooth collaboration within the colleagues inside the same meeting room, or in another continent, have become more and more important.

Smart whiteboards are one of those devices that allow collaboration among colleagues, enhance brainstorming for new ideas, and encourage creativity. With the Smart Whiteboard, forget about the restrictions of cables and physical space, and explore ideas without limit.

GIGAIPC has made the perfect integration of Intel® Smart Display Module (Intel® SDM) Solution with a high-quality touch screen of 55", 65", 75" and the OS to create a smooth user-friendly Smart Whiteboard solution, that needs just to plug in and play. Even the most traditional colleague will be able to interact with the whiteboard right away.

### Collaboration Without Borders

With Smart Whiteboard you will not only have a beautiful display to present your latest report, but you will have a powerful computing machine to allow you enrich your presentations with latest digital media, and most importantly connect to the internet and present to everyone in your corporation around the world and inside your office. Allowing them to participate and comment on your presentation in real-time: Asking the right questions at the right time has never been easier than with the Smart Whiteboard.

### Upgrade Your Team's Creativity

Have you ever been in a brainstorming session, that has been restricted because there is not enough space in the whiteboard? Well, that is now a thing of the past with a smart whiteboard. With its unlimited canvas, you can all brainstorm together by drawing, handwriting, inserting graphs, tables, or images on the same canvas at the same time. Even if you are not in the same meeting room or the same country. People can simultaneously access files, edit contents, annotate, save and share documents through this smartboard to finish the brainstorming process effectively.

#### Quick Deployment

Smart Digital Module (SDM) is pre-installed with Windows. It is inserted in the touch panel and ready to use.

#### Economic Feasibility

Easy to upgrade by switching new version of SDM. It's not necessary to replace the whole solution to save high costs.

#### Massive Device Collaboration

Users connect Smart Whiteboard to desktop, notebook or even smart devices, such as iOS and Android with a single application.

#### Multi-User Capability

Users access files and edit contents, handwriting and graphics at the same time when they are in different physical places.

#### Real-Time Interaction

Suitable for Online-to-Offline meetings with audio and video peripherals connected.
