Introduction

Product Description

The MI956F Mini ITX motherboard is based on the latest Intel® QM67 chipset. The platform supports 2nd generation Intel® Core processor family with rPGA988B packing and features an integrated dual-channel DDR3 memory controller as well as a graphics core.

The latest Intel® processors provide advanced performance in both computing and graphics quality. This meets the requirement of customers in the gaming, POS, digital signage and server market segment.

The Intel® QM67 is made with 32 nanometer technology that supports Intel's first processor architecture to unite the CPU and the graphics core on the transistor level. The MI956F Mini ITX board utilizes the dramatic increase in performance provided by this Intel's latest cutting-edge technology. Measuring 170mm x 170mm, MI956F offers fast 6Gbps SATA support (2 ports), USB3.0 (2 ports) and interfaces for DVI-D, DVI-I, LVDS and HDMI displays. MI956AF features Intel Active Management Technology 7.0.

MI956F FEATURES:

- Supports Intel® 2nd Generation Core i7/i5/i3 QC/DC mobile processors
- Two DDR3 SoDIMM, 1066/1333MHz, Max. 8GB memory
- Dual Intel® PCI-Express Gigabit LAN
- Integrated Graphics for DVI-I, DVI-D/HDMI/LVDS displays
- 4x SATA 2.0, 2x SATA 3.0, 8x USB 2.0, USB 3.0 (2 ports), 4x COM, Watchdog timer
- 1x PCI-E (x16), 1x Mini PCI-E
- Optional AMT (MI956AF only)

Checklist

Your MI956 package should include the items listed below.

- The MI956 Mini-ITX motherboard
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- Serial ATA cable

MI956 Specifications

Product Name	MI956AF/MI956F
Form Factor	Mini-ITX
CPU Type	- Intel® 2 nd generation Core™ i7/i5/i3 QC/DC mobile processor - rPGA package, 37.5 x 37.5 mm - TDP: QC = 45W~ 55W/DC = 35W **Sandy Bridge CPU is <u>NOT</u> socket compatible with Arrandale
CPU Speed	Up to 2.7GHz
Cache	Up to 8MB
CPU Socket	rPGA 988B
Chipset	Intel® QM67 PCH; 25 x 27 mm package size
BIOS	AMI BIOS, support ACPI Function
Memory	Intel® 2 nd generation Core™ i7/i5/i3 QC/DC mobile processor integrated memory controller DDRIII 1067/1333 MHz - SO-DIMM x 2 (w/o ECC), Max. 8GB
VGA	- Intel® 2 nd generation Core™ i7/i5/i3 mobile processor integrated Gfx • DVI-I X 1 (thru Level shifter ASM1442) • DVI-D X 1 (thru Level shifter ASM1442) • HDMI X 1 (thru Level shifter ASM1442) • LVDS : DF13 x 2 for supporting dual channel 24-bit
LAN	1. Intel® Lewisville 82579LM GbE PHY [MI956AF only] or 82579V GbE PHY [MI956F only] 2. Intel® 82583V as 2 nd GbE
USB	USB <u>2.0</u> host controller, supports 8 ports w/ two EHCI, 7 UHCI controllers Integrated USB 2.0 Rate Matching Hub. - 4 ports in the rear panel - Others reserved for onboard pin header (4 ports, 2.54mm pitch) USB 3.0 host controller [ASMedia # ASM1042], support 2 ports - 2 ports in the rear panel
Serial ATA	Intel® QM67 PCH built-in SATA controller, supports total 6 ports 2 x SATA (3.0) 6Gbps+ 4 x SATA (2.0) 3Gbps ports (2 FIS based Port Multiplier)
Audio	Intel® QM67 PCH built-in High Definition Audio controller+ ALC892 w/ 7.1 CH
LPC I/O	Fintek F81865-1 (Ver. C) COM1 (RS232/422/485), COM2/COM3/COM4 (RS232), Hardware Monitor (2 thermal inputs, 4 voltage monitor inputs & 2 fan headers) [CPU FAN controllabl, but not the system fan] COM1/2 with pin-9 with power for 2 ports (500 mA for each port)
Digital IO	4 in & 4 out
IAMT(7.0)	Intel® QM67 PCH built-in (MI956AF only) - Intel® Active Management Technology ver. 7.0
Expansion Slots	- PCI-Express (16x) *1 [PEG] - Mini PCI-Express (1x) *1 @ Solder side [Reserved mounting holes for Half-sized also]
Edge Connector:	DVI-D + DVI-I stack connector; Dual DB9 stack connector for COM #1, #2 Dual USB(3.0) dual stack connector; HDMI stack connector Gbit LAN RJ-45 + dual USB(2.0) stack connector x2 RCA Jack 3x1 for HD Audio
Onboard Header/ Connector	2 ports x SATA III [Blue color]; 4 ports x SATA II 2x5 pin-header x2 for 4 ports USB; 2x5 pin-header for front panel audio 2x10 pin-header for COM3 (RS232) & COM4 (RS232) 2x5 pin-header for Digital IO; 4-pin box header for LCD backlight control
Watchdog Timer	Yes (256 segments, 0, 1, 2...255 sec/min)
System Voltage	ATX
Others	LAN Wakeup, EuP/ErP feature (Fintek F75160), UL 60950-1 2 nd Edition compatible
Board Size	170mm x 170mm

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the MI956 in order to set up a workable system. The topics covered are:

Installing the CPU.....	6
Installing the Memory	7
Setting the Jumpers.....	8
Connectors on MI956	12

Installing the CPU

The MI956 board supports rPGA988B socket for Intel® Sandy Bridge Dual Core mobile processors.

The processor socket comes with a screw to secure the processor. As shown in the left picture below, loosen the screw first before inserting the processor. Place the processor into the socket by making sure the notch on the corner of the CPU corresponds with the notch on the inside of the socket. Once the processor has slide into the socket, fasten the screw. Refer to the figures below.

NOTE: *Ensure that the CPU heat sink and the CPU top surface are in total contact to avoid CPU overheating problem that would cause your system to hang or be unstable.*

Installing the Memory

The MI956 board supports two DDR3 memory socket for a maximum total memory of 8GB in DDR3 SO-DIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on MI956 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on MI956 and their respective functions.

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction.....	22
BIOS Setup	22
Main BIOS Setup	23
Advanced Settings	24
Chipset Settings	37
Boot Settings.....	44
Security Settings.....	46
Save & Exit Settings.....	47

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

```
Press <DEL> or <F2> to Enter Setup
```

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Main BIOS Setup

This setup allows you to record some basic hardware configurations in your computer system and set the system clock.

Aptio Setup Utility – Copyright © 2010 American Megatrends, Inc.

					+ - Change Field
					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save & Exit
					ESC: Exit

Note: *If the system cannot boot after making and saving system changes with Setup, the AMI BIOS supports an override to the CMOS settings that resets your system to its default.*

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

System Date

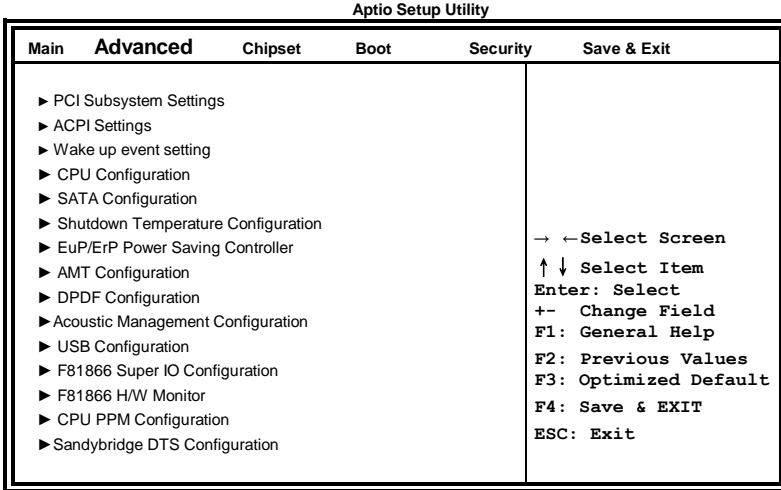

Set the Date. Use Tab to switch between Data elements.

System Time

Set the Time. Use Tab to switch between Data elements.

Advanced Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

REMARKS:

1.The Intel AMT Configuration is available only on MI956AF, not MI956F.

2.The EuP/ErP Power Saving Controller is available only on MI956F, not MI956AF.

PCI Subsystem Settings

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
	PCI Bus Driver Version		V 2.0502		
	PCI 64bit Resources Handing				→ ← Select Screen
	Above 4G Decoding		Disabled		↑ ↓ Select Item

	PERR# Generation		Disabled		F2: Previous Values
	SERR# Generation		Disabled		F3: Optimized Default
	▶ PCI Express Settings				F4: Save ESC: Exit

Above 4G Decoding

Enables or Disables 64bit capable devices to be decoded in above 4G address space (only if system supports 64 bit PCI decoding).

PCI Latency Timer

Value to be programmed into PCI Latency Timer Register.

VGA Palette Snoop

Enables or disables VGA Palette Registers Snooping.

PERR# Generation

Enables or disables PCI device to generate PERR#.

SERR# Generation

Enables or disables PCI device to generate SERR#.

PCI Express Settings

Change PCI Express devices settings.

PCI Express Settings

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit	
PCI Express Device Register Settings						
Relaxed Ordering			Disabled		→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	
Extended Tag			Disabled			
No Snoop			Enabled			
Maximum Payload			Auto			
Maximum Read Request			Auto			
PCI Express Link Register Settings						
ASPM Support			Disabled			
WARNING: Enabling ASPM may cause some PCI-E devices to fail			Disabled			
Extended Synch			Disabled			
Link Training Retry			5			
Link Training Timeout (uS)			100			
Unpopulated Links			Keep Link ON			

Relaxed Ordering

Enables or disables PCI Express Device Relaxed Ordering.

Extended Tag

If ENABLED allows device to use 8-bit Tag field as a requester.

No Snoop

Enables or disables PCI Express Device No Snoop option.

Maximum Payload

Set Maximum Payload of PCI Express Device or allow System BIOS to select the value.

Maximum Read Request

Set Maximum Read Request Size of PCI Express Device or allow System BIOS to select the value.

ASPM Support

Set the ASPM Level: Force L0s – Force all links to L0s State:
AUTO – BIOS auto configure : DISABLE – Disables ASPM.

Extended Synch

If ENABLED allows generation of Extended Synchronization patterns.

Link Training Retry

Defines number of Retry Attempts software will take to retrain the link if previous training attempt was unsuccessful.

Link Training Timeout (uS)

Defines number of Microseconds software will wait before polling 'Link Training' bit in Link Status register. Value range from 10 to 1000 uS.

Unpopulated Links

In order to save power, software will disable unpopulated PCI Express links, if this option set to 'Disable Link'.

ACPI Settings

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
ACPI Settings					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

Standby Power on S5			All Enable		[Enable] Provide the Standby Power for devices. [Disable] Shutdown the standby power.

AMT Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Intel AMT			Enabled		→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
BIOS Hotkey Pressed			Disabled		
MEBx Selection Screen			Disabled		
Hide Un-Configure ME Confirmation			Disabled		
Un-Configure ME			Disabled		
Amt Wait Timer			0		
Activate Remote Assistance Process			Disabled		
USB Configure			Enabled		
PET Progress			Enabled		
AMT CIRA Timeout			0		
Watchdog			Disabled		
OS Timer			0		
BIOS Timer			0		

Intel AMT

This configuration is supported only with MI956AF (with iAMT function). Options are Enabled and Disabled.

Note: iAMT H/W is always enabled. This option just controls the BIOS extension execution. If enabled, this requires additional firmware in the SPI device.

Unconfigure ME

This configuration is supported only with MI956AF (with iAMT function). Perform AMT/ME unconfigure without password operation.

Amt Wait Timer

Set timer to wait before sending ASF_GET_BOOT_OPTIONS.

Activate Remote Assistance Process

Trigger CIRA boot.

PET Progress

User can Enable/Disable PET Events progress to receive PET events or not.

Watchdog Timer

This configuration is supported only with MI956AF (with iAMT function). Enable/Disable Watchdog Timer.

DPTF Configuration

Main	Advanced	Chipset	Boot	Security	Save & Exit
	DPTF Configuration				
	DPTF		Disabled		Enable/Disable intel Dynamic Platform Thermal Framework.

Acoustic Management Configuration

Aptio Setup Utility

Acoustic Management Configuration					
Acoustic Management			Disabled		
				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	

USB Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration					
USB Devices: 2 Hubs					
Legacy USB Support			Enabled		
USB3.0 Support			Enabled		
XHCI Hand-off			Enabled		
EHCI Hand-off			Enabled		
USB hardware delays and time-outs:					
USB Transfer time-out			20 sec		
Device reset time-out			20 sec		
Device power-up delay			Auto		
				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

USB3.0 Support

Enable/Disable USB3.0 (XHCI) Controller support.

XHCI Hand-off

This is a workaround for Oses without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

Enabled/Disabled. This is a workaround for OSES without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

F81865 Super IO Configuration

Aptio Setup Utility

INT19 Trap Response			Immediate		+ - Change Field
Boot Option Priorities					F1: General Help
▶ CSM parameters					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

Setup Prompt Timeout

Number of seconds to wait for setup activation key.

65535(0xFFFF) means indefinite waiting.

Bootup NumLock State

Select the keyboard NumLock state.

Quiet Boot

Enables/Disables Quiet Boot option.

Fast Boot

Enables/Disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

GateA20 Active

UPON REQUEST – GA20 can be disabled using BIOS services.

ALWAYS – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.

Option ROM Messages

Set display mode for Option ROM. Options: Force BIOS and Keep Current.

INT19 Trap Response

Enable: Allows Option ROMs to trap Int 19.

Boot Option Priorities

Sets the system boot order.

CSM parameters

This section allows you to configure the boot settings.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
			Launch CSM	Always	
			Boot option filter	UEFI and Legacy	
			Launch PXE OpROM policy	Do not launch	
			Launch Storage OpROM policy	Legacy only	
			Launch Video OpROM policy	Legacy only	
			Other PCI device ROM priority	Legacy OpROM	
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

Boot option filter

This option controls what devices system can boot to.

Launch PXE OpROM policy

Controls the execution of UEFI and Legacy PXE OpROM.

Launch Storage OpROM policy

Controls the execution of UEFI and Legacy Storage OpROM.

Launch Video OpROM policy

Controls the execution of UEFI and Legacy Video OpROM.

Other PCI device ROM priority

For PCI devices other than Network, Mass storage or Video defines which OpROM to launch.

Security Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

This page is intentionally left blank.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	50
VGA Drivers Installation	53
Realtek HD Audio Driver Installation	56
LAN Drivers Installation.....	58
Intel® Management Engine Interface	62
ASMedia USB 3.0 Drivers.....	65

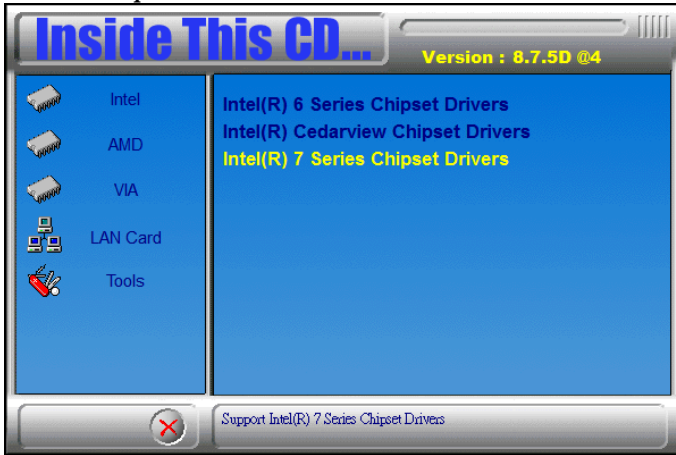

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) 7 Series Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

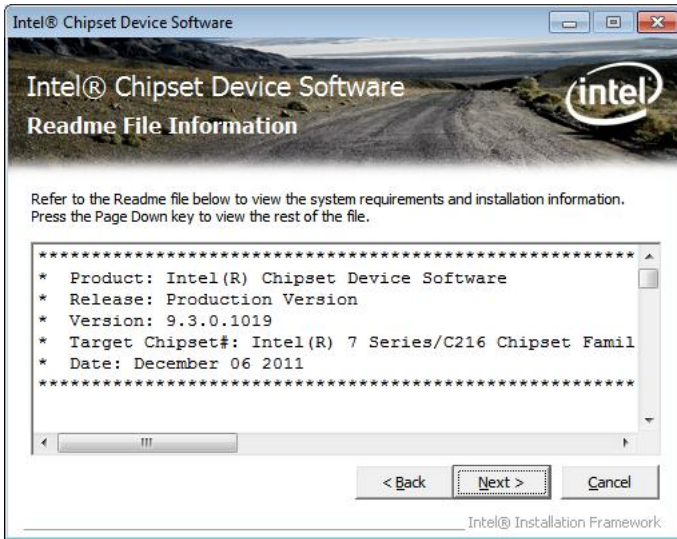

- When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.

- Click **Yes** to accept the software license agreement and proceed with the installation process.

5. On the Readme File Information screen, click *Next* to continue the installation.

6. The Setup process is now complete. Click *Finish* to restart the computer and for changes to take effect.

VGA Drivers Installation

NOTE: Before installing the *Intel(R) Q77 Chipset Family Graphics Driver*, the Microsoft .NET Framework 3.5 SPI should be first installed.

To install the VGA drivers, follow the steps below.

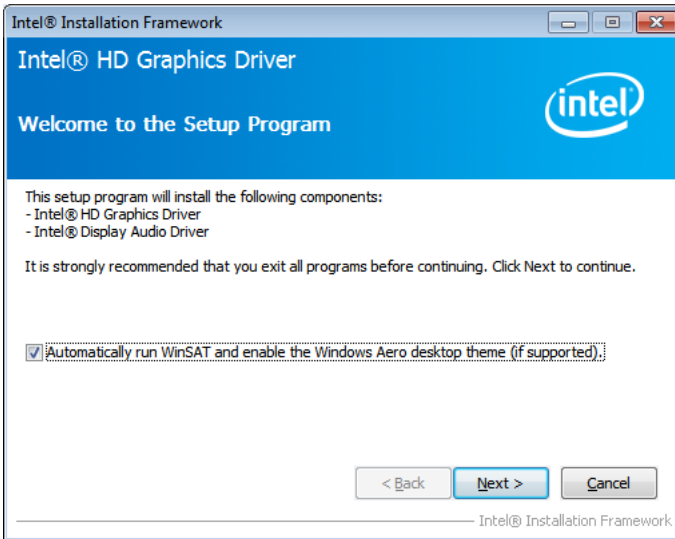

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) Q7 Series Chipset Drivers*.

2. Click *Intel(R) Q77 Chipset Family Graphics Driver*.

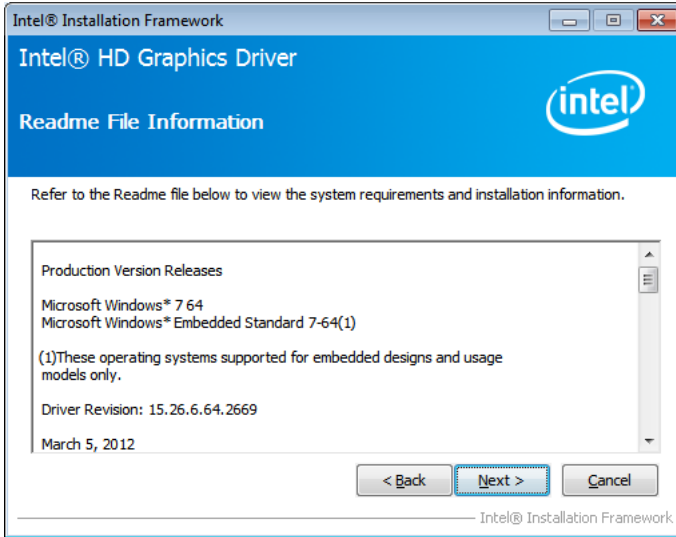

3. When the Welcome screen appears, click *Next* to continue.

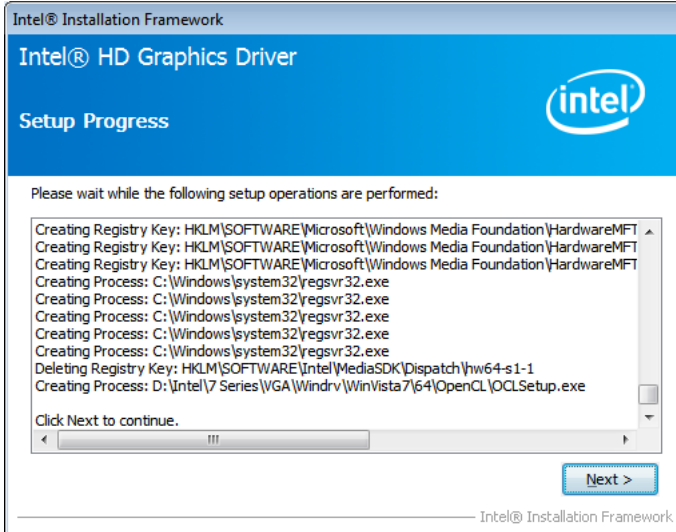

4. Click *Yes* to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click *Next* to continue the installation of the Intel® Graphics Media Accelerator Driver.

6. On Setup Progress screen, click *Next* to continue.

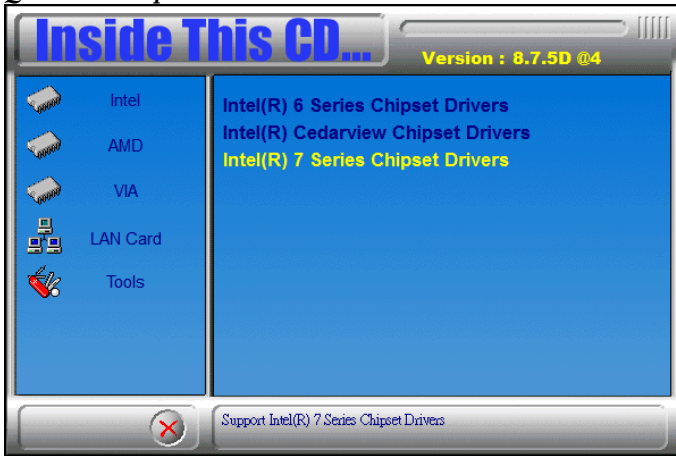

7. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

Follow the steps below to install the Realtek HD Audio Drivers.

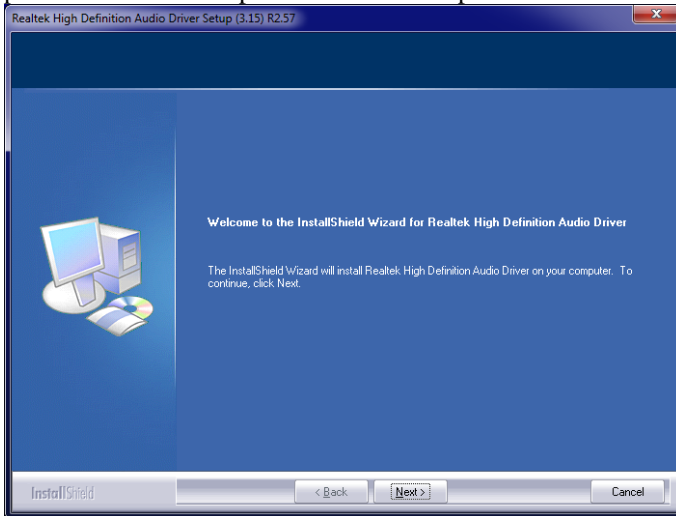

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) O7 Series Chipset Drivers*.

2. Click *Realtek High Definition Audio Driver*.

3. On the Welcome to the InstallShield Wizard screen, click *Next* to proceed with and complete the installation process.

4. The InstallShield Wizard Complete. Click *Finish* to restart the computer and for changes to take effect.

LAN Drivers Installation

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) 7 Series Chipset Drivers*.

2. Click *Intel(R) PRO LAN Network Driver*.

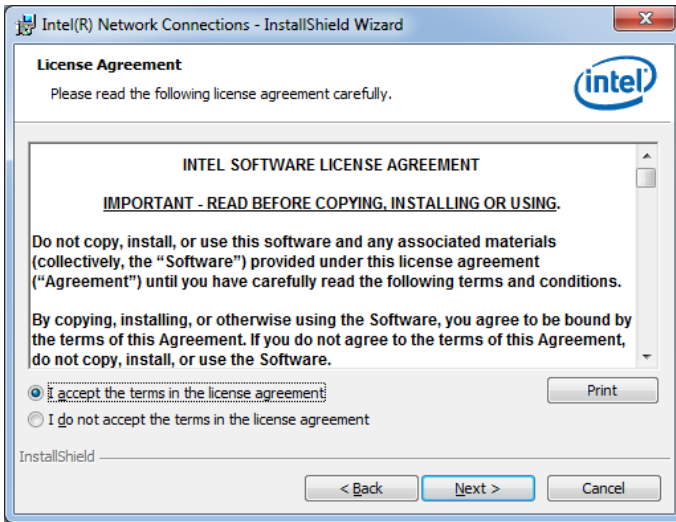

3. Click **Install Drivers and Software**.

4. When the Welcome screen appears, click **Next**.

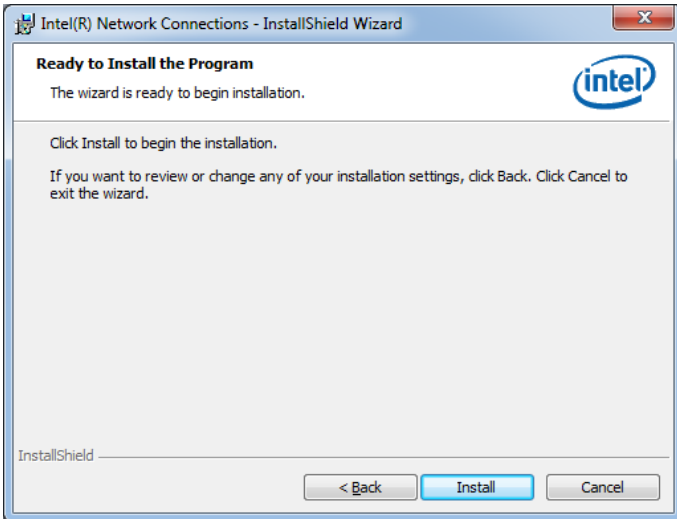

5. Click *Next* to to agree with the license agreement.

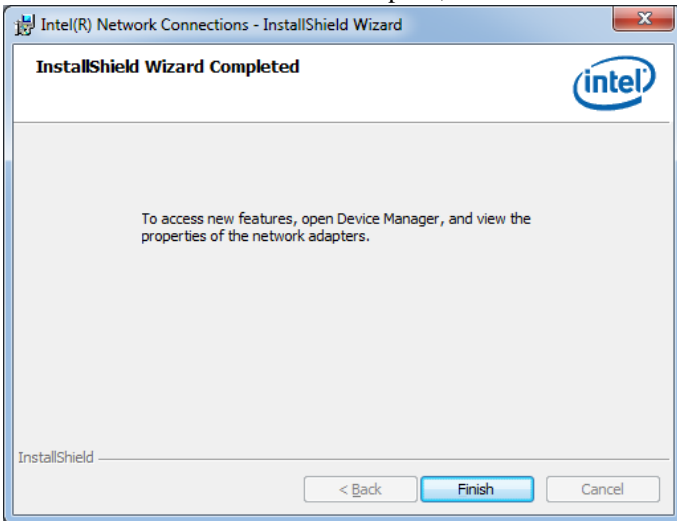

6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click *Next* to continue.

7. The wizard is ready to begin installation. Click **Install** to begin the installation.

8. When InstallShield Wizard is complete, click **Finish**.

Intel® Management Engine Interface

REMARKS: The Intel iAMT 8.0 Drivers can be installed on MI956AF, not MI956F.

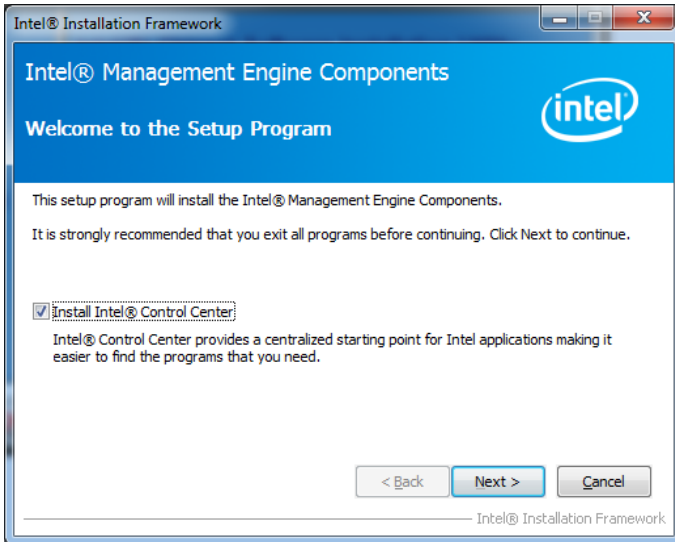

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

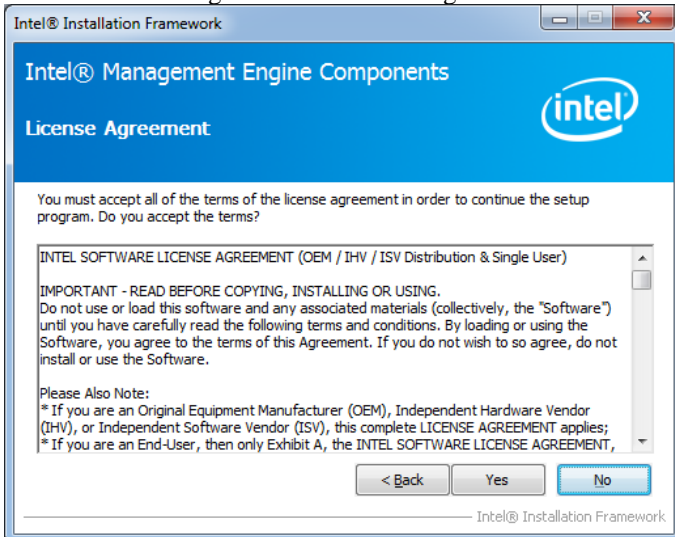

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) AMT 8.0 Drivers*.

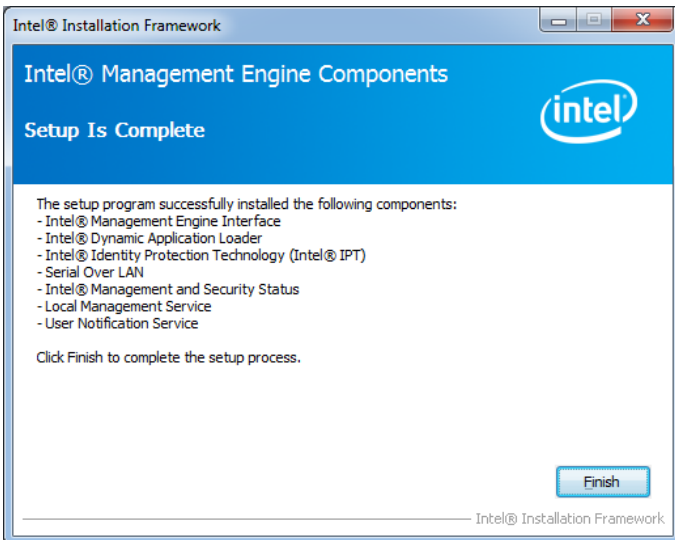

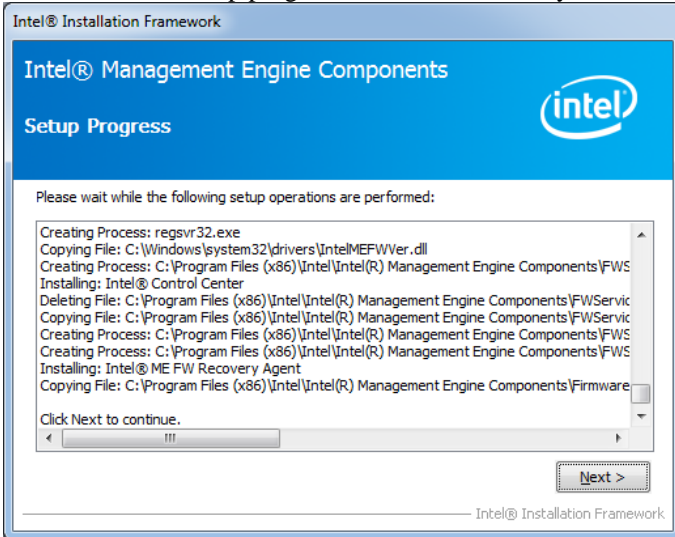

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click the checkbox for **Install Intel® Control Center** & click **Next**.

3. Click **Yes** to to agree with the license agreement.

4. When the Setup Progress screen appears, click *Next*. Then, click *Finish* when the setup progress has been successfully installed.

ASMedia USB 3.0 Drivers

1. Insert the CD that comes with the board. Click *Intel* and then *Intel(R) 6 Series Chipset Drivers*.
2. Click *Intel(R) PRO LAN Network Driver*.

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click *Next*.

3. When InstallShield Wizard is complete, click *Finish*.

This page is intentionally left blank.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
000h - 01Fh	DMA Controller #1
020h - 03Fh	Interrupt Controller #1
040h - 05Fh	Timer
060h - 06Fh	Keyboard Controller
070h - 07Fh	Real Time Clock, NMI
080h - 09Fh	DMA Page Register
0A0h - 0BFh	Interrupt Controller #2
0C0h - 0DFh	DMA Controller #2
0F0h	Clear Math Coprocessor Busy Signal
0F1h	Reset Math Coprocessor
1F0h - 1F7h	IDE Interface
278h - 27Fh	Parallel Port #2(LPT2)
2E8h - 2EFh	Serial Port #4(COM4)
2F8h - 2FFh	Serial Port #2(COM2)
2B0h- 2DFh	Graphics adapter Controller
360h - 36Fh	Network Ports
3B0h - 3BFh	Monochrome & Printer adapter
3C0h - 3CFh	EGA adapter
3D0h - 3DFh	CGA adapter
3E8h - 3EFh	Serial Port #3(COM3)
3F8h - 3FFh	Serial Port #1(COM1)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer Output
IRQ1	Keyboard
IRQ2	Interrupt Cascade
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ5	Reserved
IRQ6	Reserved
IRQ7	Reserved
IRQ8	Real Time Clock
IRQ9	Reserved
IRQ10	Serial Port #3
IRQ11	Serial Port #4
IRQ12	PS/2 Mouse
IRQ13	80287
IRQ14	Primary IDE
IRQ15	Secondary IDE

C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
