1. Product Overview

1.1 Introduction of Innodisk SATA Slim 3MG2-P

Innodisk SATA Slim 3MG2-P provides a totally brand new highly cost-effective SSD solution with good performance and longer lifespan. Customer can pay much less than SLC flash but embrace longer life and performance than current MLC flash IC based SSD solution. SATA Slim 3MG2-P is a perfect substitute for traditional HDD, which are applied with an evolved L2 Wear Leveling Architecture, and significantly improves SSD random data transfer rate and lifespan. Furthermore, SATA Slim 3MG2-P supports TRIM for windows 7, it can improves performance when deleting files. SATA Slim 3MG2-P provides high capacity flash memory within JEDEC MO-297 spec., which electrically compatible with Serial ATA (SATA) standard, and supports SATA III standard (6.0GHz) with high performance. It has good performance; no latency time and small seek time. It effectively reduces the booting time of operation system and the power consumption is less than hard disk drive (HDD).

1.2 Product View and Models

Innodisk SATA Slim 3MG2-P is available in follow capacities within MLC flash ICs.

SATA Slim 3MG2-P 08GB
SATA Slim 3MG2-P 16GB
SATA Slim 3MG2-P 32GB
SATA Slim 3MG2-P 64GB
SATA Slim 3MG2-P 128GB
SATA Slim 3MG2-P 256GB
SATA Slim 3MG2-P 512GB

1.3 SATA Interface

SATA Slim 3MG2-P supports SATA III interface, and backward compliant with Serial ATA Gen 1, Gen 2 and Gen 3 specification (Gen 3 supports 1.5Gbps /3.0Gbps/6.0Gbps data rate)..

1.4 Capacity

Innodisk SATA Slim 3MG2-P provides unformatted 8GB, 16GB, 32GB, 64GB, 128GB, 256GB and 512GB capacities within MLC Flash IC.

1.5 MO-297 Form Factor

SATA Slim 3MG2-P has a compact design 54.0mm (W) x 39.0mm (L) x 4.0mm (H) without metal material case, and is easy for installation.

2. Product Specifications

2.1 Capacity and Device Parameters

SATA Slim 3MG2-P device parameters are shown in Table 1.

2.4.4 Mean Time between Failures (MTBF)

Table 7 summarizes the MTBF prediction results for various SATA Slim 3MG2-P configurations. The analysis was performed using a RAM Commander™ failure rate prediction.

- **Failure Rate**: The total number of failures within an item population, divided by the total number of life units expended by that population, during a particular measurement interval under stated condition.
- **Mean Time between Failures (MTBF)**: A basic measure of reliability for repairable items: The mean number of life units during which all parts of the item perform within their specified limits, during a particular measurement interval under stated conditions.

2.8 Transfer Mode

SATA Slim 3MG2-P support following transfer mode:

Serial ATA III 6.0Gbps

Serial ATA II 3.0Gbps

Serial ATA I 1.5Gbps

2.9 Pin Assignment

Innodisk SATA Slim 3MG2-P uses a standard SATA pin-out. See Table 8 for SATA Slim 3MG2-P pin assignment.

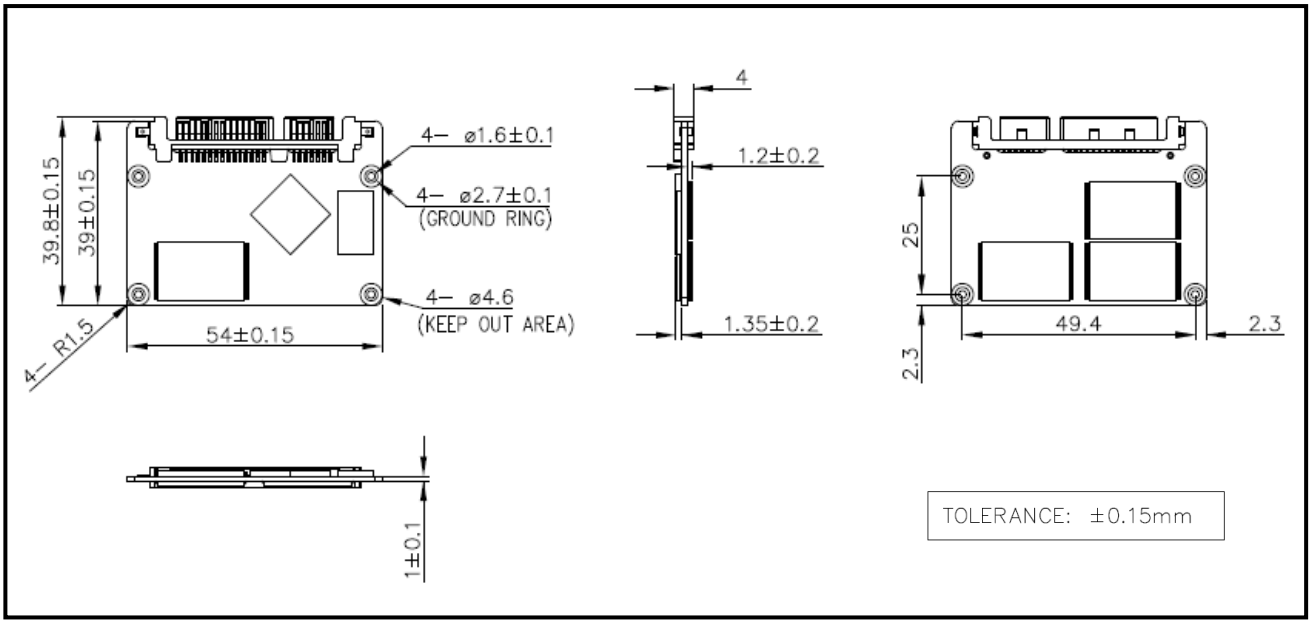
2.10 Mechanical Dimensions



2.11 Assembly Weight

An Innodisk SATA Slim 3MG2-P within MLC flash ICs, 32GB's weight is 40 grams approx. The total weight of SSD will be less than 50 grams.

2.12 Seek Time

Innodisk SATA Slim 3MG2-P is not a magnetic rotating design. There is no seek or rotational latency required.

2.13 Hot Plug

The SSD support hot plug function and can be removed or plugged-in during operation. User has to avoid hot plugging the SSD which is configured as boot device and installed operation system.

Surprise hot plug : The insertion of a SATA device into a backplane (combine signal and power) that has power present. The device powers up and initiates an OOB sequence.

Surprise hot removal: The removal of a SATA device from a powered backplane, without first being placed in a quiescent state.

2.14 NAND Flash Memory

Innodisk SATA Slim 3MG2-P uses Multi Level Cell (MLC) NAND flash memory, which is non-volatility, high reliability which has 3,000 program/erase times and high speed memory storage.

3. Theory of Operation

3.1 Overview

Figure 2 shows the operation of Innodisk SATA Slim 3MG2-P from the system level, including the major hardware blocks.

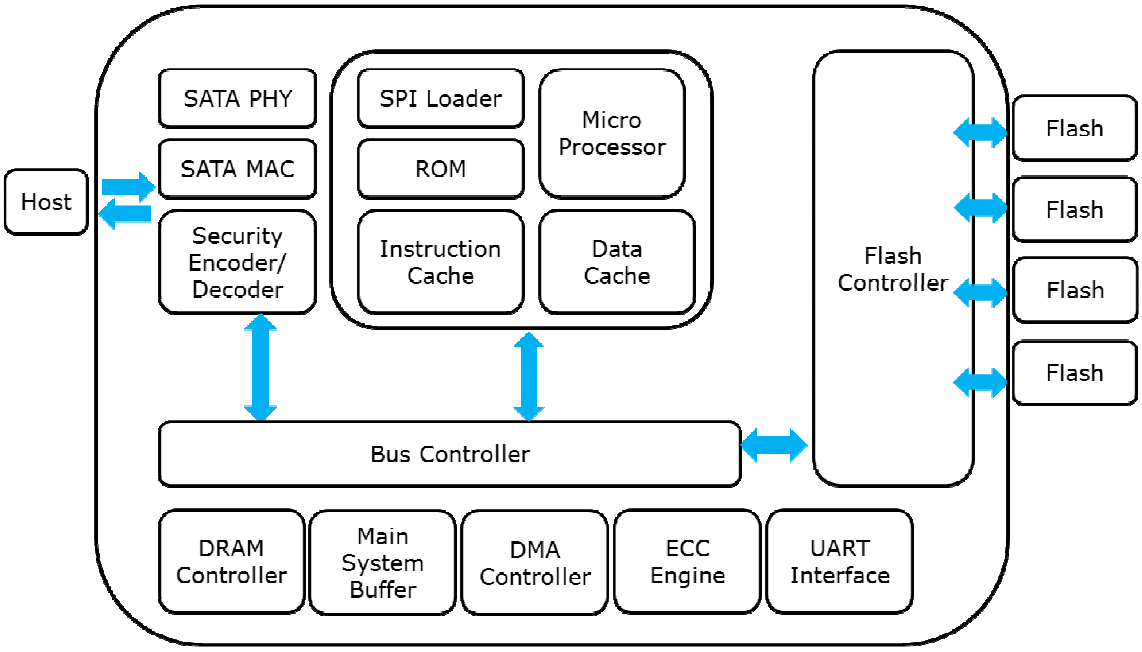


Figure 2: Innodisk SATA Slim 3MG2-P Block Diagram

Innodisk 2 SATA Slim 3MG2-P integrates a SATA III controller and NAND flash memories. Communication with the host occurs through the host interface, using the standard ATA protocol. Communication with the flash device(s) occurs through the flash interface.

3.2 SATA III Controller

Innodisk SATA Slim 3MG2-P is designed with ID 201, a SATA III 6.0Gbps (Gen. 3) controller, which supports external DDDR3 DRAM. The Serial ATA physical, link and transport layers are compliant with Serial ATA Gen 1, Gen 2 and Gen 3 specification (Gen 3 supports 1.5Gbps/3.0Gbps/6.0Gbps data rate). The controller has 4 channels for flash interface.

3.3 Error Detection and Correction

Highly sophisticated Error Correction Code algorithms are implemented. The ECC unit consists of the Parity Unit (parity-byte generation) and the Syndrome Unit (syndrome-byte computation). This unit implements an algorithm that can correct 66 bits per 1024 bytes in an ECC block. Code-byte generation during write operations, as well as error detection during read operation, is implemented on the fly without any speed penalties.

3.4 Wear-Leveling

Flash memory can be erased within a limited number of times. This number is called the ***erase cycle limit*** or ***write endurance limit*** and is defined by the flash array vendor. The erase cycle limit applies to each individual erase block in the flash device.

Innodisk SATA Slim 3MG2-P uses a static wear-leveling algorithm to ensure that consecutive writes of a specific sector are not written physically to the same page/block in the flash. This spreads flash media usage evenly across all pages, thereby extending flash lifetime.

3.5 Bad Blocks Management

Bad Blocks are blocks that contain one or more invalid bits whose reliability are not guaranteed. The Bad Blocks may be presented while the SSD is shipped, or may develop during the life time of the SSD. When the Bad Blocks is detected, it will be flagged, and not be used anymore. The SSD implement Bad Blocks management, Bad Blocks replacement, Error Correct Code to avoid data error occurred. The functions will be enabled automatically to transfer data from Bad Blocks to spare blocks, and correct error bit.

3.6 iData Guard

Innodisk's iData Guard is a comprehensive data protection mechanism that functions before and after a sudden power outage to SSD. Low-power detection terminates data writing before an abnormal power-off, while table-remapping after power-on deletes corrupt data and maintains data integrity. Innodisk's iData Guard provides effective power cycling management, preventing data stored in flash from degrading with use.

3.7 Garbage Collection/TRIM

Garbage collection and TRIM technology is used to maintain data consistency and perform continual data cleansing on SSDs. It runs as a background process, freeing up valuable controller resources while sorting good data into available blocks, and deleting bad blocks. It also significantly reduces write operations to the drive, thereby increasing the SSD's speed and lifespan.

3.8 QEraser Function (Optional)

QEraser function is designed for emergency data erase in few seconds by providing ATA command.

3.8.1 QEraser Command FAh-66h

Use to erase data blocks. When the command is issued, the flash is erased immediately. This command causes the SSD to erase all user data blocks, including any reallocated blocks, while retaining all other system data and bad block information.

4. Installation Requirements

4.1 SATA Slim 3MG2-P Pin Directions

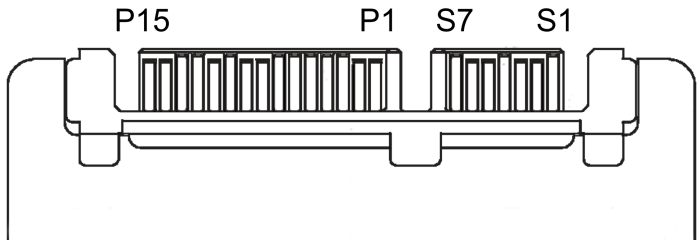

Figure 3: Signal Segment and Power Segment

4.2 Electrical Connections for SATA Slim 3MG2-P

A Serial ATA device may be either directly connected to a host or connected to a host through a cable. For connection via cable, the cable should be no longer than 1meter. The SATA interface has a separate connector for the power supply. Please refer to the pin description for further details.

Additionally, Innodisk SATA Slim 3MG2-P provides LED signals which indicate power with red light, and DAS for green light.

4.3 Device Drive

No additional device drives are required. Innodisk SATA Slim 3MG2-P can be configured as a boot device.

5. SMART Feature Set

Innodisk 3MG2-P support the SMART command set and defines some vendor-specific data to report SMART attributes of SSD.

Value	Command
D0h	Read Data
D1h	Read Attribute Threshold
D2h	Enable/Disable Autosave
