COMPACT TEST TOOL FOR
QUALITY CONTROL AND TESTING

Q1 - 2023

About Winmate

Founded in 1996, Winmate Inc. is a pioneer in rugged computing technology. Winmate has provided business leaders worldwide with reliable, robust solutions for the most challenging industrial conditions for over two decades. From R&D to manufacturing to in-house testing, Winmate Inc. manages the entire product development process with ready-made products available for quick deployment. Today Winmate's innovative approach has helped countless enterprises at every level with equipment automation and seamless Industrial Internet of Things (IIoT) integration.

From the industrial display, panel PC, HMI, embedded systems to rugged mobile devices, Winmate caters to industries ranging from transportation and logistics to marine and military, railway, oil, and gas, and provides customization services to create a unique solution for specific customer requirements.

The Winmate Difference

Innovation and Ruggedness

With innovation and ruggedness, our products are designed to meet the requirements of vertical markets' environmental standards.

Engineering Intelligence

We are committed to maintaining the highest standards in engineering excellence to ensure our products deliver reliability, durability, and optimized performance.

Quality Commitment

Quality assurance and entire engineering processes are conducted in-house. It is why we invested significantly in our state-of-the-art testing facility with additional global support.

“
**INNOVATIVE
TECHNOLOGY FOR
OPERATIONAL
EXCELLENCE.**
”

Efficiency

Our team is committed to efficiency and maintaining the shortest possible development cycles. The whole development process is conducted in-house to achieve the market advantage in speed and quality from design to testing.

Reliability

Reliability, service, and support are part of our foundation. Every product scrutinizes industrial standards testing to verify electrical, mechanical, thermal, and firmware design performance.

Customized Solutions

Years of experience allow Winmate to offer customized solutions for different applications.

From product design to accessories, our engineering team designs and support the system integration process.

- CUSTOMIZED CONFIGURATION
- CUSTOM OS IMAGE
- CUSTOM BIOS
- ENCLOSURE DESIGN
- PERIPHERALS AND OPTIONS
- CUSTOM-DESIGNED ACCESSORIES

Technical Know-How

We understand that access to cutting-edge solutions purposely built for their applications is imperative for enterprises operating in rugged or potentially hazardous environments. As a result, Winmate locates its resources from project research and design, software development and customization, product verification and validation, and in-house testing to research and implement the latest technologies available.

The latest technologies we deploy for our rugged products:

- Dry and wet optical bonding
- Panel enhancement for sunlight readability
- Anti-reflection (AR) and anti-glare (AG) glass protection coating
- Light sensor
- Hyper dimming
- Electronic potting
- Touch screen integration: projected capacitive, resistive, or SAW touch
- Waterproof enclosure
- Military EMI and mesh coating
- Wireless capabilities
- Data capture devices integration
- Defroster for ultra-low temperature environments
- Stainless steel SUS 316/ AISI 316
- Shock and vibration resistance
- Wide-range operation temperature

Automotive Industry

Overview

With our increased reliance on computers monitoring car sensors and control systems, the automotive system as a whole must be safety-critical to ensure the safety of the driver, passengers, pedestrians, and other vehicles. To improve the quality and reduce errors in these systems, automotive OEMs and suppliers require the right diagnostic tools to detect and discover any faults in automotive systems.

Our rugged mobile devices include:

- The latest Windows® and Android™ operating system
- Robust wireless communications
- Application-tailored accessories

Winmate rugged tablets support the latest Windows® and Android™ operating system and come with display sizes ranging from 8.4-inch up to 13.3-inches. These tablets are ready to go in the most challenging conditions, featuring waterproof, dustproof, vibration, and drop resistant enclosures. A brilliant sunlight-readable screen offers the best depiction of every diagram and spreadsheet, no matter the lighting conditions.

Designed for workshops, car repair centers, and inspection stations, all of the Winmate's rugged tablets are reliable and durable, feature IP-rated water and dust protection, and comply with MIL-STD-810G/ H standard for shock, vibration, and drop. You can choose the custom accessories based on your application requirements - carry-bags, vehicle cradles, and vehicle docking stations – all for workers' convenience.

Performance, durability, and connectivity are making Winmate's rugged tablets the definitive solution for the automotive industry. Mobile devices bring a new level of convenience, productivity, and operational efficiency to the car production floor, vehicle diagnostics, and repair workshops.

Application Story (Rugged Tablet)

Driving Process Improvement in Automotive Industry

Background

From the in-house test equipment on the car production factory floor to workshops and repair centers, Winmate offers car mechanics a new level of convenience. Our fully rugged tablets and mobile computers help perform car diagnostic, check operation instructions, and visualize ongoing test procedures. Modern technology helps to complete complex tasks at a lower cost and better quality, improve Quality Control (QC) at the early stages of production, and achieve higher productivity and cost reductions by using real-time data.

Core Products

- 13.3" Ultra-Rugged Tablet M133WK Series

Main Challenges

- Vehicle-to-device data communication
- The rigor environment of the factory floor
- After-sale service

“ MOBILE DEVICES BRING A NEW LEVEL OF CONVENIENCE, PRODUCTIVITY, AND OPERATIONAL EFFICIENCY TO THE PRODUCTION FLOOR ”

Why Winmate

- Enhanced compatibility with the vehicle system
- Products tailored for the automotive industry
- Ruggedness and durability
- Extended warranty and dedicated customer support

Application: Vehicle Diagnostics

Application Story (Rugged Tablet)

Car Repair Workshop

Background

The car repair stations require portable and yet powerful tools to speed up the inspection's maintenance service and quality. Winmate offers a rugged tablet computer for the workshop to simplify the regular inspections and maintenance. Our innovative and user-friendly robust mobile computing solutions with an optional smart card reader, RFID reader help speed up delivery services and increase customer satisfaction and retention.

Core products

- 14" Rugged tablet

Main Challenges

- All-in-one device
- Ability to check inventory
- Long working hours for all-day operations

“
**MANAGE
WORKSHOP
INVENTORY
EASILY WITH
ALL-IN-ONE
RUGGED
TABLET
COMPUTERS**
”

Why Winmate

- Rugged design
- Built-in tools for data collection
- Full-day battery life

Application: Car Repair Workshop

Application Story (Rugged Tablet)

To Minimize the Volume of Your Time

Background

When a business car malfunction, lines call for low recovery time to continue to be successful. To minimize the volume of your time motor vehicles invest in the store, required to offer its own company facility clients along with a modern technology service that accelerated the medical diagnosis.

Conventional business-class laptops pc were actually unqualified the activity, so the client opted for and also investigated units Winmate 13.3" tablet computers for their analysis as well as fixing solution set services. To time they have actually presented greater than 4,500 of their solution packages, along with Winmate Rugged Tablets, to company facilities around the nation as well as handled.

Core Products

- 8.4" Ultra-Rugged Tablet
- 13.3" Ultra Rugged Tablet

“ PROVIDING A BETTER MOBILE COMPUTING SOLUTION. ”

Main Challenges

- High performance processor, delivered in a lightweight tablet form factor, customized and flexible docking system, interface connection, programmable hotkey buttons, wireless communication.

Why Winmate

- In-depth knowledge of the industry combined with in-house engineering
- Extended warranty protection

Application: Quality excellence

Application Story (Rugged Tablet)

Robotic Teach Pendant

Background

Integrating industrial robots into the production facility to handle numerous manufacturing processes offers many benefits, including reducing operator hours and opportunities to increase throughput, boost yields, improve efficiency, and minimize downtime through insights gained from advanced data analytics. Almost all aspects are digitized, spanning machine control, monitoring, management, and data reporting and analysis. Even operators interact with machines digitally using a human-machine interface (HMI). For a robot to be capable of performing an application, it must first be programmed. Robotic teach pendants are the most common device used to program industrial robots. Industrial robots are best suited for performing repetitive tasks, making teach pendants ideal programming solutions as they are designed for teaching and repeat programming. Through this technique, operators safely program robots for specific application parameters and spare the harsh foundry environment. Hence, suitable for professional industries such as agrifood, healthcare, security, hazmat, nuclear, and advanced manufacturing.

Core products

- Winmate Customized Rugged Tablet
- Fanless Box PC

Main Challenges

- Big and bright touchscreen
- Ergonomic housing with safety elements
- One cable for various signal input

Why Winmate

- Ergonomic design with safety features
- Accurate and precise PCAP touch panel
- Customization and problem-solving solutions

“ EASILY USE AND SEE DEVELOPER FRIENDLY PROGRAMMING TOOLS. ”

Application: Winmate offers customization services to meet our customers' needs.

Application Story (Rugged Laptop)

Integrated Trucking Diagnostic and Repair

Background

Over the years, the trucking industry has evolved in operation, marketplace, technologies, etc. In the USA, the industry has seen its ups and downs during the year, affecting general manufacturing, business model, and growth.

Trucks are now being supplied with far better modern technology than ever in the past to meet the delivery demands. Some begin to integrate innovative technology to improve the vehicle's functionality, maintain and track their supply chain system, and increase customer trust by sharing the products' journey details.

So, when a truck breaks down, it only has minimal downtime. To reduce the number of fleets spent in the workshop, the vehicle dealerships should promptly carry out the 100% check of vehicles that pass through the workshop. One of the best solutions is to use optimal devices to digitalize the check sheets and information transfer.

Conventional business-class laptops were not up to the task, so the customer chose Winmate 14" Convertible Tough Laptop and 10.1" Tough Tablet Computers for their innovative automotive workshop.

Core Products

- L140TG-4 - 14" Convertible Rugged Laptop
- S101TG - 10.1" Tough Tablet

Main Challenges

- Sunlight readability.
- Use in extreme service environments
- High-performance CPU for stable performance
- Long-hour battery for whole-day work

Why Winmate

- Design for uninterrupted operation everywhere
- Device Versatility
- Greater Comfort with Faster Performance

“
**TOUTH TABELT
COMPUTERS
FOR INNOVATIVE
AUTOMOTIVE
WORKSHOP.**
”

Application: Convertible Rugged Laptop is ready to assist the onsite technicians

Application Story (Rugged Laptop)

Reduce Cost and Streamlines Automotive Service Bay

Background

The continuous failure of the customer-grade laptops for vehicle maintenance pushes technology dealers to search for more advanced and reliable solutions. The dealer technology management recognized that using consumer-grade devices added expenses for dealerships and manufacturers to purchase replacement devices regularly and lower service technician productivity.

Moreover, due to an oversaturation of vehicle providers, customers increasingly value brand behaviors and service ahead of their products. Thus, forcing the luxury automakers and their hundreds of dealer technology organizations to step up their aftersales service game. One is by providing a better mobile computing solution to keep the service technicians connected, capture critical customer vehicle maintenance data in real-time to meet customers' service expectations, and provide proactive service.

“

TOOLS AND DEVICES USED FOR MAINTENANCE MUST BE CAREFULLY SELECTED TO MAINTAIN A HIGH-QUALITY SERVICE, DEPENDABILITY, AND EFFICIENCY OVER THEIR EXTENSIVE DEALERSHIP NETWORK.

”

Core Products

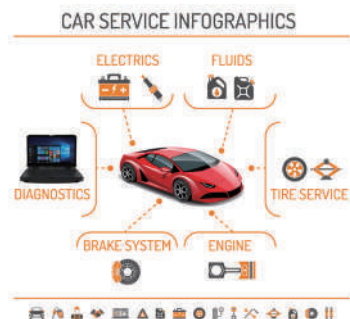

- Winmate L140TG-3: 13.3" Rugged Laptop

Main Challenges

- Superior mobile connectivity
- The rigorous environment of the factory floor
- Brand and products performance excellence

Why Winmate

- Enhanced compatibility with a vehicle system
- Quality Excellence in the automotive industry

Application: Vehicle Diagnostics

13.3"/14" Windows Rugged Laptop L140V2-3/ L140V2-4

“**COGNITIVE DOMINANCE

L140TG Series 13.3" or 14" CONVERTIBLE RUGGED LAPTOP

L140TG Rugged Laptop powered with Intel® Core™ Tiger Lake and Windows 10 IoT Enterprise operating system. The L140TG supports comprehensive wireless connectivity options such as WLAN, BT, GPS/GLONASS, and 4G LTE (optional) to keep workers connected in even the most remote locations. Also, it features a 14-inch daylight readable panel 1920 x 1080 with direct optical bonding, anti-glare treatment, and a user-friendly projective capacitive touch screen. L140TG series offers a new generation of compact and lightweight portability in a robust form factor.
