About Winmate

Founded in 1996, Winmate Inc. is a pioneer in rugged computing technology. Winmate has provided business leaders worldwide with reliable, robust solutions for the most challenging industrial conditions for over two decades. From R&D to manufacturing to in-house testing, Winmate Inc. manages the entire product development process with ready-made products available for quick deployment. Today Winmate's innovative approach has helped countless enterprises at every level with equipment automation and seamless Industrial Internet of Things (IIoT) integration.

From the industrial display, panel PC, HMI, embedded systems to rugged mobile devices, Winmate caters to industries ranging from transportation and logistics to marine and military, railway, oil, and gas, and provides customization services to create a unique solution for specific customer requirements.

The Winmate Difference

Innovation and Ruggedness

With innovation and ruggedness, our products are designed to meet the requirements of vertical markets' environmental standards.

Engineering Intelligence

We are committed to maintaining the highest standards in engineering excellence to ensure our products deliver reliability, durability, and optimized performance.

Quality Commitment

Quality assurance and entire engineering processes are conducted in-house. It is why we invested significantly in our state-of-the-art testing facility with additional global support.

“ **INNOVATIVE
TECHNOLOGY FOR
OPERATIONAL
EXCELLENCE.** ”

Efficiency

Our team is committed to efficiency and maintaining the shortest possible development cycles. The whole development process is conducted in-house to achieve the market advantage in speed and quality from design to testing.

Reliability

Reliability, service, and support are part of our foundation. Every product scrutinizes industrial standards testing to verify electrical, mechanical, thermal, and firmware design performance.

Customized Solutions

Years of experience allow Winmate to offer customized solutions for different applications.

From product design to accessories, our engineering team designs and support the system integration process.

- CUSTOMIZED CONFIGURATION
- CUSTOM OS IMAGE
- CUSTOM BIOS
- ENCLOSURE DESIGN
- PERIPHERALS AND OPTIONS
- CUSTOM-DESIGNED ACCESSORIES

Technical Know-How

We understand that access to cutting-edge solutions purposely built for their applications is imperative for enterprises operating in rugged or potentially hazardous environments. As a result, Winmate locates its resources from project research and design, software development and customization, product verification and validation, and in-house testing to research and implement the latest technologies available.

The latest technologies we deploy for our rugged products:

- Dry and wet optical bonding
- Panel enhancement for sunlight readability
- Anti-reflection (AR) and anti-glare (AG) glass protection coating
- Light sensor
- Hyper dimming
- Electronic potting
- Touch screen integration: projected capacitive, resistive, or SAW touch
- Waterproof enclosure
- Military EMI and mesh coating
- Wireless capabilities
- Data capture devices integration
- Defroster for ultra-low temperature environments
- Stainless steel SUS 316/ AISI 316
- Shock and vibration resistance
- Wide-range operation temperature

Field Service Solutions

Overview

Field service workers face various challenges working in remote locations and unfamiliar environments, and every minute of downtime results in lost revenue. Access to critical information and wireless communications are top priorities for workers to provide fast service. Winmate provides rugged mobile solutions capable of increasing productivity in the field.

Our rugged mobile solutions are built to withstand the rigors of the harshest environments and are designed to improve the efficiency and productivity of field workers. Durable portable computers allow workers to access information anytime, no matter where the task brings them. Wireless connectivity, data collection, and data transfer features allow workers to keep in touch with the operations control all day long.

Our rugged mobile computers include:

- The latest Android™ or Windows® operating system
- Advanced data collection options
- Durable design

Winate's rugged mobile computers are built to last, reducing the total cost of ownership over time. Retailers, manufacturers, logistics companies, and field service organizations all choose Winmate mobile computers every day to improve daily operations.

Technology

Winate offers Android and Windows-based rugged mobile computers with additional application-focused features such as barcode scanners, RFID, and NFC readers. All the devices are solid, waterproof, and drop resistant.

Application-focused features:

- Built-in barcode, RFID, fingerprint scanners
- Wireless connectivity 3G/ 4G LTE, WLAN, BT, GPS
- Waterproof and dustproof enclosure
- Shock, drop, and vibration resistance

**WE DELIVER ENTERPRISE MOBILITY SOLUTIONS
FOR FIELD SERVICE OPERATIONS.**

RUGGED TABLETS

Portable and wireless rugged tablet computers can survive in any environment and get real work done.

VEHICLE-MOUNTED COMPUTERS

Rugged vehicle-mounted computers are used for data collection in the warehouse and logistic applications, designed to fit seamlessly into forklifts, trucks, and other vehicles.

G-WIN PANEL PC

Rugged Panel PC are used for data collection in the warehouse and logistic applications, designed to fit seamlessly into forklifts, trucks, and other vehicles.

Success Story

Field Work Inspection

Background

Inspection systems for industrial fieldwork are essential for safeguarding public areas and industrial operations. With portable digital radiography (DR) technology, field workers can use its x-ray scanning features to evaluate power lines and even preventive maintenance in oil or gas applications. Likewise, accurate DR systems can be used for industrial surveillance and construction site evaluations where a precise panel PC could be the difference between life and death.

Core Products

Industrial Panel PC

- 13.3" Ultra-Rugged Tablet M133WK Series

Main Challenges

- Accurate x-ray inspections in industrial fieldwork
- Exposure to different weather conditions
- Responsive touch screen
- High performance

Why Winmate

- Sunlight readable display with optical bonding technology
- Highly sensitive PCAP touchscreen
- Rugged design, IP65 water and dustproof
- High performance and fanless cooling system

“**DIGITAL RADIOGRAPHY FOR EVALUATION AND PREVENTIVE MAINTENANCE IN FIELD SERVICE APPLICATIONS.**”

RUGGED ANDROID TABLETS SET A NEW STANDARD FOR FIELD SERVICE WORKERS

PERFORMANCE IMPROVED.
FASTER THAN EVER.

Oil & Gas

Overview

Oil rigs and remote pipeline locations are the most dangerous and challenging work environments anywhere. Winmate rugged computers are designed for the harsh environments of an oil refinery or a drilling rig and come with ATEX Zone 2 and Class 1 Division 2 (C1D2) certifications. By employing automated processes, oil and gas companies can increase production wells, improve production control, and reap the benefits of modern technologies.

Technology

Winate has technology know-how for the production and development of explosion-proof devices:

Intrinsic Safety Schematic Design

Our engineers design the intrinsic safety schematics for the explosion-proof product line. Our engineers design the electronic system to ensure that the temperature under all fault conditions can never rise to a value that may cause explosive gasses' ignition.

Intrinsically safe design

Non-Sparking Device

Our design guarantees that the ignition of a hazardous atmosphere does not occur. It is achieved by ensuring that only low voltages and currents enter the hazardous area and that no significant energy storage is possible.

Thermal design

Application Story

Operator Control HMI for Oil Drilling Rig

Background

In the Oil & Gas industry, complex process control is required at all stages, from exploration, extraction, and transportation, to the refinement and the distribution of fossil fuels. These processes occur in harsh environments with the constant threat of dangerous substances in the air, where combustion can occur when proper precautions are ignored.

Core products

- ATEX Aluminum Panel PC
- ATEX Stainless Display
- ATEX DIN-Rail Box PC

Main Challenges

- Hazardous working environment
- Wide operating temperature
- Explosion-proof solution

Why Winmate

- Certified for C1D2, ATEX Zone 2
- Large, high-brightness display with optical bonding technology
- Wide operating temperature

Winate's ATEX HMI Panel PC

Application Diagram: Hazardous Locations

Application Story

Safe Operation in Hazardous

“With ATEX-Grade Industrial Rugged Panel PCs for Mining, Energy and Utilities Sectors”

Background

The mining sector entails numerous environmental challenges, off-grid location, dust, etc., that demands only the most rugged industrial Panel PCs available on the marketplace. These rugged industrial Panel PCs should assist various fieldwork-related capacities from numerous safety properties and vital technical applications to smooth-run the operations. At the same time, durable to hold up against the harshest climate conditions like severe temperature from subfreezing to extreme heat malfunctioning.

Mining is also a labor-intensive sector, making a sturdy and reputable touchscreen display is required. The devices used should handle on-site duties, increase and speed up work progress. Top-quality, rugged touchscreen PCs must be water- and dustproof, resistant to shock, vibration, drop, and anti-explosion. These features are essential for protecting the stability of the task at hand and ensuring the safety and security of the fieldworkers.

Core products

- R19IHAT-66EX - 19" Intel® Core™ i5/i7 ATEX 1000nits Panel PC

Main Challenges

- Sunlight readability.
- Devices that include external and internal applications to enhance and improve fieldwork.
- Need to withstand extreme weather and environmental conditions.
- Use in the hazardous area.

Why Winmate

- Certified for Hazardous Locations
- Fully Rugged and Waterproof Design
- Tailor-made for Your Needs
