1

Introduction

1.1 Introduction

Figure 1-1: NANO-EHL

The NANO-EHL is a EPIC industrial motherboard equipped with an Intel® Celeron® J6412 quad-core Elkhart Lake processor, turbo up-to 2.60 GHz with 1.5M cache, and onboard LPDDR4x-3200MHz with 8 GB memory, up to 16GB.

The NANO-EHL includes a HDMI1.4 (up to 4096 x 2160@30Hz) connector, a DP1.4 (up to 4096 x 2160 @60Hz) connector and one IEI iDPM slot for triple independent display.

Expansion and I/O include one M.2 A-key slot for Wi-Fi or Bluetooth expansions, one M.2 B-key slot for 5G module or NVMe storage expansions, and one PCIe x4 slot with x2 signal for installing riser card. Two USB 3.2 Gen 2 and two USB 2.0 connectors are provided on the rear panel, two USB 2.0 connectors by pin header. One iSATA and one SATA 6Gb/s connectors are also included for connecting with storage devices. Serial device connectivity is provided by internal two RS-232/422/485 and four RS-232 pin header. Two RJ-45 2.5 GbE connectors provide the system with smooth connections to an external LAN.

NANO-EHL SBC

1.2 Features

Some of the NANO-EHL motherboard features are listed below:

- 10nm Intel® Celeron® J6412 on-board SoC, 4 cores and 4 threads, base frequency 2.00GHz, turbo frequency up to 2.60GHz, 1.5MB cache
- Two Intel® I225V 2.5GbE ports
- Two USB 3.2 Gen 2, four USB 2.0, two RS-232/422/485, four RS-232
- M.2 A key, M.2 B key and PCIe x4 slot (x2 signal) expansions
- Support triple independent display via HDMI, DP and IEI iDPM

1.3 Connectors

The connectors on the NANO-EHL are shown in the figure below.

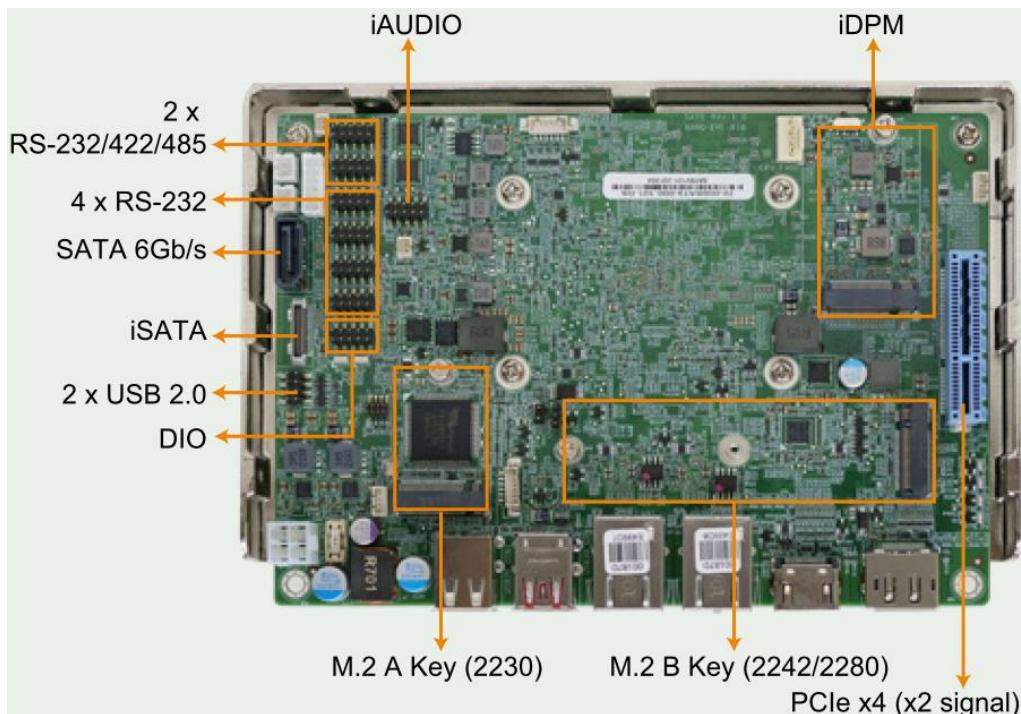

Figure 1-2: Connectors

1.4 Dimensions

The dimensions of the board are listed below:

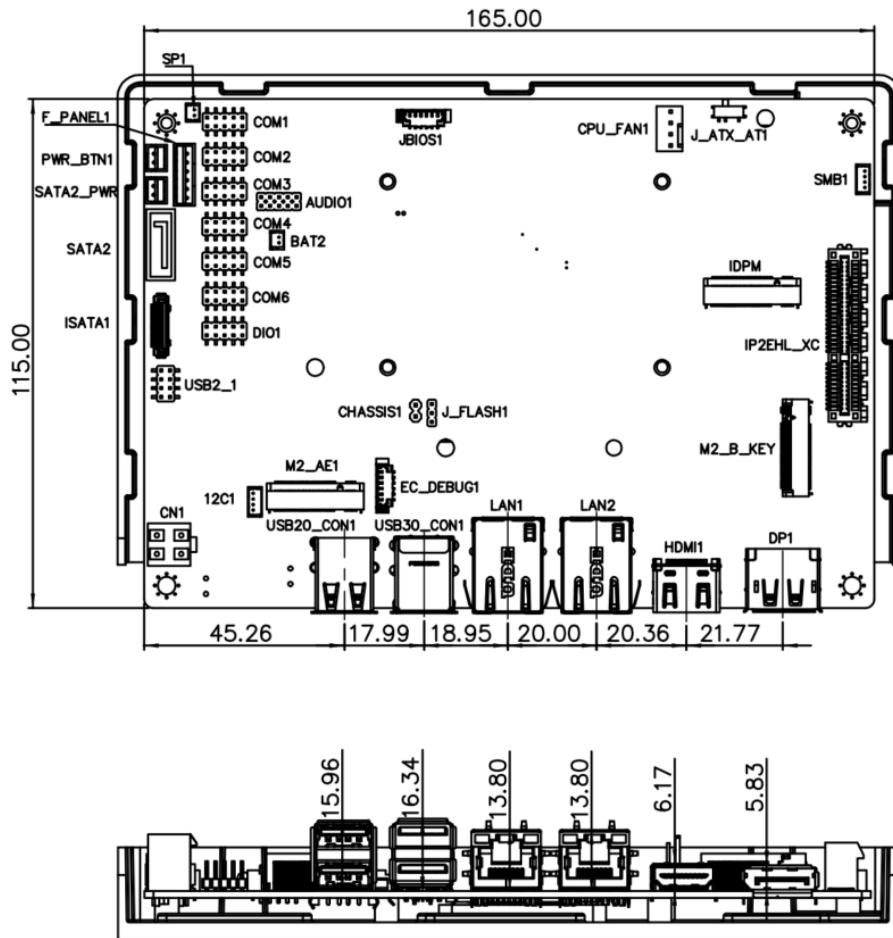

Figure 1-3: Dimensions (mm)

NANO-EHL SBC

1.5 Data Flow

Shows the data flow between the system chipset, the CPU and other components installed on the motherboard.

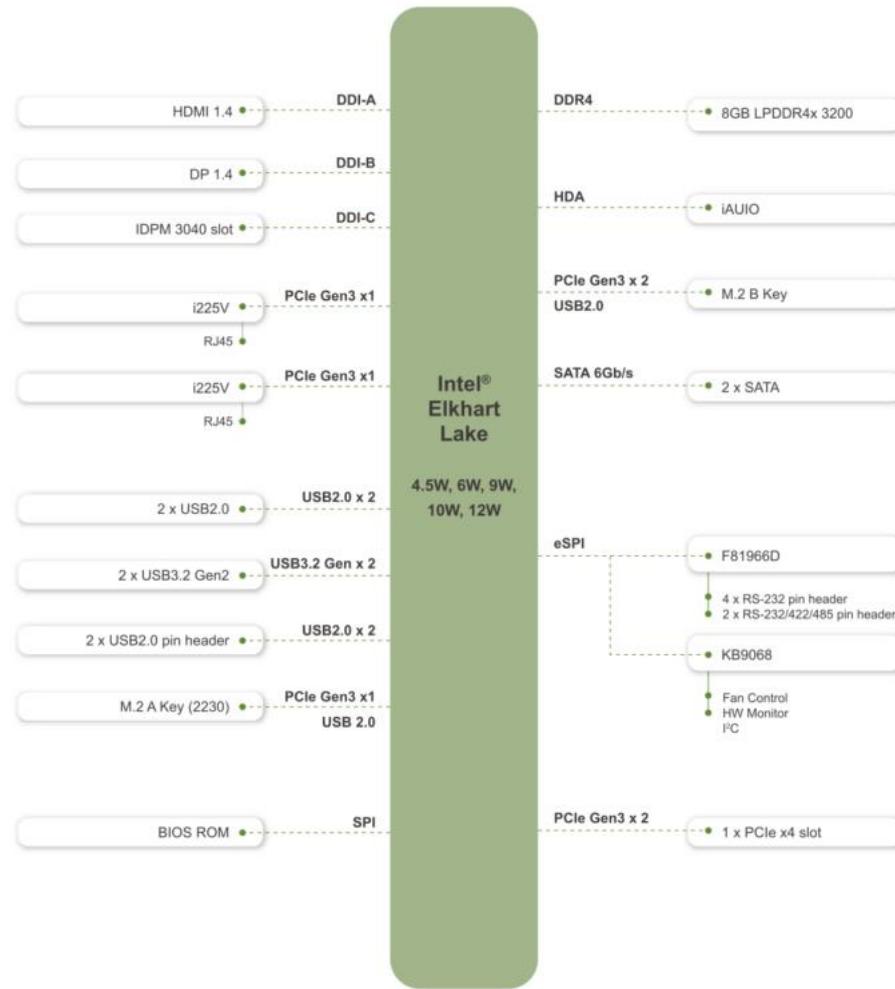

Figure 1-4: Data Flow Diagram

1.6 Technical Specifications

NANO-EHL technical specifications are listed below.

Specification	NANO-EHL
SoC	Onboard Intel® Atom® x6000 series / Pentium® / Celeron® processor (Elkhart Lake platform) Intel® Celeron® J6412 on-board SoC (up to 2.6GHz, quad-core, 1.5M Cache, TDP=10W)
BIOS	AMI UEFI BIOS
Memory	On-board LPDDR4x 3200 MHz 8GB, up to 16 GB
Graphics	Intel® UHD Graphics
Display Output	Triple independent display 1 x HDMI 1.4 (up to 4096 x 2160@30Hz) 1 x DP 1.4 (up to 4096 x 2160 @ 60Hz) 1 x IEI iDPM 3040 slot (only for IEI eDP/LVDS/VGA module)
Ethernet	LAN1: Intel® I225V 2.5GbE LAN2: Intel® I225V 2.5GbE
Digital I/O	8-bit digital I/O by 10-pin (2x5) header
Embedded Controller	ENE KB9068
Watchdog Timer	Software programmable support 1~255 sec. system reset
I/O Interface	
Audio Connector	1 x iAUDIO supports IEI AC-KIT-888S Audio Kit (2x5 pin)
Serial Ports	2 x RS-232/422/485 by 10-pin header (2x5 pin, P=2.0) 4 x RS-232 by 10-pin header (2x5 pin, P=2.0)
USB Ports	2 x USB 3.2 Gen 2 (10Gb/s) on rear I/O 2 x USB 2.0 on rear I/O 2 x USB 2.0 by 8-pin (2x4 pin, P=2.0) header
Front Panel	1 x Power LED and HDD LED connector by 6-pin (1x6) wafer 1 x Power button connector by 2-pin wafer 1 x Reset button connector by switch

NANO-EHL SBC

Specification	NANO-EHL
Fan	1 x System smart fan connector by 4-pin (1x4) wafer
SMBus/I²C	1 x I ² C connector by 4-pin (1x4) wafer 1 x SMBus connector by 4-pin (1x4) wafer
Storage	1 x SATA 6Gb/s with 5V SATA power connector 1 x iSATA
Expansions	1 x M.2 2230 A key (PCIe Gen3 x1, USB 2.0) 1 x M.2 2242/2280 B key w/ SIM holder (PCIe Gen3 x2, USB 2.0) 1 x PCIe Gen3 x4 (x2 signal) (x2 or x1+x1)
Environmental and Power Specifications	
Power Supply	12 V DC input only (AT/ATX support)
Power Connector	1 x Internal power connector by 4-pin (2x2) connector
Power Consumption	12V@2.75A (Intel® Celeron® J6412 CPU with 8 GB 3200 MHz LPDDR4x memory, max. loading, EuP mode disabled)
Operating Temperature	0°C ~ 60°C
Storage Temperature	-20°C ~ 70°C
Humidity	5% ~ 95%, non-condensing
Physical Specifications	
Dimensions	115mm x 165mm
Weight GW/NW	GW:850g / NW:350g

Table 1-1: Technical Specifications

Unpacking

2.1 Anti-static Precautions

WARNING!

Static electricity can destroy certain electronics. Make sure to follow the ESD precautions to prevent damage to the product, and injury to the user.

Make sure to adhere to the following guidelines:

- **Wear an anti-static wristband:** Wearing an anti-static wristband can prevent electrostatic discharge.
- **Self-grounding:** Touch a grounded conductor every few minutes to discharge any excess static buildup.
- **Use an anti-static pad:** When configuring any circuit board, place it on an anti-static mat.
- **Only handle the edges of the PCB:** Don't touch the surface of the motherboard. Hold the motherboard by the edges when handling.

2.2 Unpacking Precautions

When the NANO-EHL is unpacked, please do the following:

- Follow the antistatic guidelines above.
- Make sure the packing box is facing upwards when opening.
- Make sure all the packing list items are present.

2.3 Packing List

NOTE:

If any of the components listed in the checklist below are missing, do not proceed with the installation. Contact the IEI reseller or vendor the NANO-EHL was purchased from or contact an IEI sales representative directly by sending an email to sales@ieiworld.com.

The NANO-EHL is shipped with the following components:

Quantity	Item and Part Number	Image
1	NANO-EHL single board computer	
1	Power cable	
1	SATA with power cable kit	
1	iSATA cable	

NANO-EHL SBC

1	Quick Installation Guide	
---	--------------------------	---

Table 2-1: Packing List

The following are optional components which may be separately purchased:

Item and Part Number	Image
Dual-port USB 2.0 cable, 210mm, P=2.0 (P/N : CB-USB02A-RS)	
RS-232 cable, 200 mm, p=2.0 (P/N : 32205-002700-200-RS)	
Audio kit, 7.1 Channel (P/N: AC-KIT-888S-R10)	
PCIe x2 to two PCIe x1 riser card for NANO on the left side (P/N: NWR-L2S-N-R10)	
PCIe x2 to two PCIe x1 riser card for NANO on the right side (P/N: NWR-R2S-N-R10)	
eDP to eDP DisplayPort converter board (for IEI iDPM connector) (P/N: iDPM-eDP-R10)	

eDP to LVDS DisplayPort converter board (for IEI iDPM connector) (P/N: iDPM-LVDS-R10)	
eDP to VGA Conneter converter board (For IEI Display Module) (P/N: iDPM-VGA-R10)	

Table 2-2: Optional Items

Connectors

3.1 Peripheral Interface Connectors

This chapter details all the jumpers and connectors.

3.1.1 NANO-EHL Layout

The figures below show all the connectors and jumpers.

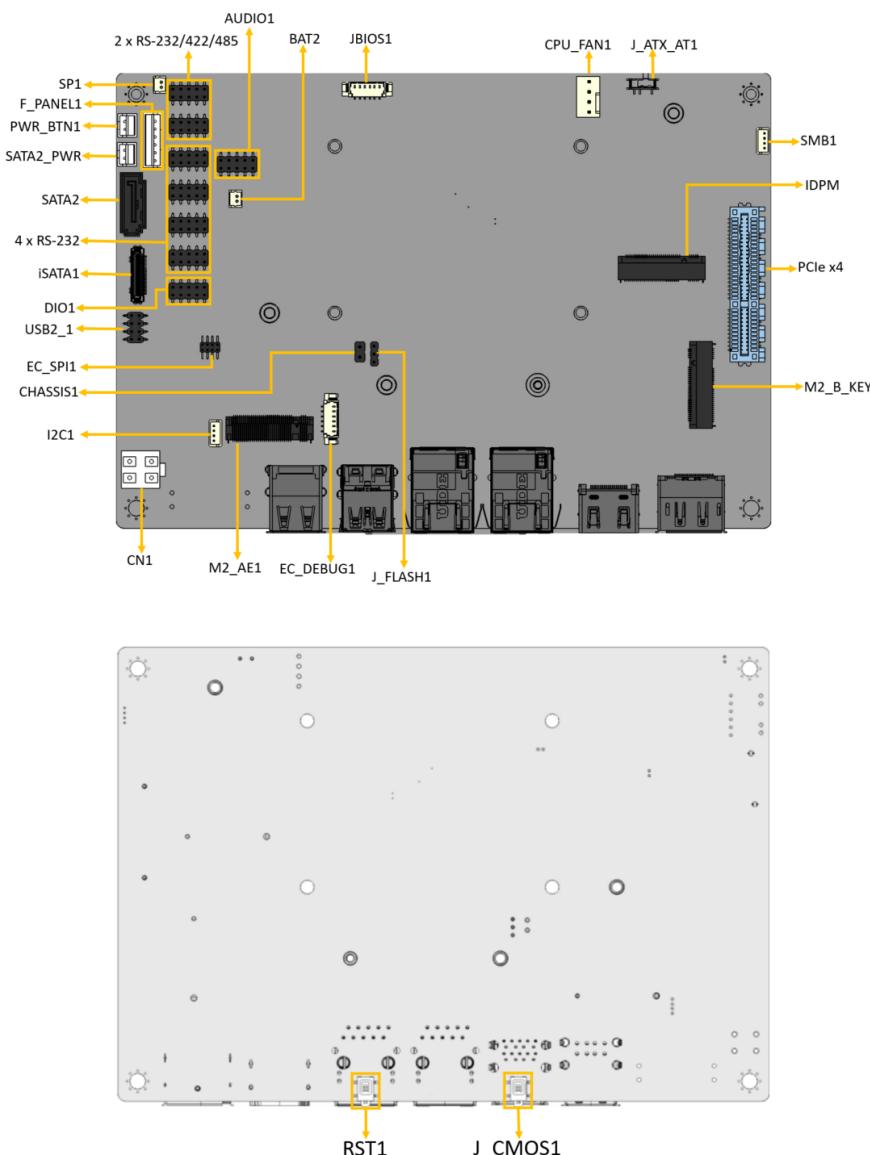

Figure 3-1: Connector and Jumper Locations

NANO-EHL SBC

3.1.2 Peripheral Interface Connectors

The table below lists all the connectors on the board.

Connector	Type	Label
Clear CMOS button	Button	J_CMOS1
AT/ATX power mode setting	Switch	J_ATX_AT1
Flash descriptor override setting jumper	3-pin header	J_FLASH1
Audio connector for IEI AC-KIT-888S kit	10-pin header	AUDIO1
ATX 12V power connector	4-pin Molex	CN1
Battery connector	2-pin wafer	BAT2
Buzzer connector	2-pin wafer	SP1
Digital I/O connector	10-pin header	DIO1
Fan connector	4-pin header	CPU_FAN1
Power LED & HDD LED connector	6-pin wafer	F_PANEL1
Power button connector	2-pin wafer	PWR_BTN1
Reset button	Button	RST1
RS-232/422/485 serial port connectors	10-pin wafer	COM1, COM2
RS-232 serial port connectors	10-pin wafer	COM3, COM4, COM5, COM6
SATA 6Gb/s connectors	7-pin SATA connector	SATA2
SATA power connector	2-pin wafer	SATA2_PWR
IEI SATA connector	20-pin connector	ISATA1
I2C connector	4-pin wafer	I2C1
SMBus connector	4-pin wafer	SMB1
Flash SPI ROM connector	6-pin wafer	JBIOS1

Flash EC ROM connector	8-pin header	EC_SPI1
EC debug connector	6-pin wafer	EC_DEBUG1
Internal USB 2.0 connector	8-pin header	USB2_1
M.2 A-key slot	M.2 A-key slot	M2_AE1
M.2 B-key slot	M.2 B-key slot	M2_B_KEY
IEI iDPM slot	IEI Defined iDPM slot	IDPM
PCIe x4 slot (x2 signal)	PCIe slot for riser card	IP2EHL_XC

Table 3-1: Peripheral Interface Connectors

3.1.3 External Interface Panel Connectors

The table below lists the connectors on the external I/O panel.

Connector	Type	Label
External 2.5GbE RJ-45 connectors	RJ45	LAN1, LAN2
External USB 3.2 Gen 2 Type-A connectors	USB 3.2 Gen 2 Type-A	USB30_CON1
External USB 2.0 Type-A connectors	USB 2.0 Type-A	USB20_CON1
External DisplayPort connector	DP	DP1
External HDMI connector	HDMI	HDMI1

Table 3-2: Rear Panel Connectors

3.2 Internal Peripheral Connectors

The section describes all of the connectors on the NANO-EHL.

3.2.1 Clear CMOS Button

CN Label: J_CMOS1

CN Type: Button

CN Location: See [Figure 3-2](#)

CN Pinouts: See [Table 3-3](#)

To clear the CMOS Setup (for example if you have forgotten the password, you should clear the CMOS and then reset the password), you should disconnect the RTC battery and press the button for about 3 seconds. This will set back to normal operation mode.

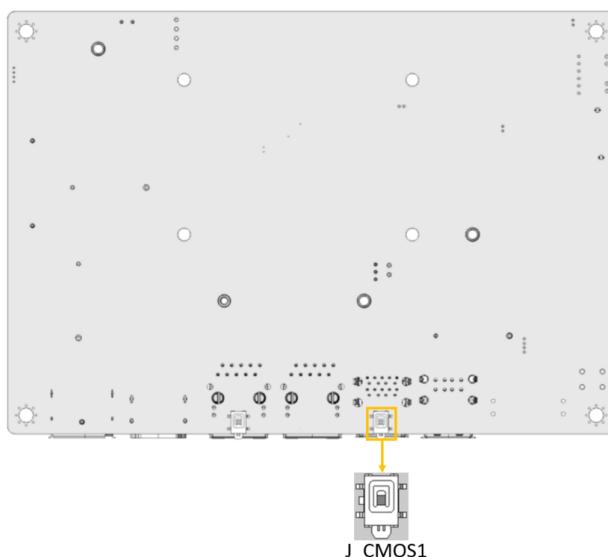

Figure 3-2: Clear CMOS Location

PIN NO.	DESCRIPTION
NC (default)	Keep CMOS Setup (Normal Operation)
Press button	Clear CMOS Setup

Table 3-3: Clear CMOS Pinouts

3.2.2 AT/ATX Power Mode Setting

CN Label: J_ATX_AT1

CN Type: Switch

CN Location: See **Figure 3-3**

CN Pinouts: See **Table 3-4**

The AT/ATX power mode selection is made through the AT/ATX power mode switch which is shown in Figure 3-3.

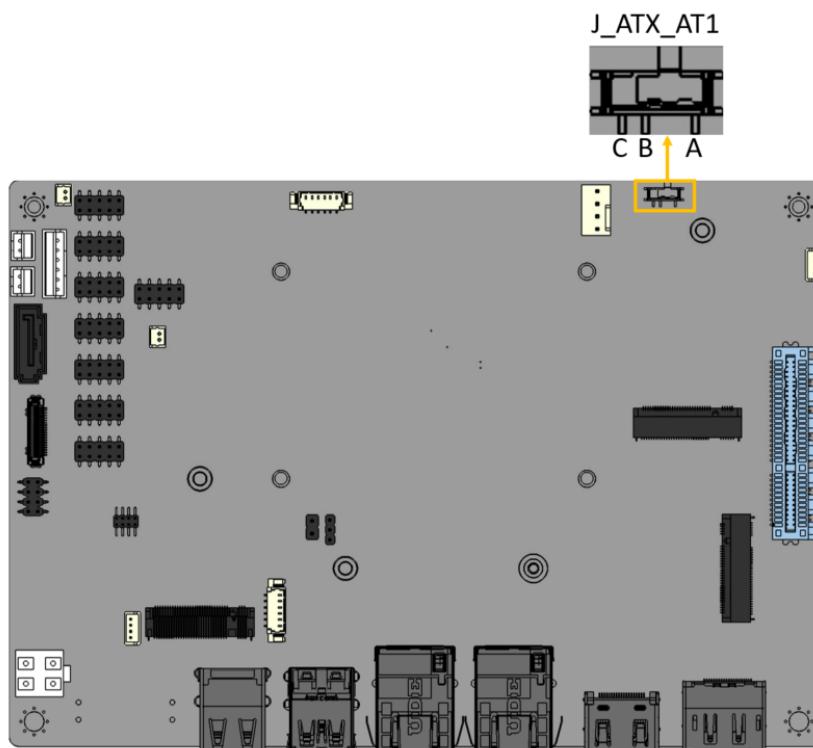

Figure 3-3: AT/ATX Power Mode Switch Locations

Setting	Description
Short A-B	ATX power mode (default)
Short B-C	AT power mode

Table 3-4: AT/ATX Power Mode Switch Settings

NANO-EHL SBC**3.2.3 Flash Descriptor Override Setting Jumper**

CN Label: J_FLASH1

CN Type: 3-pin header,P=2.00mm

CN Location: See **Figure 3-4**

CN Pinouts: See **Table 3-5**

The J_FLASH1 connector is used for Flash Descriptor Security Overide .

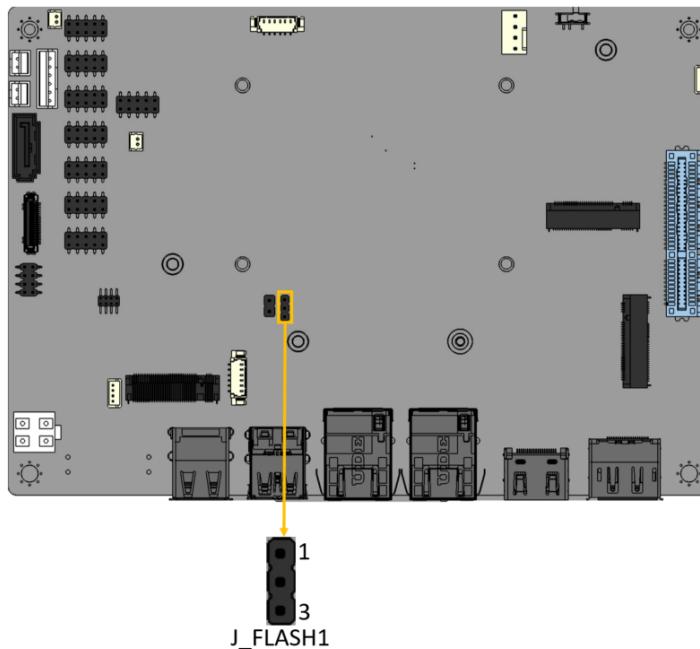

Figure 3-4: Flash Descriptor Override Setting Jumper Locations

PIN NO.	DESCRIPTION
Short 1 - 2	Disable (default)
Short 2 - 3	Enable

Table 3-5: Flash Descriptor Override Setting Jumper Pinouts

To update the ME firmware, please follow the steps below.

Step 1: Before turning on the system power, short the Flash Descriptor Security Override jumper.

Step 2: Update the BIOS and ME firmware, and then turn off the system power.

Step 3: Remove the metal clip on the Flash Descriptor Security Override jumper to its default setting.

Step 4: Restart the system. The system will reboot 2 ~ 3 times to complete the ME firmware update.

3.2.4 Internal Audio Connector

CN Label: AUDIO1

CN Type: 10-pin header, p=2.00 mm

CN Location: See **Figure 3-5**

CN Pinouts: See **Table 3-6**

The audio connector is connected to external audio devices (AC-KIT-888S-R10) including speakers and microphones for the input and output of audio signals to and from the system.

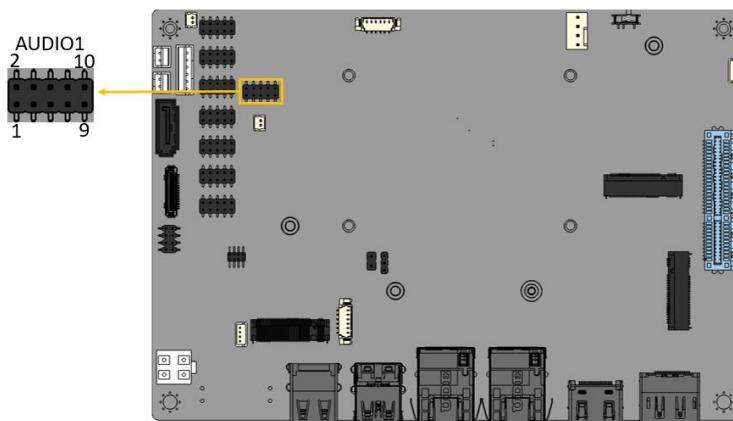

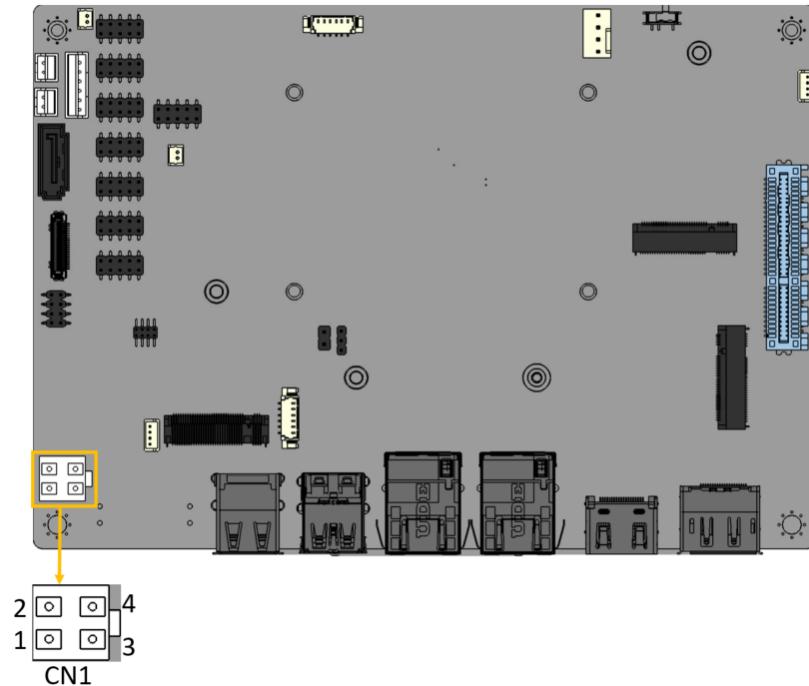

Figure 3-5: Audio Connector Location

NANO-EHL SBC

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	HDA_SYNC	2	HDA_CLK
3	HDA_SDOUT	4	HDA_SPKR
5	HDA_SDIN	6	HDA_RST#
7	+5V	8	GND
9	+12V	10	GND

Table 3-6: Audio Connector Pinouts**3.2.5 ATX 12V Power Connector****CN Label:** CN1**CN Type:** 4-pin Molex, p=4.2 mm**CN Location:** See **Figure 3-6****CN Pinouts:** See **Table 3-7**

The connector supports the +12V power supply.

**Figure 3-6: ATX 12V Power Connector Location**

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	2	GND
3	+12V	4	+12V

Table 3-7: ATX 12V Power Connector Pinouts

3.2.6 RTC Battery Connector

CAUTION:

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

NOTE:

It is recommended to attach the RTC battery onto the system chassis in which the NANO-EHL is installed.

CN Label: BAT2

CN Type: 2-pin wafer, p=1.25 mm

CN Location: See **Figure 3-7**

CN Pinouts: See **Table 3-8**

The battery connector is connected to the system battery. The battery provides power to the system clock to retain the time when power is turned off.

NANO-EHL SBC

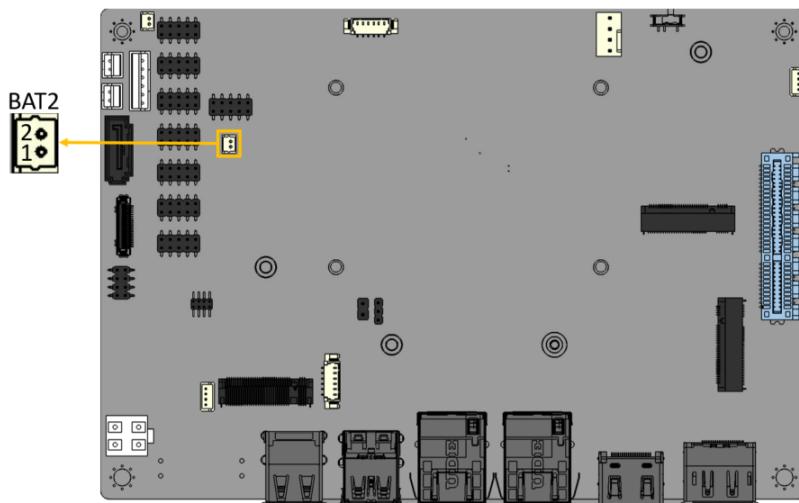

Figure 3-7: Battery Connector Location

Pin	Description
1	VBATT
2	GND

Table 3-8: Battery Connector Pinouts

3.2.7 Buzzer Connector

CN Label: SP1

CN Type: 2-pin wafer, p=1.25 mm

CN Location: See **Figure 3-8**

CN Pinouts: See **Table 3-9**

The buzzer connector is connected with the buzzer to give a beep warning when the motherboard goes wrong.

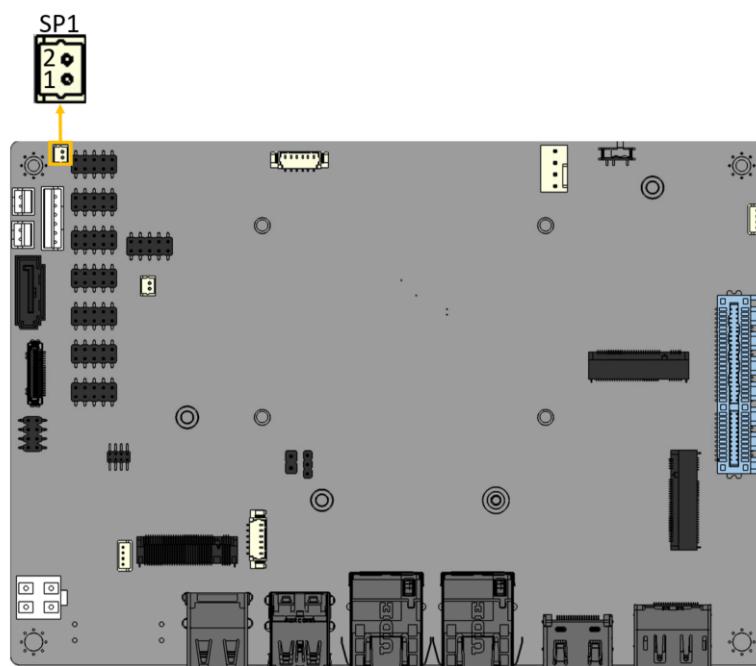

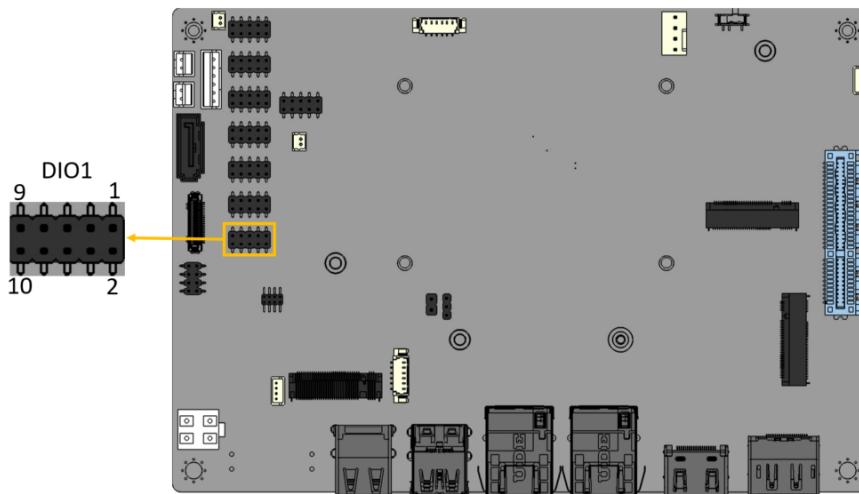

Figure 3-8: Buzzer Connector Location

Pin	Description
1	+5V
2	PC_BEEP_N

Table 3-9: Buzzer Connector Pinouts

NANO-EHL SBC**3.2.8 Digital Input/Output Connector****CN Label:** DIO1**CN Type:** 10-pin wafer, p=2.0 mm**CN Location:** See **Figure 3-9****CN Pinouts:** See **Table 3-10**

The 8-bit digital I/O connector provides programmable input and output for external devices.

**Figure 3-9: Digital I/O Connector Location**

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	2	VCC
3	Output 3	4	Output 2
5	Output 1	6	Output 0

3.2.9 Fan Connector

CN Label: CPU_FAN1

CN Type: 4-pin wafer, p=2.54 mm

CN Location: See **Figure 3-10**

CN Pinouts: See **Table 3-11**

The fan connector attaches to a smart cooling fan.

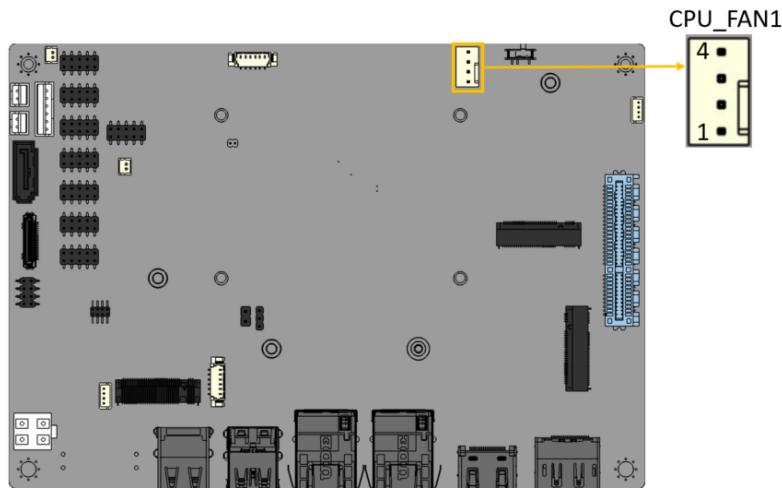

Figure 3-10: Fan Connector Location

PIN NO.	DESCRIPTION	PIN NO.	DESCRIPTION
1	GND	3	FANIO
2	+12V	4	PWM (+5V)

Table 3-11: Fan Connector Pinouts

NANO-EHL SBC**3.2.10 Power LED & HDD LED Connector**

CN Label: F_PANEL1

CN Type: 6-pin wafer, p=2.00 mm

CN Location: See **Figure 3-11**

CN Pinouts: See **Table 3-12**

The front panel connector connects to the power LED indicator and HDD LED indicator on the system front panel.

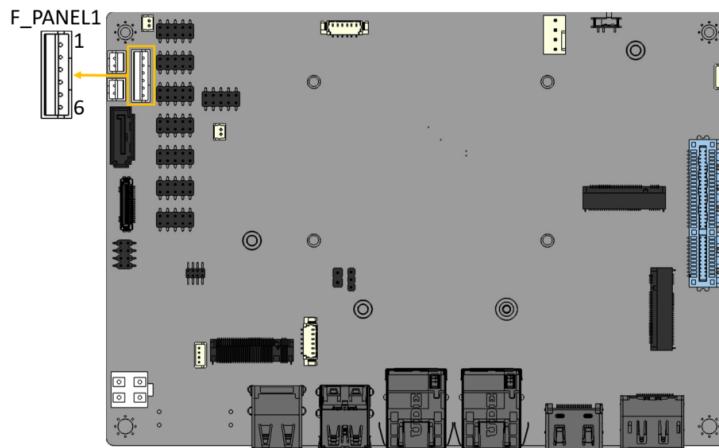

Figure 3-11: Power LED & HDD LED Connector Location

Pin	Description	Pin	Description
1	+5V	2	GND
3	PWR_LED+	4	PWR_LED-
5	HDD_LED+	6	HDD_LED-

Table 3-12: Power LED & HDD LED Connector Pinouts

3.2.11 Power Button Connector

CN Label: PWR_BTN1

CN Type: 2-pin wafer, p=2.00 mm

CN Location: See [Figure 3-12](#)

CN Pinouts: See [Table 3-13](#)

The power button connector is connected to a power switch on the system chassis to enable users to turn the system on and off.

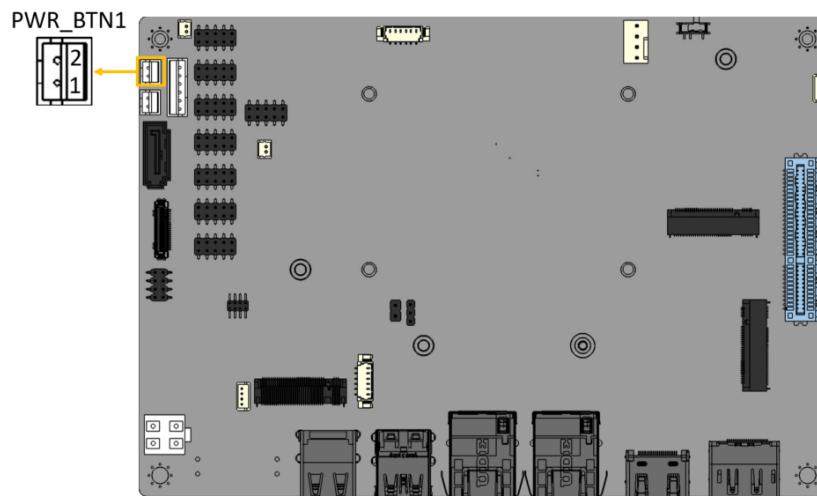

Figure 3-12: Power Button Connector Location

Pin	Description
1	PWR_BTN+
2	PWR_BTN-

Table 3-13: Power Button Connector Pinouts

NANO-EHL SBC**3.2.12 Reset Button**

CN Label: RST1

CN Type: Button

CN Location: See **Figure 3-13**

The reset button allows users to reboot the system when the system is turned on.

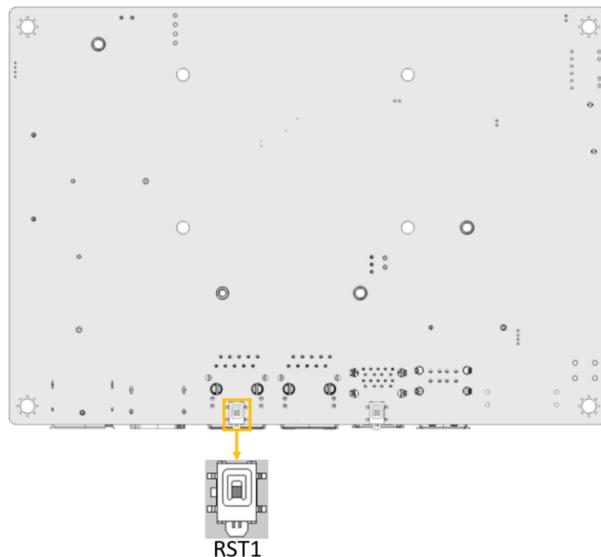

Figure 3-13: Reset Button Connector Location

3.2.13 RS-232/422/485 Serial Port Connector

CN Label: COM1, COM2

CN Type: 10-pin wafer, p=2.0 mm

CN Location: See **Figure 3-14**

CN Pinouts: See **Table 3-14**

The serial connector provides RS-232/422/485 connection.

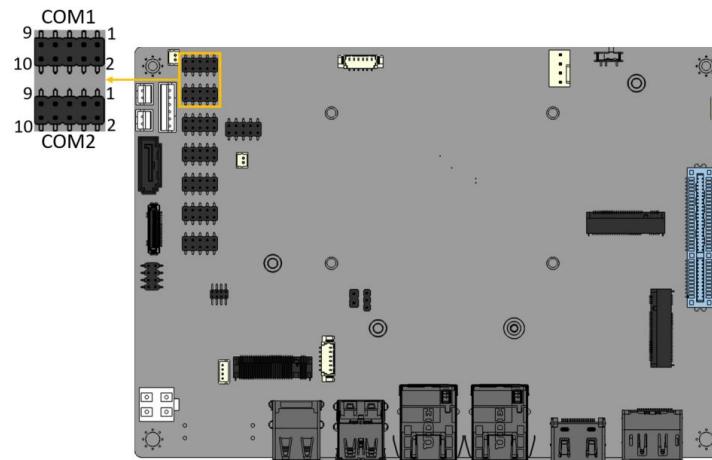

Figure 3-14: RS-232/422/485 Serial Port Connector Location

Pin	RS-232	RS-422	RS-485

NANO-EHL SBC**3.2.27 PCIe x4 Slot**

CN Label: IP2EHL_XC

CN Type: PCIe x4 slot

CN Location: See **Figure 3-28**

The PCIe x4 (x2 signal) expansion card slot is for PCIe x4 expansion card or IEI riser card.

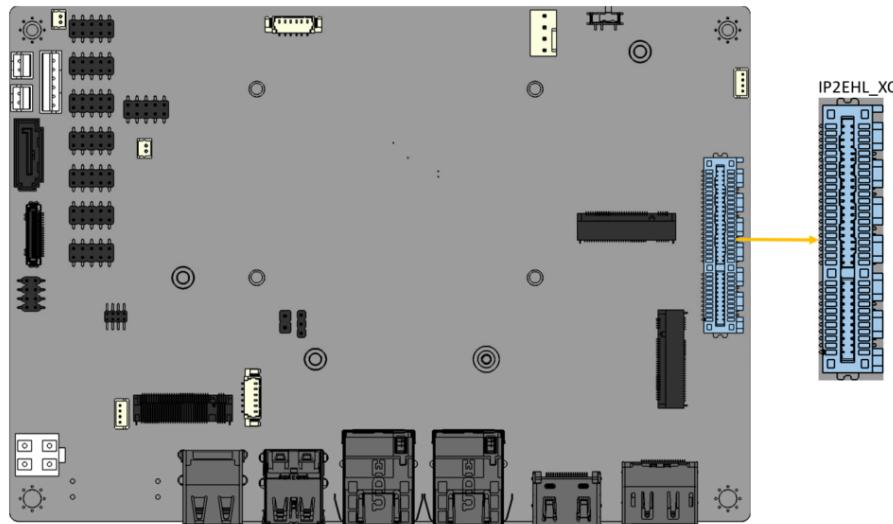

Figure 3-28: PCIe x16 Slot Location

3.3 External Peripheral Interface Connector Panel

Figure 3-29 shows the NANO-EHL external peripheral interface connector (EPIC) panel.

The EPIC panel consists of the following:

- 1 x HDMI connector
- 1 x DP connector
- 2 x 2.5GbE RJ-45 connector
- 2 x USB 3.2 Gen 2 connector
- 2 x USB 2.0 connector

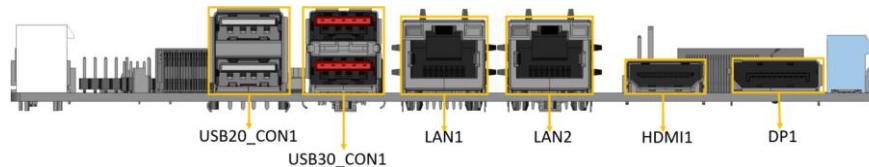

Figure 3-29: External Peripheral Interface Connector

3.3.1 External 2.5GbE RJ-45 Connectors

CN Label: LAN1, LAN2

CN Type: RJ-45

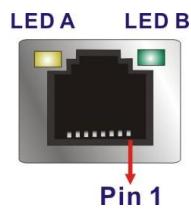

CN Location: See Figure 3-29

CN Pinouts: See Table 3-28

The LAN connector connects to a local network.

Installation

4.1 Anti-static Precautions

WARNING:

Failure to take ESD precautions during the installation of the NANO-EHL may result in permanent damage to the NANO-EHL and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the NANO-EHL. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the NANO-EHL or any other electrical component is handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging the board.
- ***Self-grounding*** Before handling the board, touch any grounded conducting material. During the time the board is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring the NANO-EHL, place it on an anti-static pad. This reduces the possibility of ESD damaging the NANO-EHL.
- ***Only handle the edges of the PCB:*** When handling the PCB, hold the PCB by the edges.

4.2 Installation Considerations

NOTE:

The following installation notices and installation considerations should be read and understood before installation. All installation notices must be strictly adhered to. Failing to adhere to these precautions may lead to severe damage and injury to the person performing the installation.

WARNING:

The installation instructions described in this manual should be carefully followed in order to prevent damage to the NANO-EHL, NANO-EHL components and injury to the user.

Before and during the installation please **DO** the following:

- Read the user manual:
 - The user manual provides a complete description of the NANO-EHL installation instructions and configuration options.
- Wear an electrostatic discharge cuff (ESD):
 - Electronic components are easily damaged by ESD. Wearing an ESD cuff removes ESD from the body and helps prevent ESD damage.
- Place the NANO-EHL on an antistatic pad:
 - When installing or configuring the motherboard, place it on an antistatic pad. This helps to prevent potential ESD damage.
- Turn all power to the NANO-EHL off:
 - When working with the NANO-EHL, make sure that it is disconnected from all power supplies and that no electricity is being fed into the system.

Before and during the installation of the NANO-EHL **DO NOT**:

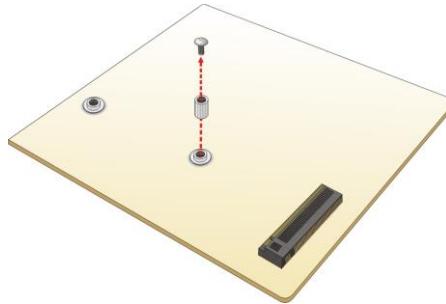

- Remove any of the stickers on the PCB board. These stickers are required for warranty validation.
- Use the product before verifying all the cables and power connectors are properly connected.
- Allow screws to come in contact with the PCB circuit, connector pins, or its components.

4.3 M.2 Module Installation

CAUTION:

The standoff and screw pre-installed for the M.2 2242 module must be removed before installing an M.2 2280 module. Failing to do so may cause short circuit or other damages to the motherboard.

To install an M.2 module, please follow the steps below.

Step 1: Locate the M.2 module slot. See [Chapter 3](#).

Step 2: Remove the retention screw secured on the motherboard.

Step 3: Line up the notch on the module with the notch on the slot. Slide the M.2 module into the socket at an angle of about 20° ([Figure 4-1](#)).

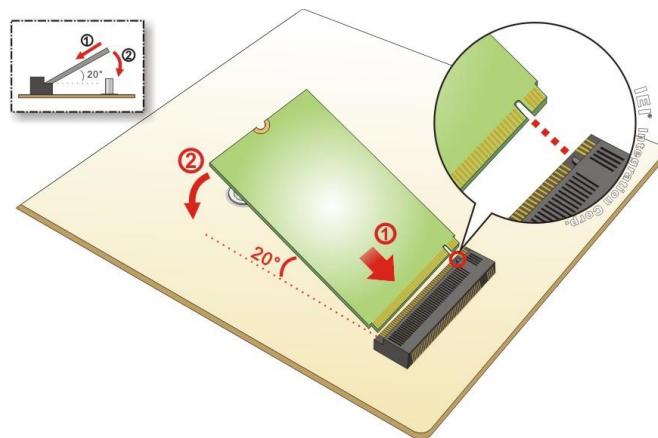

NANO-EHL SBC

Figure 4-1: Inserting The M.2 Module Into The Slot At An Angle

Step 4: Secure the M.2 module with the previously removed retention screw (**Figure 4-2**).

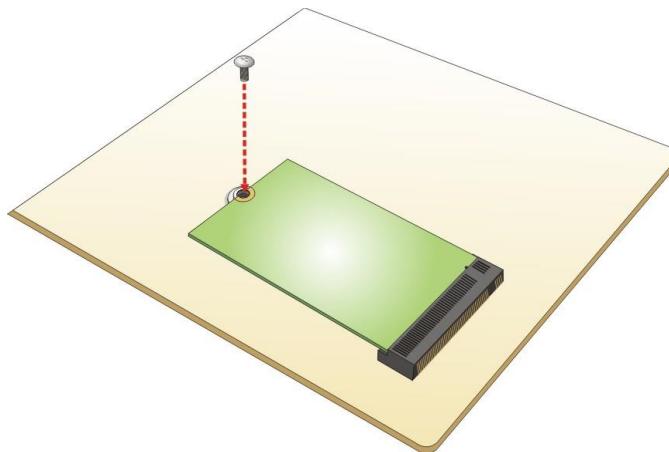

Figure 4-2: Securing The M.2 Module

4.4 Chassis Installation

4.4.1 Heat Spreader

WARNING:

The heat spreader installed on the NANO-EHL can only serve as a heat conductor, which needs additional heat dissipation mechanism to achieve suitable thermal condition. DO NOT put the NANO-EHL with the heat spreader directly on a surface that cannot dissipate system heat, and never run the NANO-EHL without the heat spreader secured to the board.

When the NANO-EHL is shipped, it is secured to a heat spreader with six retention screws. The heat spreader must have a direct contact with a heat dissipation surface to ensure stable operation. In addition, a thin layer of thermal paste has to be applied onto the heat dissipation surface where it contacts the heat spreader.

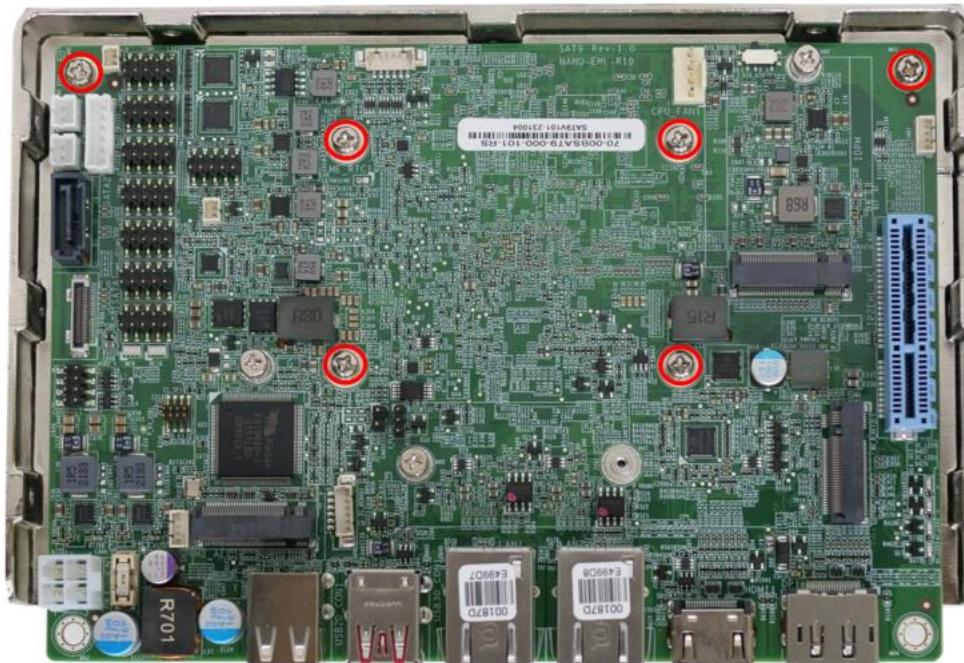

Figure 4-3: Heat Sink Retention Screws

NANO-EHL SBC

4.5 Riser Card Installation

The NANO-EHL features a PCIe x4 (x2 signal) slot, which is a new design of the motherboard to expand functionality. By installing an IEI-developed riser card into the PCIe slot, the x2 signal is divided into two x1 slots, offering great configuration flexibility and expandability.

Two types of riser cards with different orientation are available, one with slots facing outwards and the other with slots facing inwards.

The outwards-facing riser card (P/N: NWR-R2S-N-R10), although lower in height, is able to provide better spacing to ensure expansion cards to run at a low temperature. It is ideal for the chassis that is wide enough for the expansion card to be placed.

Figure 4-4:Outwards Riser Card Installation Example Figure 4-5: NWR-L2S-N-R10

The inwards-facing riser card (P/N: NWR-R2S-N-R10) is designed with higher height to keep a decent space between the expansion cards and the motherboard. This can help improve the airflow and heat transfer within the system. It is suitable for installation where space is limited.

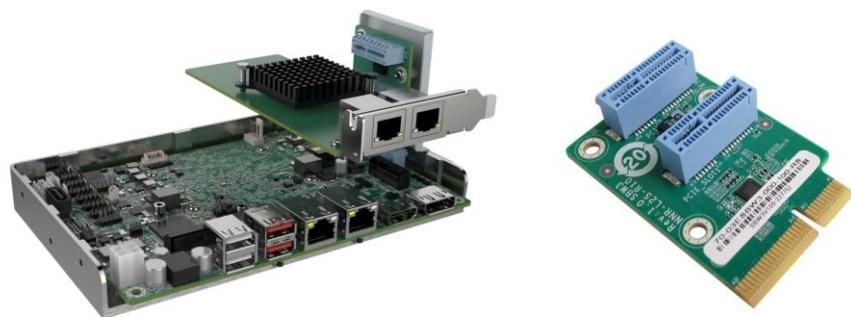

Figure 4-6: Inwards Riser Card Installation Example Figure 4-7: NWR-R2S-N-R10

Both of the riser cards can be firmly secured to enhance stability by using the L-shaped bracket, in which screw holes are perfectly matched with those on the side of the heatsink and on the riser card, making it easy and convenient to install. See **Figure 4-8**.

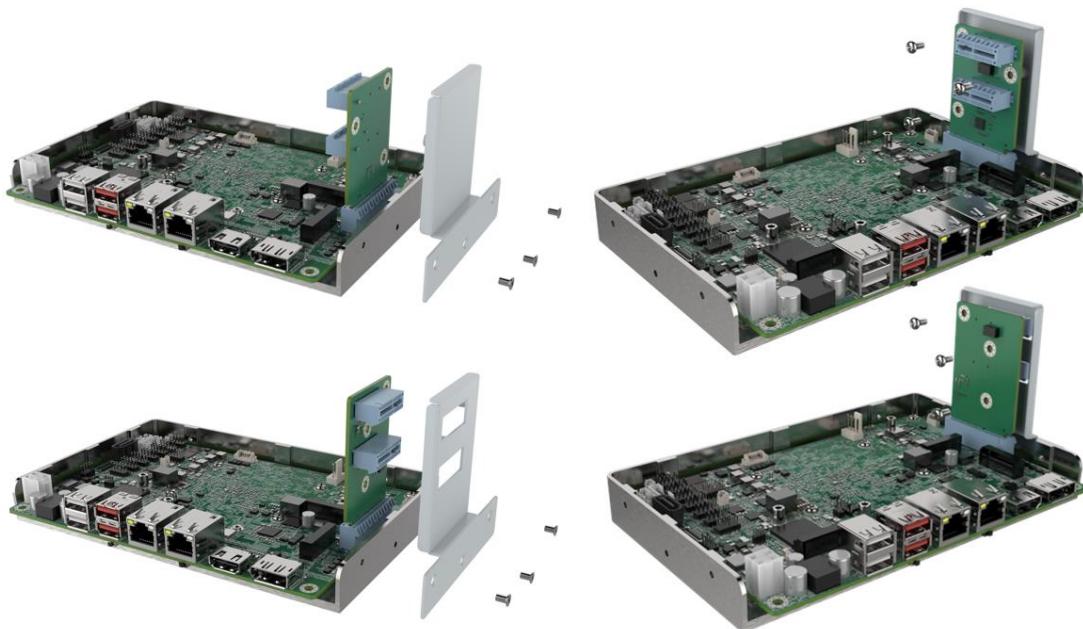

Figure 4-8:L-shaped Bracket Installation Example

4.6 Internal Peripheral Device Connections

This section outlines the installation of peripheral devices to the on-board connectors

4.6.1 AT Power Connection

Follow the instructions below to connect the NANO-EHL to an AT power supply.

WARNING:

Disconnect the power supply power cord from its AC power source to prevent a sudden power surge to the NANO-EHL.

Step 1: Locate the power cable. The power cable is shown in the packing list in Chapter 2.

Step 2: Connect the power cable to the motherboard. Connect the 4-pin (2x2) Molex type power cable connector to the power connector on the motherboard. See [Figure 4-9](#)

NANO-EHL SBC

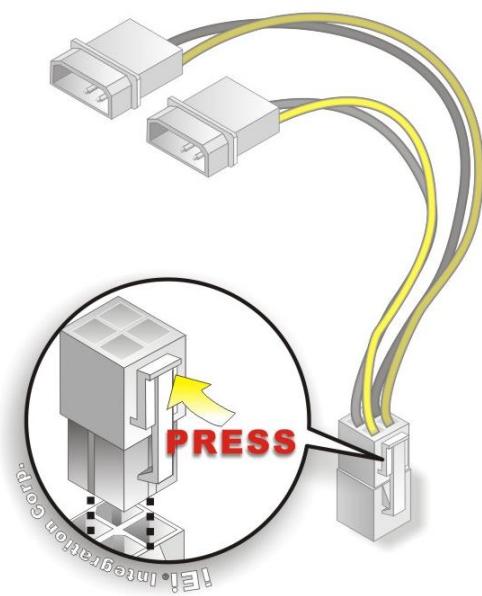

Figure 4-9: Power Cable to Motherboard Connection

Step 3: Connect power cable to power supply. Connect one of the 4-pin (1x4) Molex type power cable connectors to an AT power supply. See **Figure 4-10**

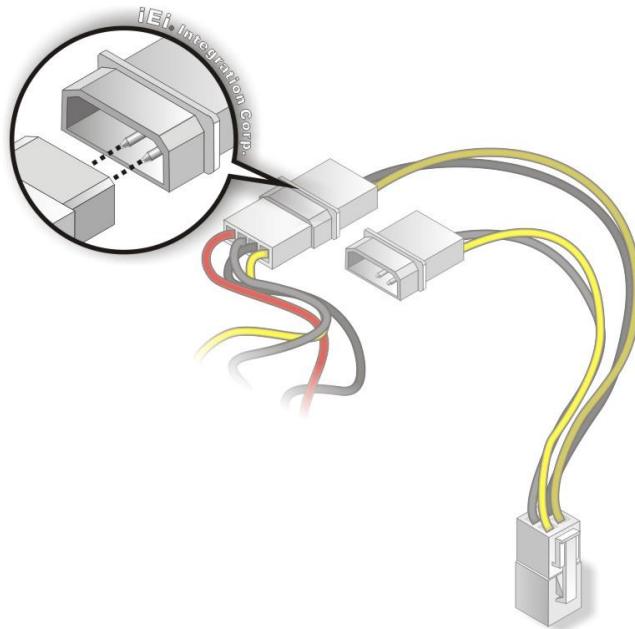

Figure 4-10: Connect Power Cable to Power Supply

4.6.2 7.1 Channel Audio Kit Installation

NOTE:

This item must be ordered separately, and connects to the audio connector. For further information please contact the nearest distributor, reseller or vendor or contact an IEI sales representative directly.

The audio kit attaches to the audio connector. The audio kit provides 7.1 channel audio.

To install the audio kit, please refer to the steps below:

Step 1: Connect the cable to the audio kit. Connect the included cable to the audio kit. Make sure pin 1 aligns with the marked pin.

Step 2: Connect the cable to the board. Connect the other end of the cable to the board. Make sure to line up the marked pin 1.

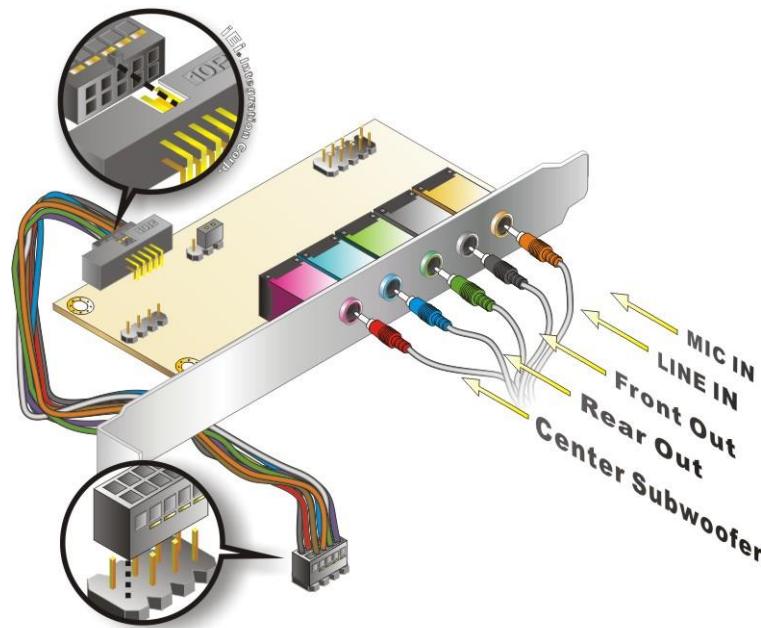

Figure 4-11: 7.1 Channel Audio Kit

Step 3: Mount the audio kit onto the chassis. Once the audio kit is connected to the board, secure the audio kit bracket to the system chassis.

NANO-EHL SBC

Step 4: **Connect the audio devices.** Connect speakers and external audio sources to the audio jacks on the audio kit.

Step 5: **Install the driver.** Install the 7.1 channel audio driver included with the board.

4.6.3 SATA Drive Connection

The NANO-EHL is shipped with a SATA drive cable. To connect the SATA drive to the connector, please follow the steps below.

Step 1: **Locate the SATA connector and the SATA power connector.** The locations of the connectors are shown in **Chapter 3**.

Step 2: **Insert the cable connector.** Insert the cable connector into the on-board SATA drive connector and the SATA power connector. See **Figure 4-12**.

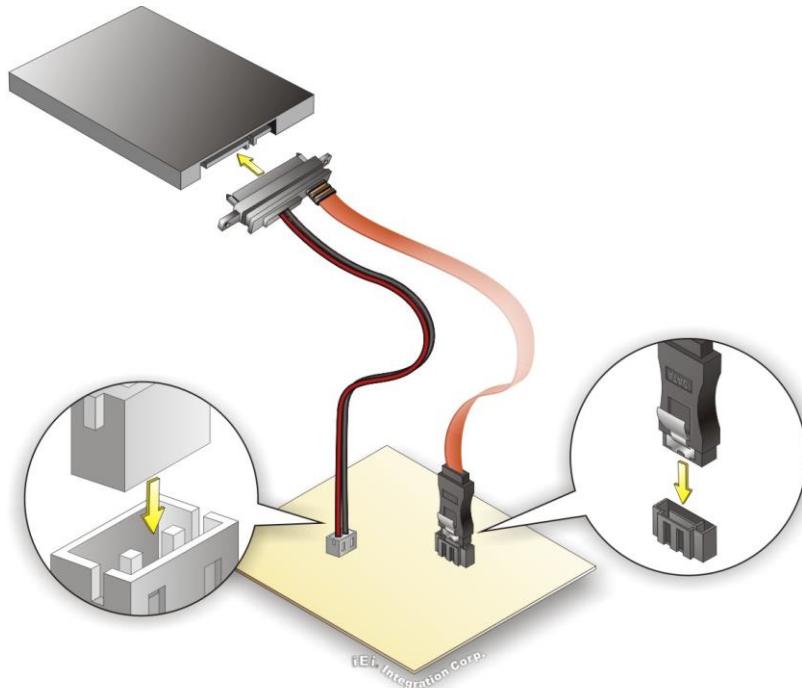

Figure 4-12: SATA Drive Cable Connection

Step 3: **Connect the cable to the SATA disk.** Connect the connector on the other end of the cable to the connector at the back of the SATA drive.

Step 4: To remove the SATA cable from the SATA connector, press the clip on the connector at the end of the cable.

4.7 Software Drivers

4.7.1 Available Drivers

All the drivers for the NANO-EHL are available on IEI Resource Download Center (<https://download.ieeworld.com>). Type NANO-EHL and press Enter to find all the relevant software, utilities, and documentation.

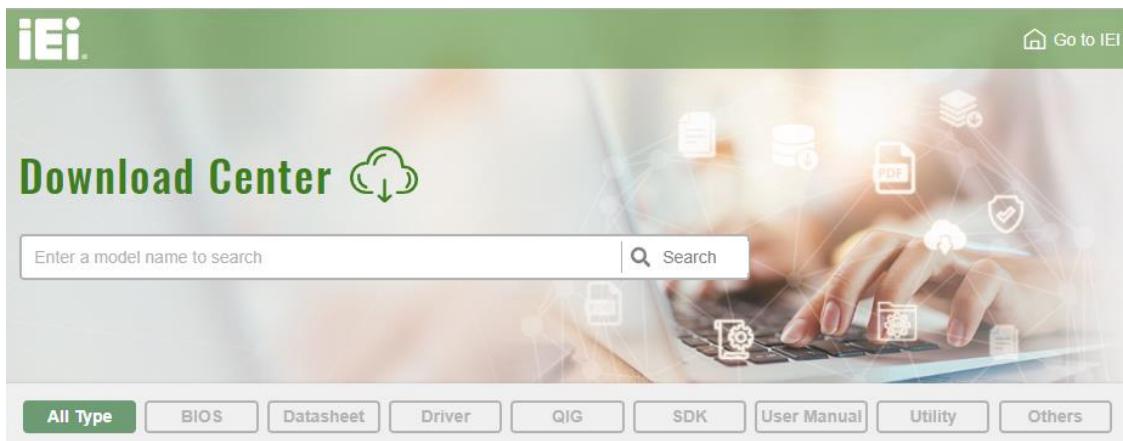

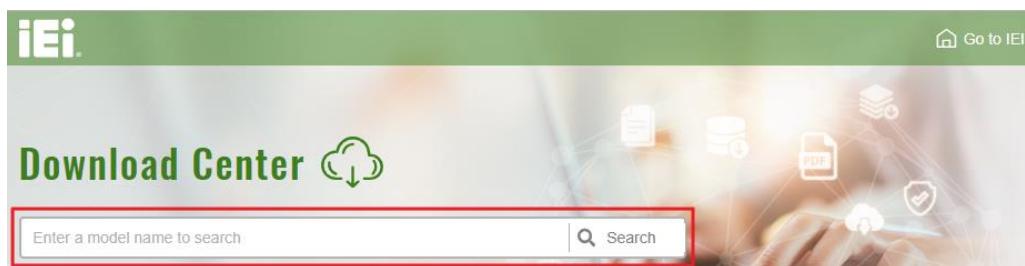

Figure 4-13: IEI Resource Download Center

4.7.2 Driver Download

To download drivers from IEI Resource Download Center, follow the steps below.

Step 1: Go to <https://download.ieeworld.com>. Type NANO-EHL and press Enter.

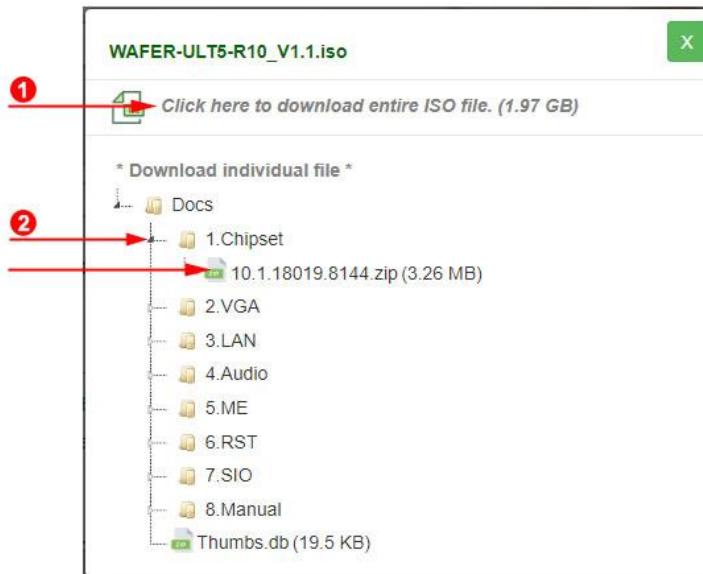

Step 2: All product-related software, utilities, and documentation will be listed. You can choose **Driver** to filter the result.

The screenshot shows a search result page for the keyword "WAFFER-ULT5". The top navigation bar includes links for All Type, BIOS, Datasheet, Driver (highlighted in green), QIG, SDK, User Manual, Utility, and Others. A search message indicates 6 records found. Below the search bar, the product name "WAFFER-ULT5" is displayed, along with a "Product Info" button. The main content area is titled "Driver" and lists a single file entry:

File Name	Published	Version	File Checksum
WAFFER-ULT5-R10_V1.1.iso (1.97 GB)	2020/07/07	1.10	475FD74C87A309D22A0265218DD3B37E

Step 3: Click the driver file name on the page and you will be prompted with the following window. You can download the entire ISO file (1), or click the small arrow to find an individual driver and click the file name to download (2).

NOTE:

To install software from the downloaded ISO image file in Windows 8, 8.1 or 10, double-click the ISO file to mount it as a virtual drive to view its content.

Chapter

5

BIOS

5.1 Introduction

The BIOS is programmed onto the BIOS chip. The BIOS setup program allows changes to certain system settings. This chapter outlines the options that can be changed.

NOTE:

Some of the BIOS options may vary throughout the life cycle of the product and are subject to change without prior notice.

5.1.1 Starting Setup

The UEFI BIOS is activated when the computer is turned on. The setup program can be activated in one of two ways.

1. **Using keyboard:** Press the **DEL** or **F2** as soon as the system is turned on.
2. **Using touchscreen:** Press the **Setup** button on the upper right corner of the BIOS Starting Menu.

If the message disappears before the **DEL** or **F2** key is pressed, restart the computer and try again, then the BIOS Starting Menu will appear. Select "Setup" and press Enter to get into the BIOS Setup.

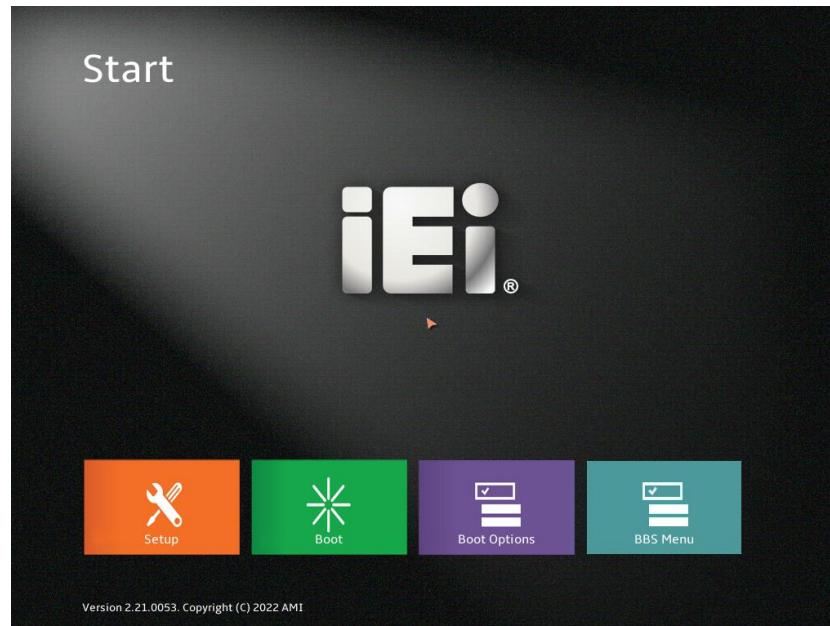

Figure 5-1: BIOS Starting Menu

5.1.2 Using Setup

The BIOS Setup menu can be navigated by using a keyboard or a touchscreen.

5.1.2.1 Keyboard Navigation

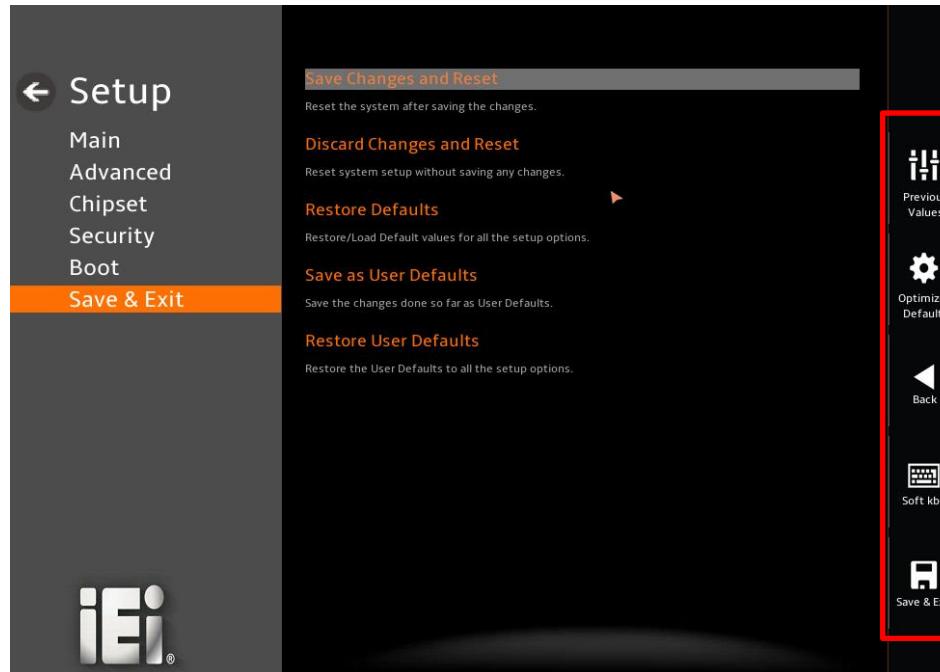

For keyboard navigation, use the navigation keys shown in **Table 5-1**.

Key	Function
Up arrow	Move to previous item
Down arrow	Move to next item
Left arrow	Move to the item on the left hand side
Right arrow	Move to the item on the right hand side
+	Increase the numeric value or make changes
-	Decrease the numeric value or make changes
Page Up	Move to the previous page
Page Dn	Move to the next page
Esc	Main Menu – Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
F1	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2	Load previous values
F3	Load optimized defaults
F4	Save changes and Exit BIOS
<K>	Scroll help area upwards
<M>	Scroll help area downwards

Table 5-1: BIOS Navigation Keys

5.1.2.2 Touch Navigation

For touchscreen navigation, use the on-screen navigation keys shown below.

On-screen Button	Function
Previous Values	Load the last value you set.
Optimized Defaults	Load the factory default values in order to achieve the best performance.
Back	Return to the previous menu.
Soft kbd	Display the on-screen keyboard.
Save & Exit	Save the changes made to the BIOS options and reset the system.

Table 5-2: BIOS On-screen Navigation Keys

5.1.3 Getting Help

When **F1** is pressed a small help window describing the appropriate keys to use and the possible selections for the highlighted item appears. To exit the Help Window, press the **Esc** key.

5.1.4 Unable to Reboot after Configuration Changes

If the computer cannot boot after changes to the system configuration is made, CMOS defaults. Use the clear CMOS button described in **Chapter 4**.

5.1.5 BIOS Menu Bar

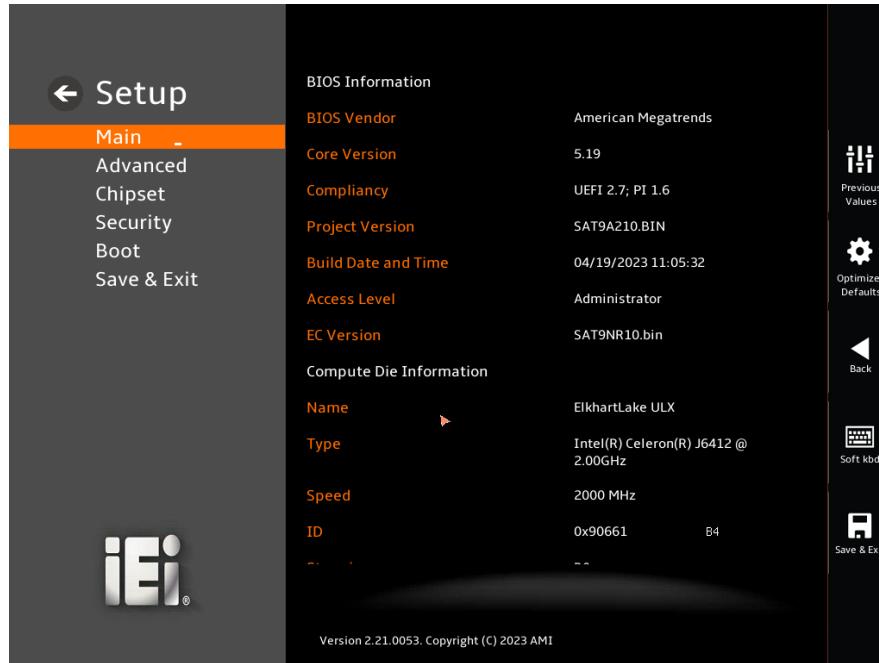

The **menu bar** on top of the BIOS screen has the following main items:

- Main – Changes the basic system configuration.
- Advanced – Changes the advanced system settings.
- Chipset – Changes the chipset settings.
- Security – Sets User and Supervisor Passwords.
- Boot – Changes the system boot configuration.
- Save & Exit – Selects exit options and loads default settings

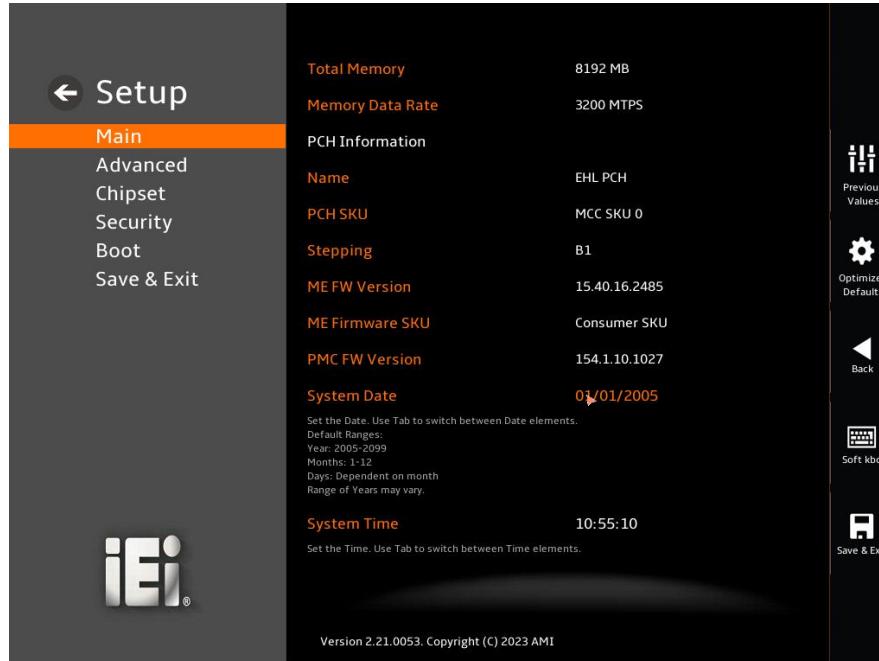

The following sections completely describe the configuration options found in the menu items at the top of the BIOS screen and listed above.

5.2 Main

The **Main** BIOS menu (**BIOS Menu 1 & BIOS Menu 2**) appears when the **BIOS Setup** program is entered. The **Main** menu gives an overview of the basic system information.

BIOS Menu 1: Main (1/2)

BIOS Menu 2: Main (2/2)

NANO-EHL SBC

➔ BIOS Information

The **BIOS Information** lists a brief summary of the BIOS. The fields in **BIOS Information** cannot be changed. The items shown in the system overview include:

- **BIOS Vendor:** Installed BIOS vendor
- **Core Version:** Current BIOS version
- **Compliance:** Current UEFI & PI version
- **Project Version:** the board version
- **Build Date and Time:** Date the current BIOS version was made
- **EC Version:** Current EC version
- BIOS Information

➔ Compute Die Information

The **Compute Die Information** lists a brief summary of the Processor. The fields in **Compute Die Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the Processor Details
- **Type:** Displays the Processor Type
- **Speed:** Displays the Processor Speed
- **ID:** Displays the Processor ID
- **Stepping:** Displays the Processor Stepping
- **Number of Processors:** Displays number of CPU cores
- **Microcode Revision:** CPU Microcode Revision
- **Total Memory:** Total Memory in the System
- **Memory Data Rate:** Displays the Data Rate of Memory

➔ PCH Information

The **PCH Information** lists a brief summary of the PCH. The fields in **PCH Information** cannot be changed. The items shown in the system overview include:

- **Name:** Displays the PCH Name
- **Stepping:** Displays the PCH Stepping
- **ME FW Version:** Displays the ME Firmware Version
- **ME Firmware SKU:** Displays the ME Firmware SKU

The System Overview field also has two user configurable fields:

→ **System Date [xx/xx/xx]**

Use the **System Date** option to set the system date. Manually enter the day, month and year.

→ **System Time [xx:xx:xx]**

Use the **System Time** option to set the system time. Manually enter the hours, minutes and seconds.

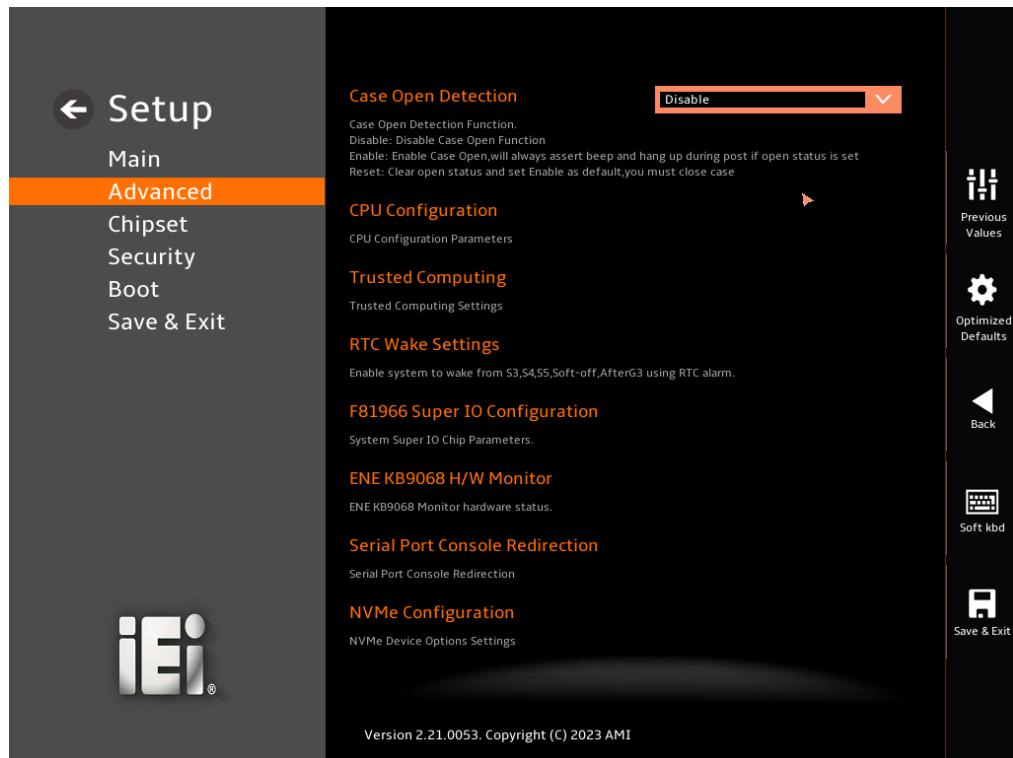

5.3 Advanced

Use the **Advanced** menu (**BIOS Menu 3**) to configure the CPU and peripheral devices through the following sub-menus:

WARNING!

Setting the wrong values in the sections below may cause the system to malfunction. Make sure that the settings made are compatible with the hardware.

BIOS Menu 3: Advanced

5.3.1 Case Open Detection

→ Case Open Detection [Disabled]

When the **Case Open Detection** is enabled, if anyone opens the computer's chassis, or case, Windows will notify the user with a pop-up message the next time he turns on his computer.

- | | | |
|-------------------|----------------|-------------------------------|
| → Disabled | DEFAULT | Disables Case Open Detection. |
| → Enabled | | Enables Case Open Detection. |

5.3.2 CPU Configuration

Use the **CPU Configuration** menu (**BIOS Menu 4 & BIOS Menu 5 & BIOS Menu 6**) to view detailed CPU specifications or enable the Intel Virtualization Technology.

BIOS Menu 4: CPU Configuration (1/3)

NANO-EHL SBC

BIOS Menu 5: CPU Configuration (2/3)

BIOS Menu 6: CPU Configuration (3/3)

→ Intel (VMX) Virtualization Technology [Enabled]

Use the **Intel (VMX) Virtualization Technology** option to enable or disable virtualization on the system. When combined with third party software, Intel® Virtualization technology allows several OSs to run on the same system at the same time.

- | | |
|-------------------|---|
| → Disabled | Disables Intel Virtualization Technology. |
| → Enabled | DEFAULT Enables Intel Virtualization Technology. |

→ Active Processor Cores [All]

Use the **Active Processor Cores** BIOS option to enable numbers of cores in the processor package.

- | | | |
|--------------|----------------|--|
| → All | DEFAULT | Enable all cores in the processor package. |
| → 1 | | Enable one core in the processor package. |
| → 2 | | Enable two cores in the processor package. |
| → 3 | | Enable three cores in the processor package. |

→ EIST [Enable]

Use the **EIST** option to enable more than two frequency ranges to be supported.

- | | |
|-------------------|---|
| → Disabled | Disables more than two frequency ranges |
| → Enabled | DEFAULT Enables more than two frequency ranges |

→ C states [Disabled]

Use the **C states** option to enable or disable the CPU Power Management.

- | | | |
|-------------------|----------------|---|
| → Disabled | DEFAULT | Disables CPU to go to C states when it's not 100% utilized. |
| → Enabled | | Enables CPU to go to C states when it's not 100% utilized. |

NANO-EHL SBC

→ Power Limit 1

Use the **Power Limit 1** to set Power Limit in Milli Watts. BIOS will round to the nearest 1/8W when programming. 0 = no custom override. For 12.50W, enter 12500. Overclocking SKU: Value must be between Max and Min Power Limits. Other SKUs: This value must be between Min Power limit and TDP Limit. If value is 0, BIOS will program TDP value.

→ Power Limit 1 Time Window

Power Limit 1 Time Window value in second. The value may vary from 0 to 128.0, 0 = default value (28 sec for mobile and 8 sec for desktop). Defines time window which TDP value should be maintained.

→ Power Limit 2

Use the **Power Limit 2** to set Power Limit in Milli Watts. BIOS will round to the nearest 1/8W when programming. If the value is 0, BIOS will program this value as 1.25*TDP. For 12.50W, enter 12500. Processor applies control policies such that the package power does not exceed this limit.

→ Tcc Activation Offset [0]

Use the **Tcc Activation** option to set Tcc activation temperature at which the Thermal Control Circuit must be activated. Tcc will be activated at: Tcc Activation Temp-Tcc Activation Offset. Tcc Activation Offset range is 0 to 63.

→ Turbo Mode [Enabled]

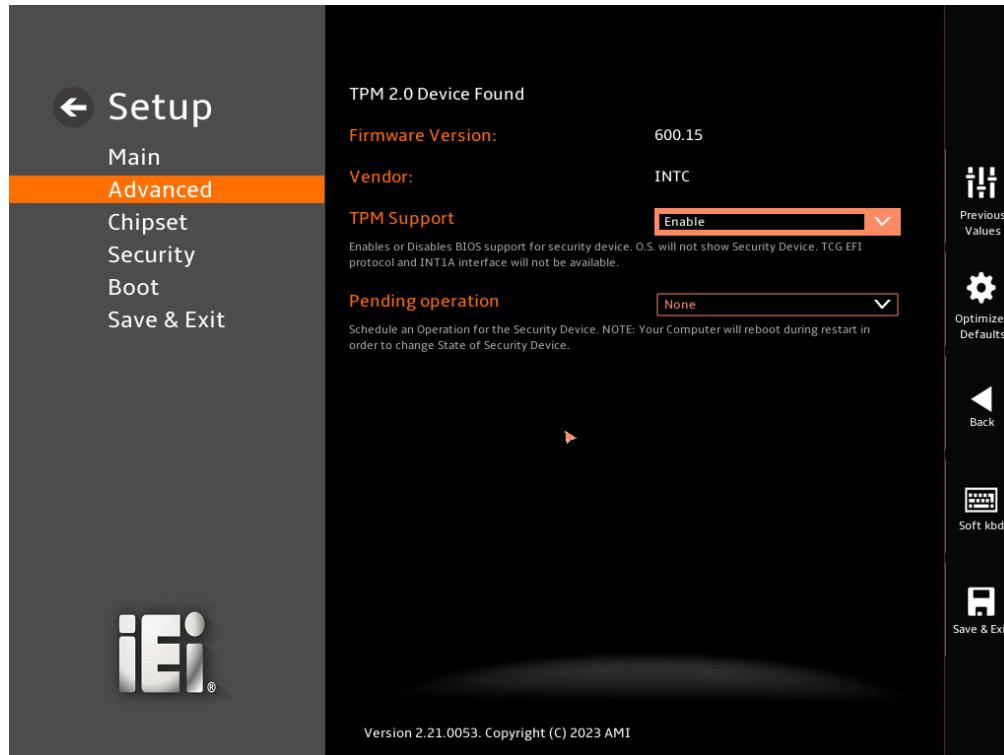

Use the **Turbo Mode** option to enable or disable Turbo Mode which requires Intel Speed Step or Intel Speed Shift to be available and enabled.

→ **Disabled** Disables Turbo Mode Technology

→ **Enabled** **DEFAULT** Enables Turbo Mode Technology

5.3.3 Trusted Computing

Use the **Trusted Computing** menu (**BIOS Menu 7**) to configure settings related to the Trusted Computing Group (TCG) Trusted Platform Module (TPM).

BIOS Menu 7: Trusted Computing

→ TPM Support [Enable]

Use the **TPM Support** option to configure support for the TPM.

- | | |
|--------------------------------|--------------------------|
| → Disable | TPM support is disabled. |
| → Enable DEFAULT | TPM support is enabled. |

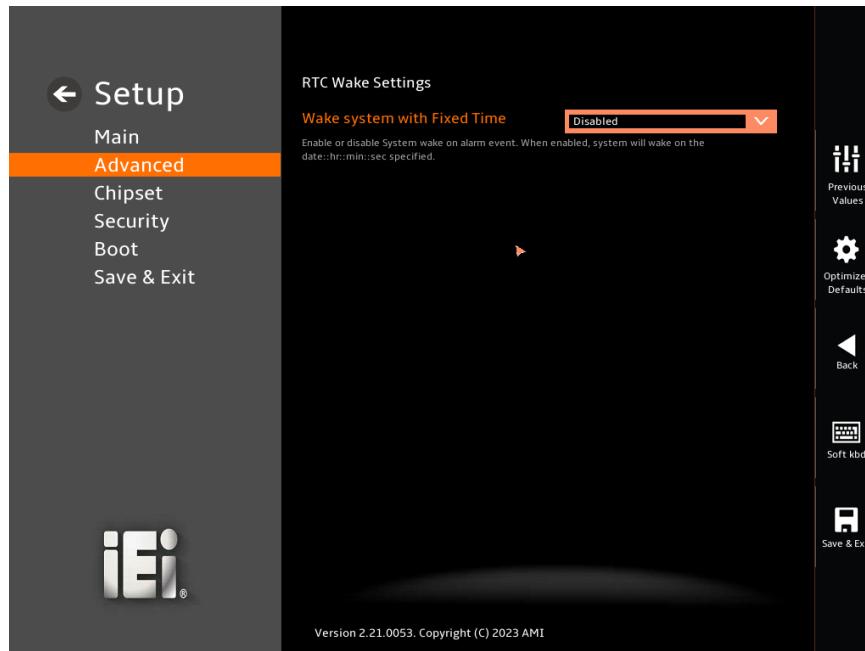

→ Pending Operation [None]

Use the **Pending Operation** option to schedule an operation for the security device.

- | | |
|------------------------------|-------------------------------------|
| → None DEFAULT | TPM information is same as previous |
| → TPM Clear | TPM information is cleared |

5.3.4 RTC Wake Setting

The **RTC Wake Settings** menu (**BIOS Menu 8**) configures RTC wake event.

BIOS Menu 8: RTC Wake Settings

→ Wake system with Fixed Time [Enabled]

Use the **Wake system with Fixed Time** option to enable or disable the system wake on alarm event.

→ Disabled

The real time clock (RTC) cannot generate a wake event

**Enabled****DEFAULT**

If selected, the **Wake up every day** option appears allowing you to enable to disable the system to wake every day at the specified time. Besides, the following options appear with values that can be selected:

Wake up date

Wake up hour

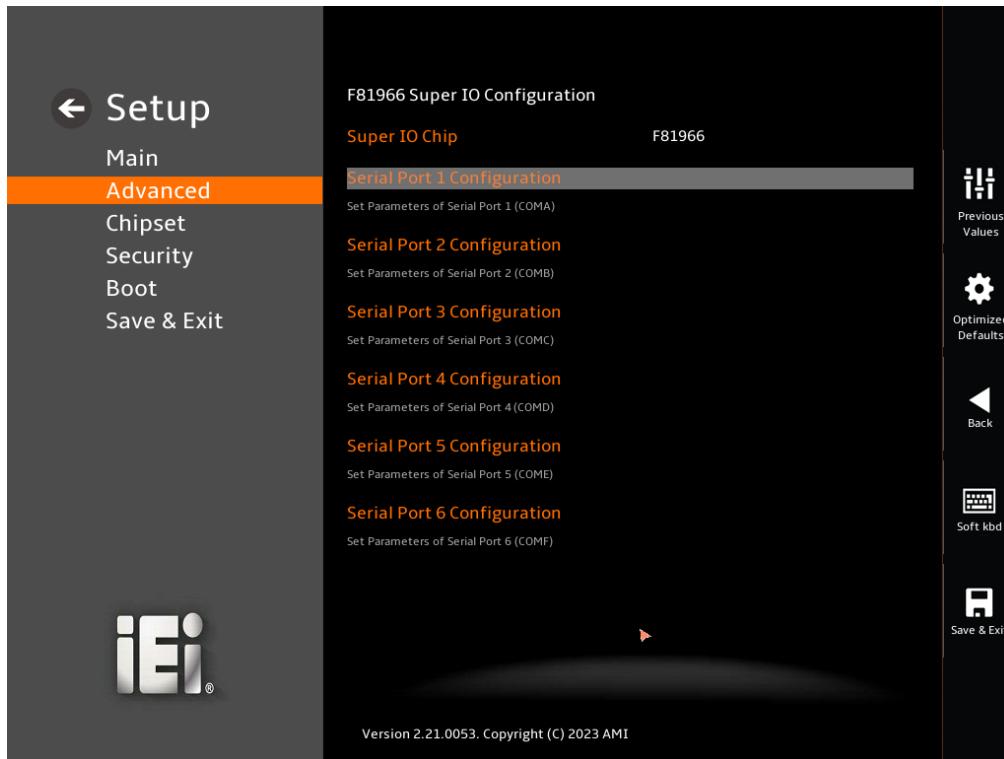

Wake up minute

Wake up second

After setting the alarm, the computer turns itself on from a suspend state when the alarm goes off.

5.3.5 F81966 Super IO Configuration

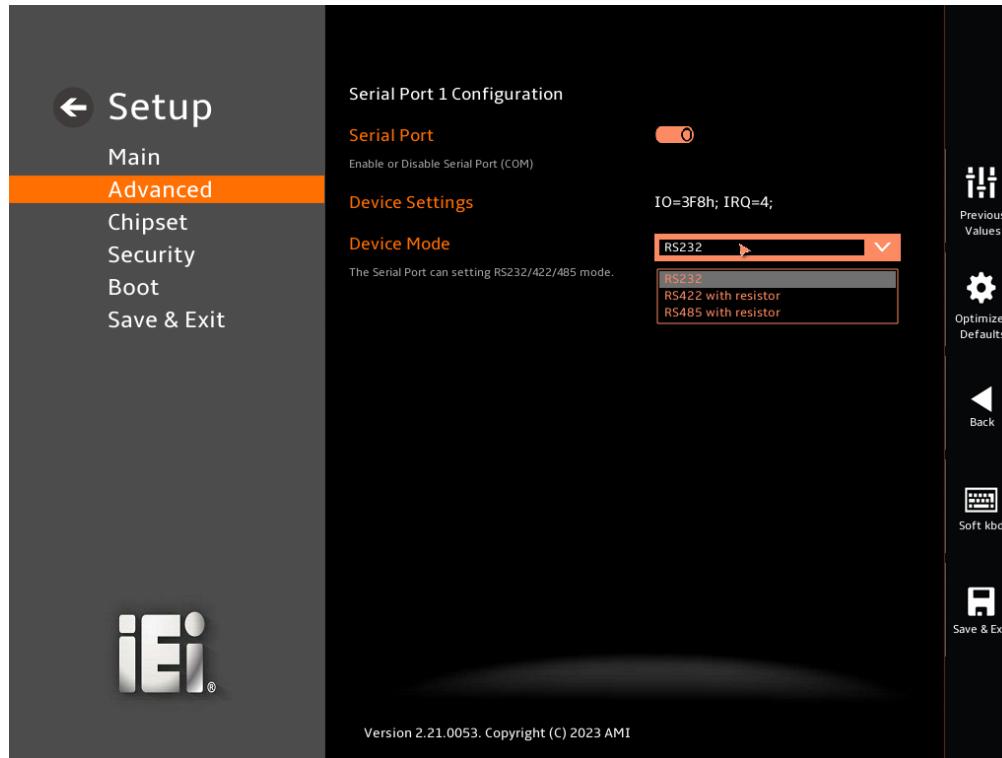

Use the **F81966 Super IO Configuration** menu (**BIOS Menu 9**) to set or change the configurations for the serial ports.

BIOS Menu 9: F81966 Super IO Configuration

5.3.5.1 Serial Port 1 Configuration

Use the **Serial Port 1 Configuration** menu (**BIOS Menu 10**) to configure the serial port.

BIOS Menu 10: Serial Port 1 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=3F8h;
IRQ=4** Serial Port I/O port address is 3F8h and the interrupt address is IRQ4

NANO-EHL SBC

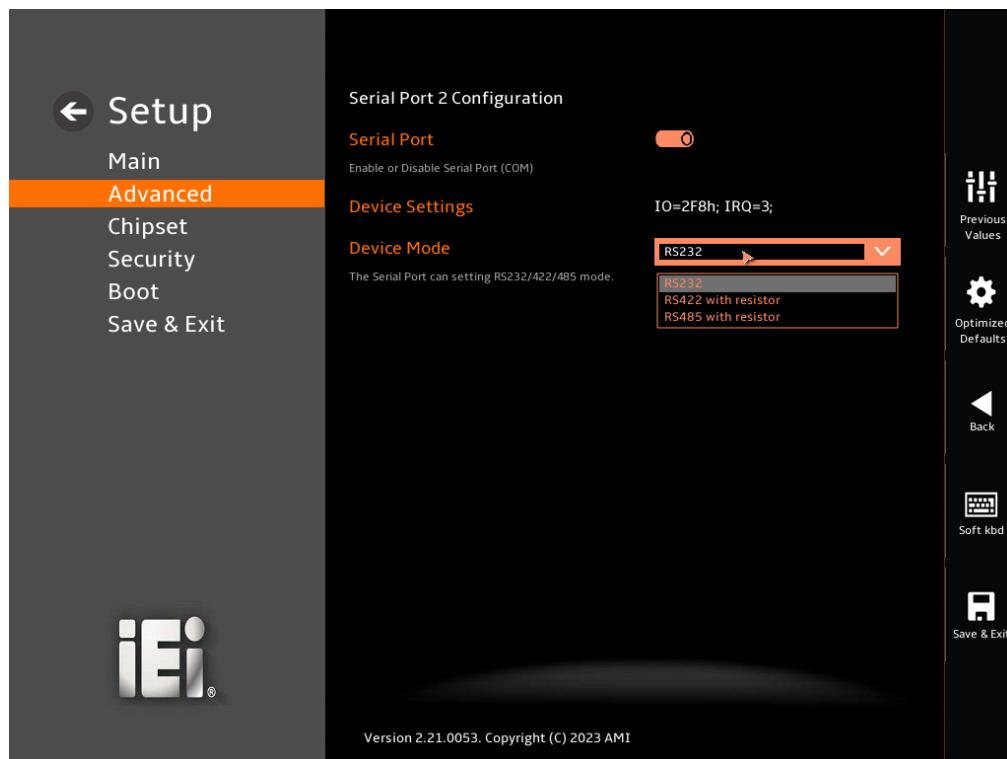

→ Device Mode

Use the **Device Mode** option to change the serial port mode.

- **RS232** The serial port mode is RS-232
- RS422 with Register** The serial port mode is RS-422
- RS485 with Register** The serial port mode is RS-485

5.3.5.2 Serial Port 2 Configuration

Use the **Serial Port 2 Configuration** menu (**BIOS Menu 11**) to configure the serial port.

BIOS Menu 11: Serial Port 2 Configuration Menu

→ Serial Port [Enabled]

Use the **Serial Port** option to enable or disable the serial port.

- **Disabled** Disable the serial port
- **Enabled** **DEFAULT** Enable the serial port

→ Device Settings

The **Device Settings** option shows the serial port IO port address and interrupt address.

- IO=2F8h;** Serial Port I/O port address is 2F8h and the interrupt
IRQ=3 address is IRQ3

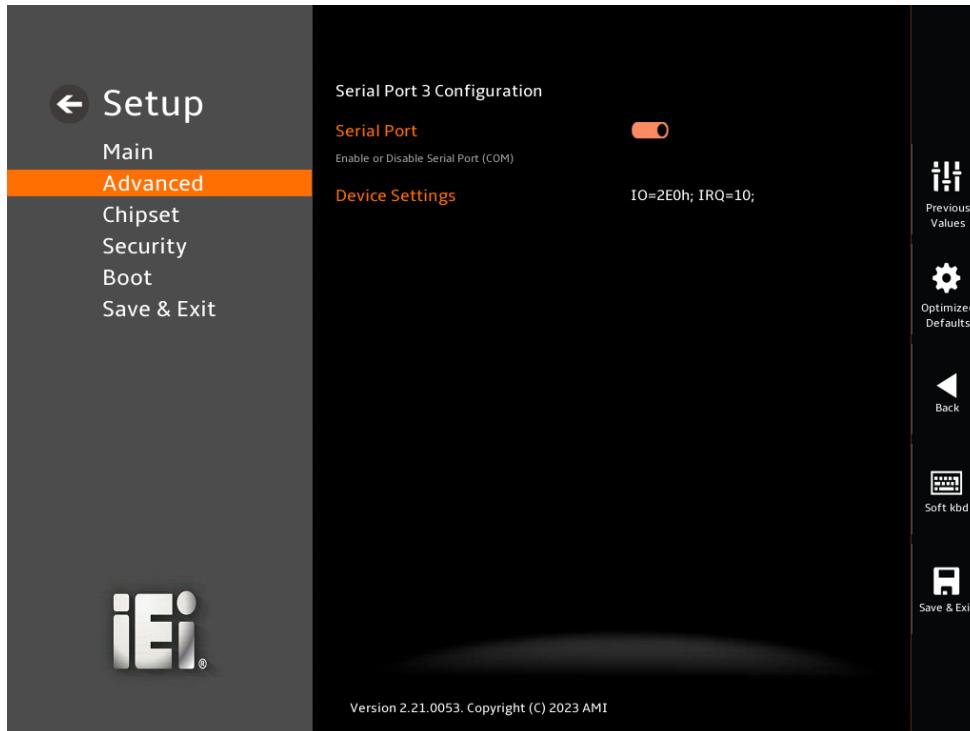

→ Device Mode

Use the **Device Mode** option to change the serial port mode.

- RS232** The serial port mode is RS-232
RS422 with Register The serial port mode is RS-422
RS485 with Register The serial port mode is RS-485

5.3.5.3 Serial Port 3 Configuration

Use the **Serial Port 3 Configuration** menu (**BIOS Menu 12**) to configure the serial port.

BIOS Menu 12: Serial Port 3 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

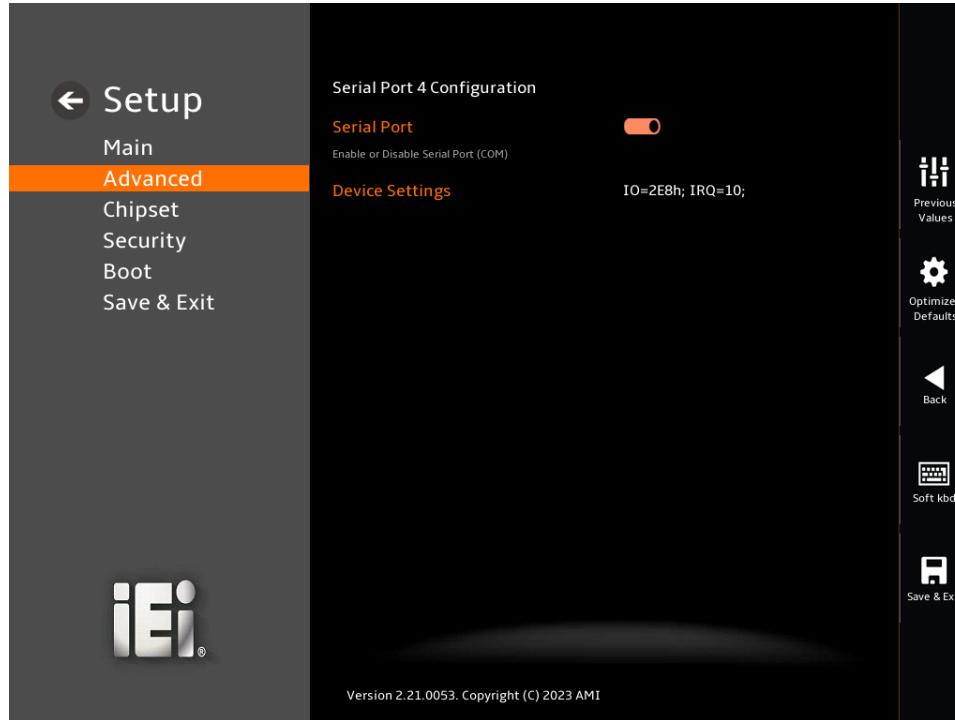

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=2E0h;
IRQ=10** Serial Port I/O port address is 2E0h and the interrupt address is IRQ10

5.3.5.4 Serial Port 4 Configuration

Use the **Serial Port 4 Configuration** menu (**BIOS Menu 13**) to configure the serial port.

BIOS Menu 13: Serial Port 4 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

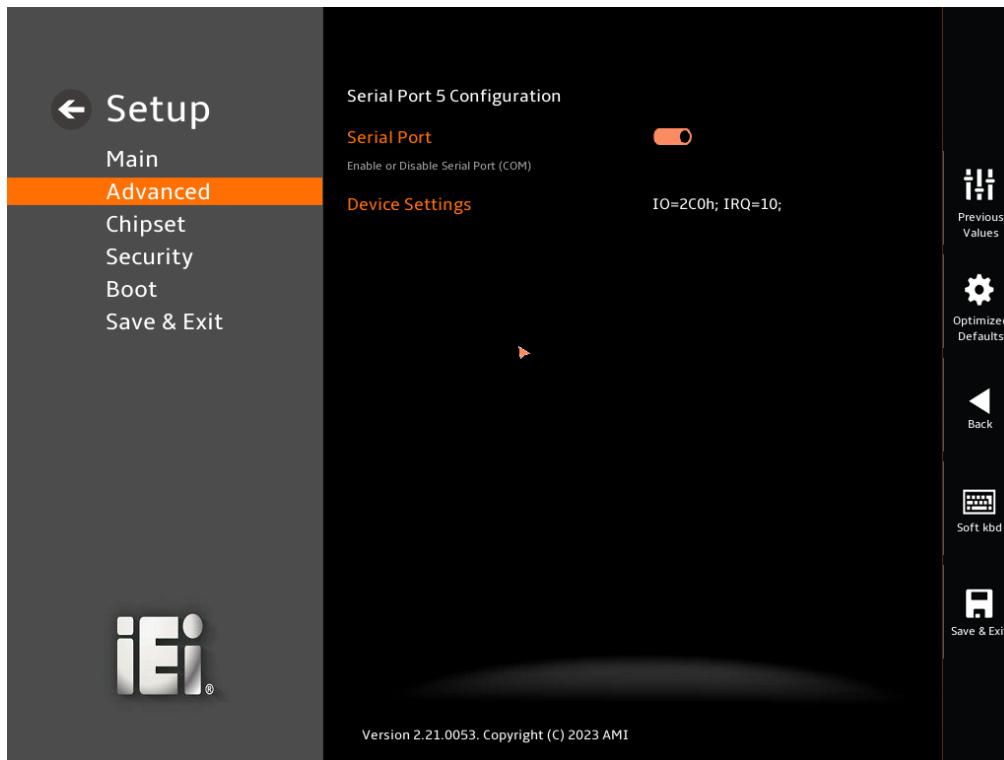

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=2E8h;
IRQ=10** Serial Port I/O port address is 2E8h and the interrupt address is IRQ10

5.3.5.5 Serial Port 5 Configuration

Use the **Serial Port 5 Configuration** menu (**BIOS Menu 14**) to configure the serial port.

BIOS Menu 14: Serial Port 5 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

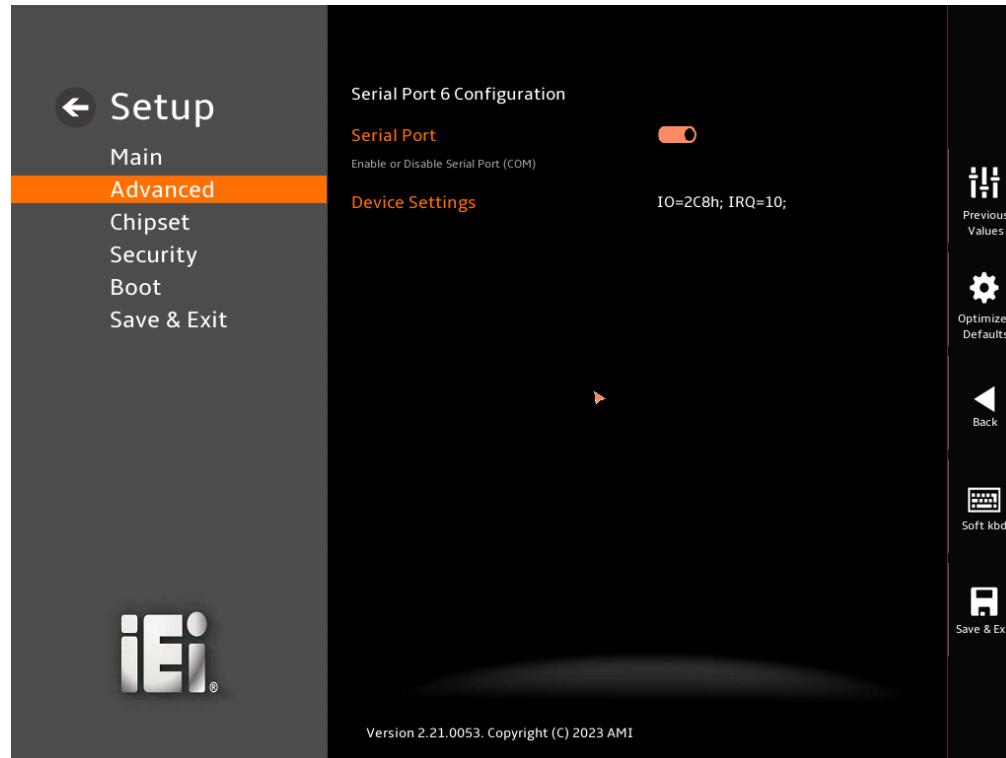

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=2C0h;
IRQ=10** Serial Port I/O port address is 2C0h and the interrupt address is IRQ10

5.3.5.6 Serial Port 6 Configuration

Use the **Serial Port 6 Configuration** menu (**BIOS Menu 15**) to configure the serial port.

BIOS Menu 15: Serial Port 6 Configuration Menu

→ **Serial Port [Enabled]**

Use the **Serial Port** option to enable or disable the serial port.

→ **Disabled** Disable the serial port

→ **Enabled DEFAULT** Enable the serial port

→ **Device Settings**

The **Device Settings** option shows the serial port IO port address and interrupt address.

→ **IO=2C0h;
IRQ=10** Serial Port I/O port address is 2C8h and the interrupt address is IRQ10

5.3.6 ENE KB9068 Monitor

The ENE KB9068 Monitor menu (**BIOS Menu 16**) contains the smart fan mode configuration submenu and shows the state of H/W real-time operating temperature, fan speeds and system voltages.

BIOS Menu 16: ENE KB9068 Monitor

→ PC Health Status

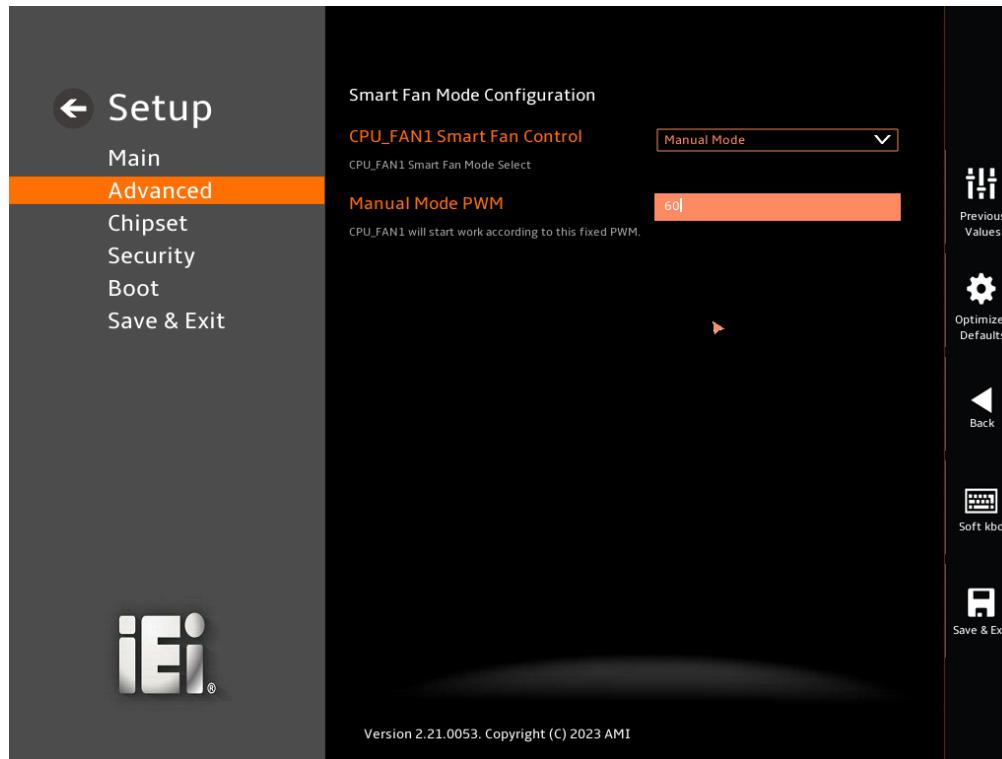

The following system parameters and values are shown. The system parameters that are monitored are:

- System Temperatures:
 - CPU Temperature
 - System Temperature
- Fan Speeds:
 - Fan1 Speed
- Voltages:
 - CPU_CORE

- +12V
- DDR
- +5VSB
- +3.3VSB

5.3.6.1 Smart Fan Mode Configuration

Use the **Smart Fan Mode Configuration** submenu (**BIOS Menu 17**) to configure the CPU/system fan start/off temperature and control mode.

BIOS Menu 17: Smart Fan Mode Configuration

→ CPU_FAN1 Smart Fan Control [Manual Mode]

Use the **Smart Fan Control** option to configure the CPU Smart Fan.

→ **Manual Mode** DEFAULT The fan spins at the speed set in Manual Mode settings.

NANO-EHL SBC

→ Auto Mode

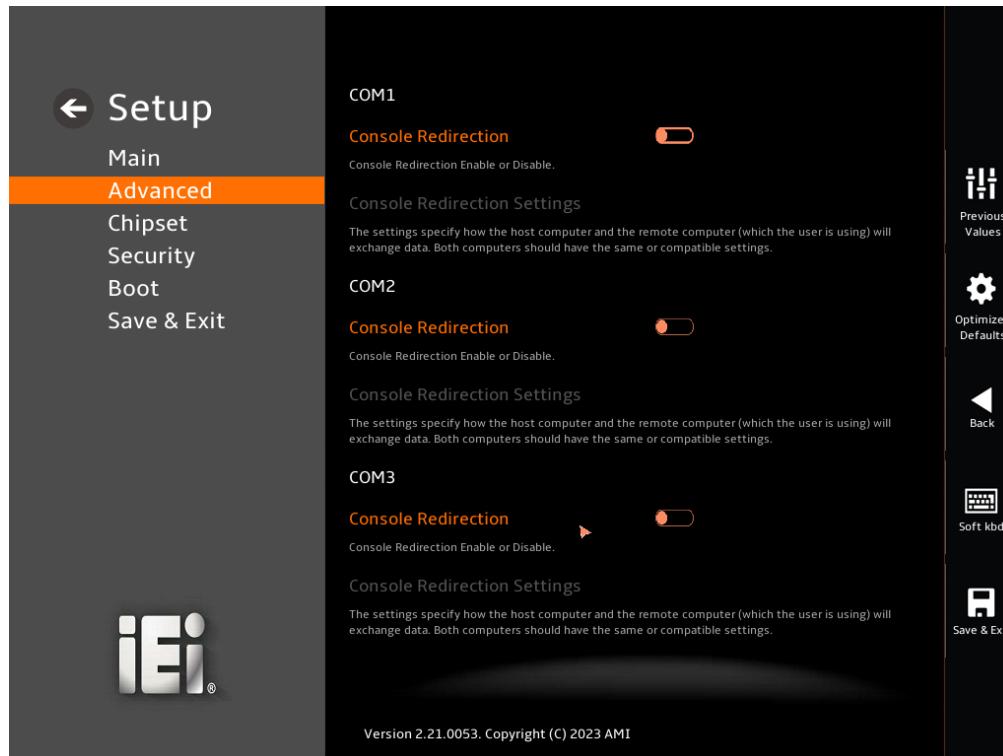

The fan adjusts its speed using Auto Mode settings.

→ Manual Mode PWM

Use the **Manual Mode PWM** option to set the PWM start value. Use the + or – key to change the value or enter a decimal number between 1 and 100.

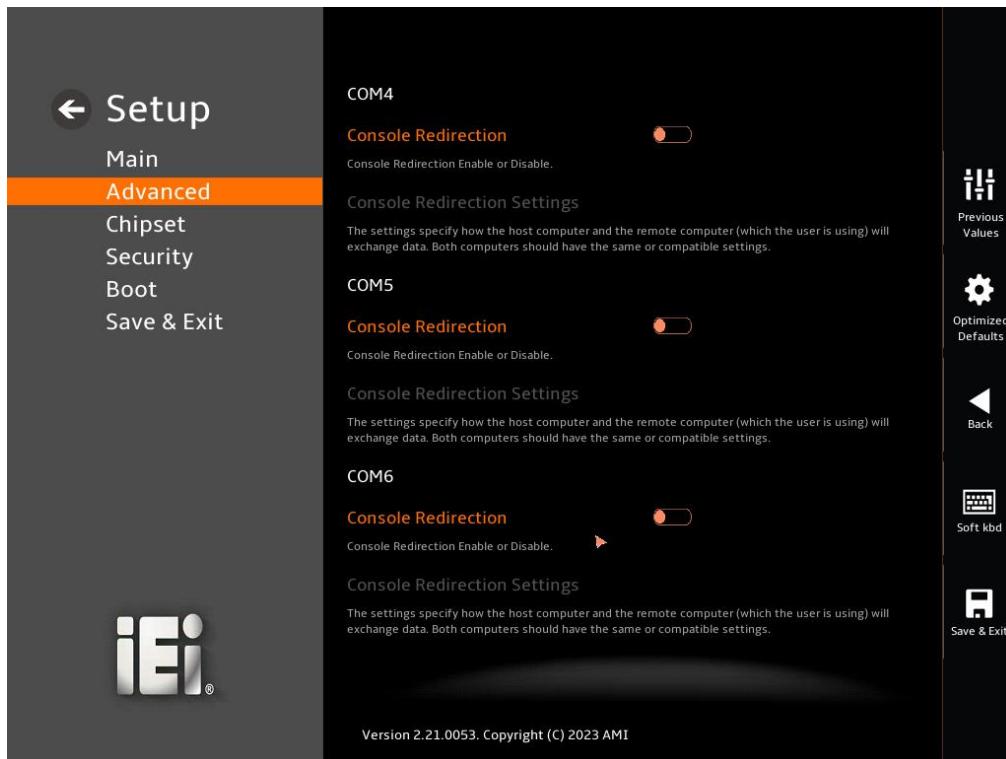

5.3.7 Serial Port Console Redirection

The **Serial Port Console Redirection** menu (**BIOS Menu 19**) allows the console redirection options to be configured. Console Redirection allows users to maintain a system remotely by re-directing keyboard input and text output through the serial port.

BIOS Menu 18: Serial Port Console Redirection

NANO-EHL SBC

**BIOS Menu 19: Serial Port Console Redirection****→ Console Redirection [Disabled]**

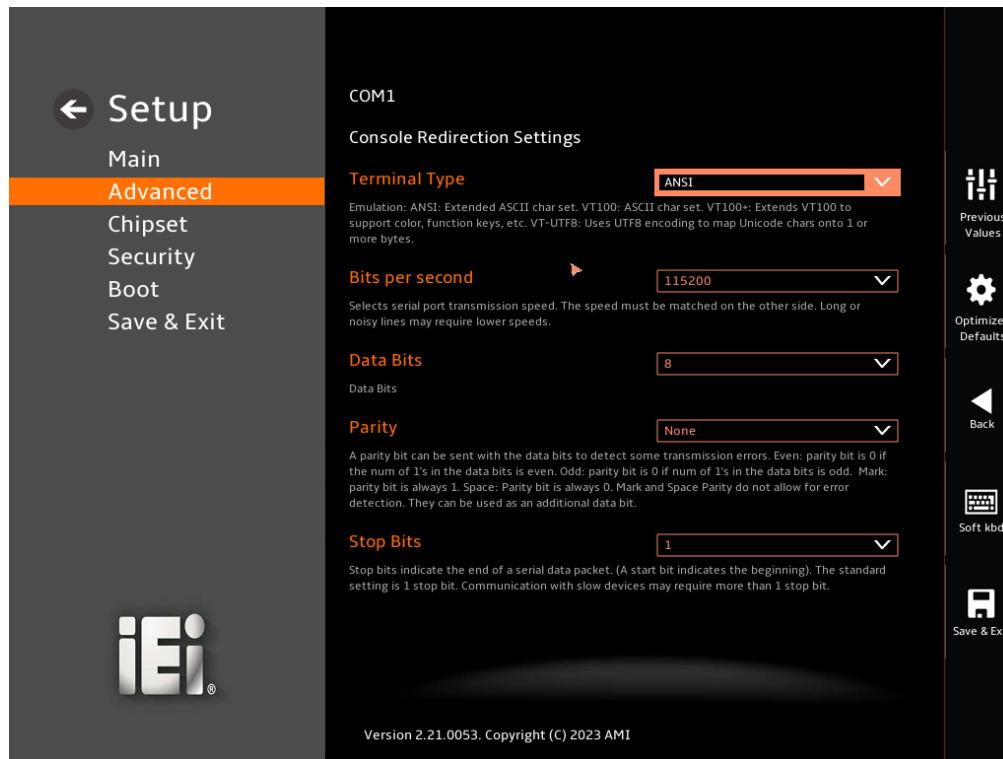

Use **Console Redirection** option to enable or disable the console redirection function.

- | | | | |
|----------|-----------------|----------------|---|
| → | Disabled | DEFAULT | Disabled the console redirection function |
| → | Enabled | | Enabled the console redirection function |

The **Console Redirection Settings** submenu will be available when the **Console Redirection** option is enabled.

5.3.7.1 Console Redirection Settings

The following options are available in the **Console Redirection Settings** submenu (**BIOS Menu 20**) when the **COM Console Redirection** (for COM1 to COM6) option is enabled.

BIOS Menu 20: COM Console Redirection Settings

→ Terminal Type [ANSI]

Use the **Terminal Type** option to specify the remote terminal type.

- **VT100** The target terminal type is VT100
- **VT100+** The target terminal type is VT100+
- **VT-UTF8** The target terminal type is VT-UTF8
- **ANSI** **DEFAULT** The target terminal type is ANSI

→ Bits per second [115200]

Use the **Bits per second** option to specify the serial port transmission speed. The speed must match on the other side. Long or noisy lines may require lower speeds.

- **9600** Sets the serial port transmission speed at 9600.
- **19200** Sets the serial port transmission speed at 19200.

NANO-EHL SBC

- ➔ **38400** Sets the serial port transmission speed at 38400.
- ➔ **57600** Sets the serial port transmission speed at 57600.
- ➔ **115200 DEFAULT** Sets the serial port transmission speed at 115200.

➔ Data Bits [8]

Use the **Data Bits** option to specify the number of data bits.

- ➔ **7** Sets the data bits at 7.
- ➔ **8 DEFAULT** Sets the data bits at 8.

➔ Parity [None]

Use the **Parity** option to specify the parity bit that can be sent with the data bits for detecting the transmission errors.

- ➔ **None DEFAULT** No parity bit is sent with the data bits.
- ➔ **Even** The parity bit is 0 if the number of ones in the data bits is even.
- ➔ **Odd** The parity bit is 0 if the number of ones in the data bits is odd.
- ➔ **Mark** The parity bit is always 1. This option does not allow for error detection.
- ➔ **Space** The parity bit is always 0. T This option does not allow for error detection.

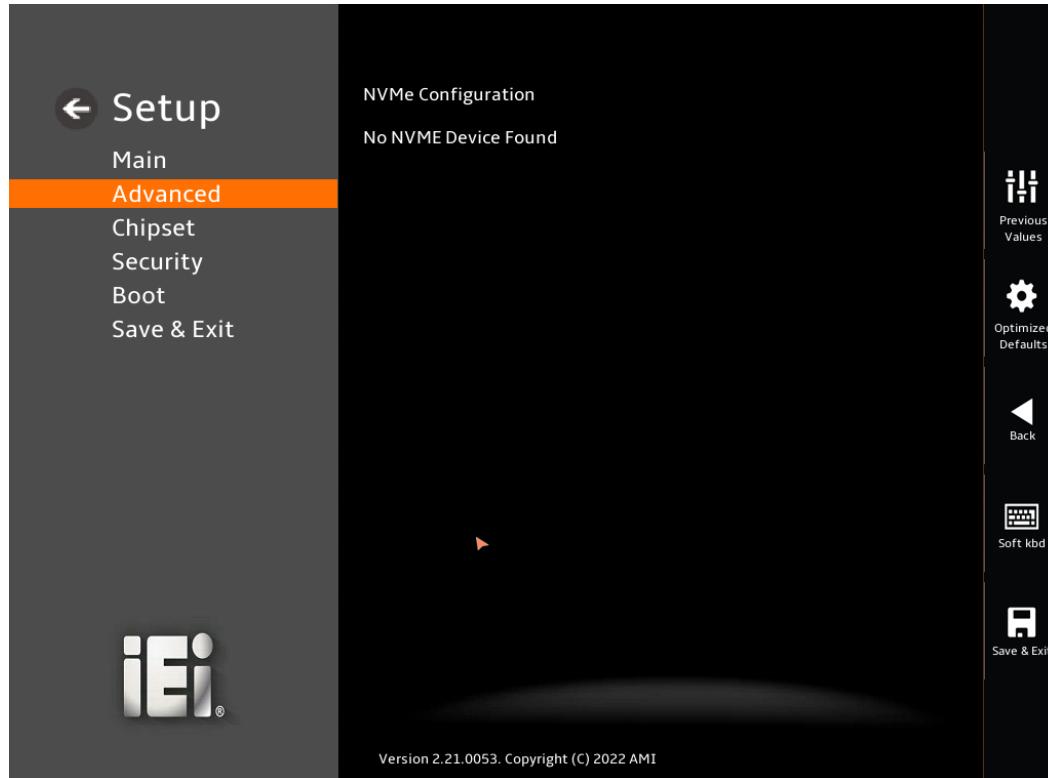

➔ Stop Bits [1]

Use the **Stop Bits** option to specify the number of stop bits used to indicate the end of a serial data packet. Communication with slow devices may require more than 1 stop bit.

- ➔ **1 DEFAULT** Sets the number of stop bits at 1.
- ➔ **2** Sets the number of stop bits at 2.

5.3.8 NVMe Configuration

Use the **NVMe Configuration (BIOS Menu 21)** menu to display the NVMe controller and device information.

BIOS Menu 21: NVMe Configuration

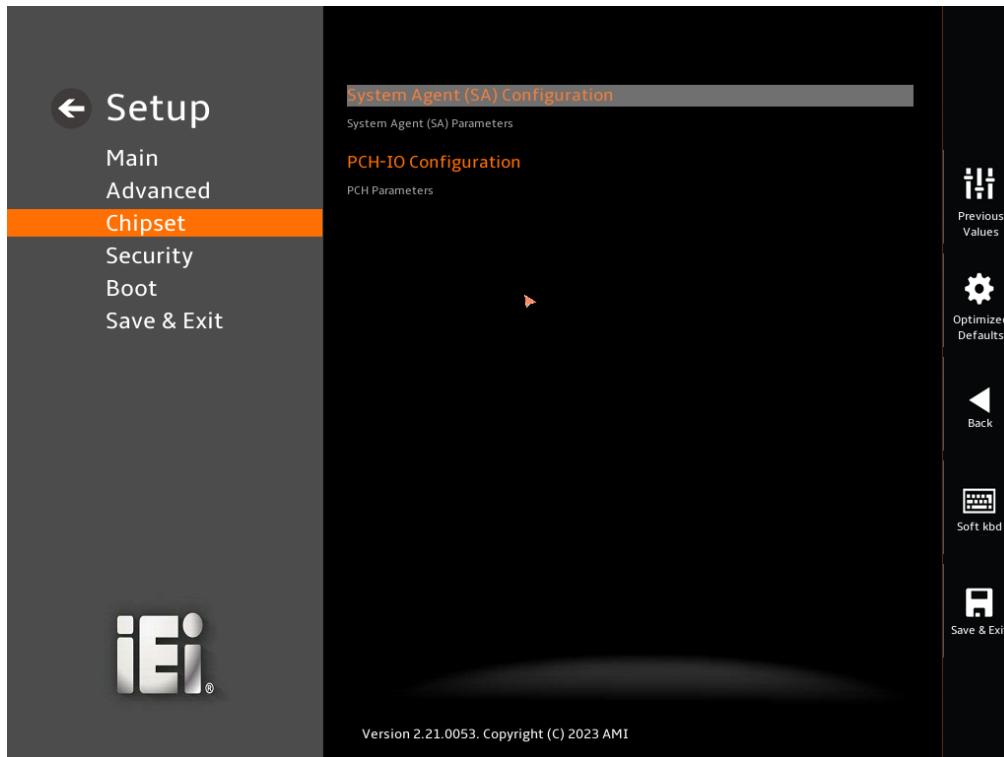

5.4 Chipset

Use the **Chipset** menu (**BIOS Menu 22**) to access the PCH IO and System Agent (SA) configuration menus.

WARNING!

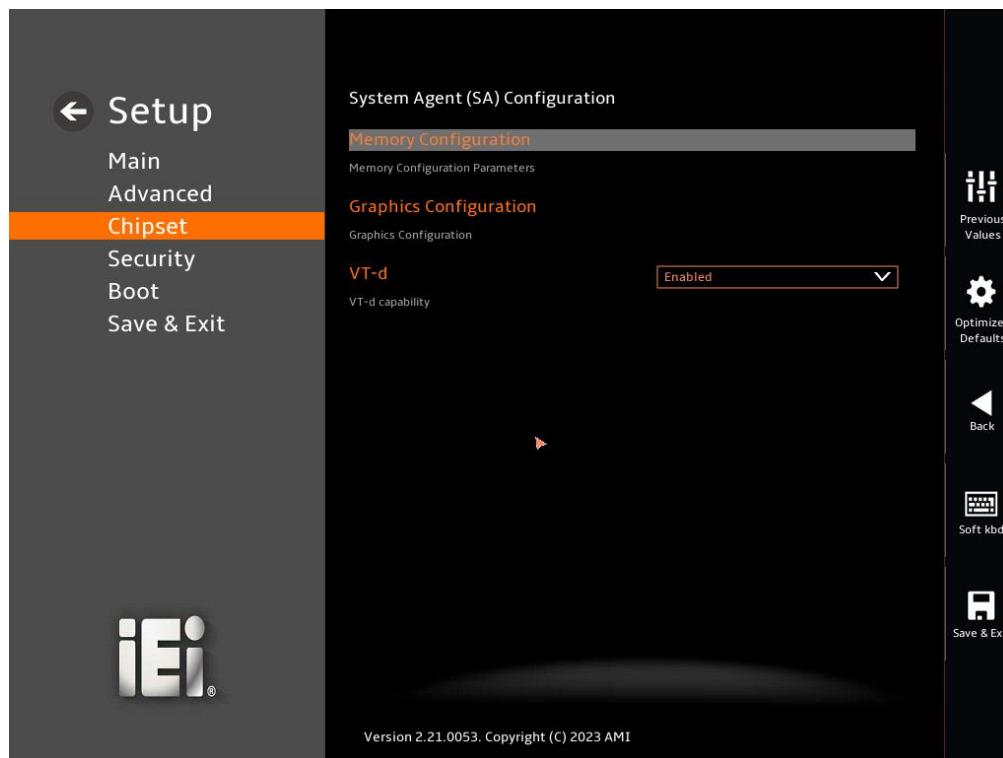

Setting the wrong values for the Chipset BIOS selections in the Chipset BIOS menu may cause the system to malfunction.

BIOS Menu 22: Chipset

5.4.1 System Agent (SA) Configuration

Use the **System Agent (SA) Configuration** menu (**BIOS Menu 23**) to configure the System Agent (SA) parameters.

BIOS Menu 23: System Agent (SA) Configuration

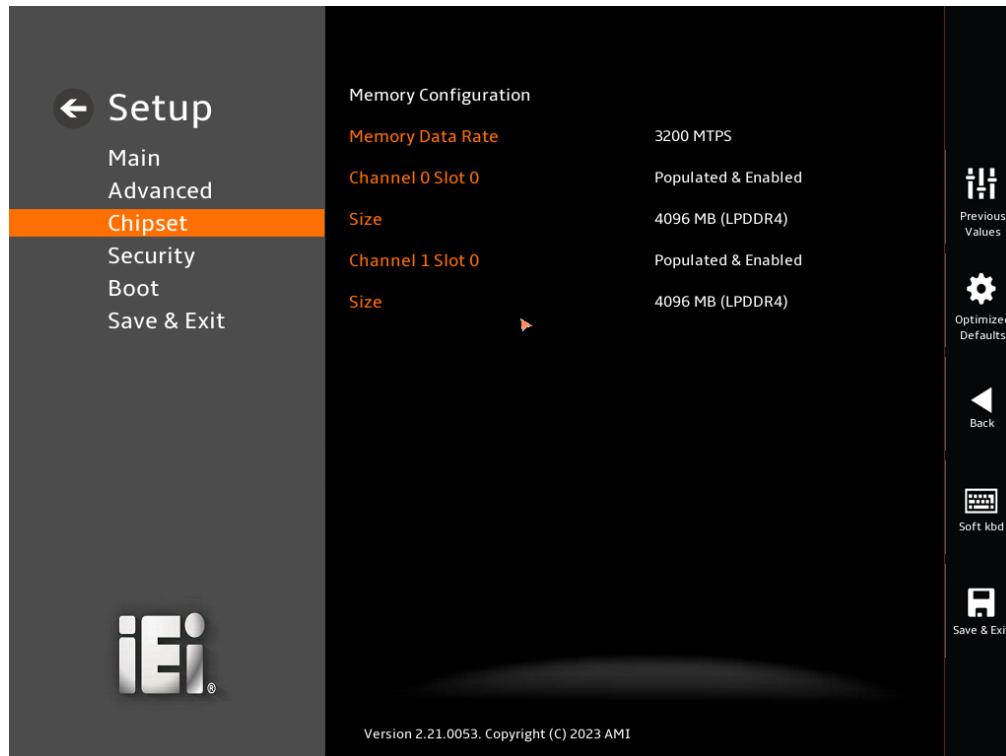

→ VT-d [Enabled]

Use the **VT-d** option to enable or disable the VT-d capability.

- | | |
|---------------------------------|-----------------------------|
| → Disabled | Disable the VT-d capability |
| → Enabled DEFAULT | Enable the VT-d capability |

5.4.1.1 Memory Configuration

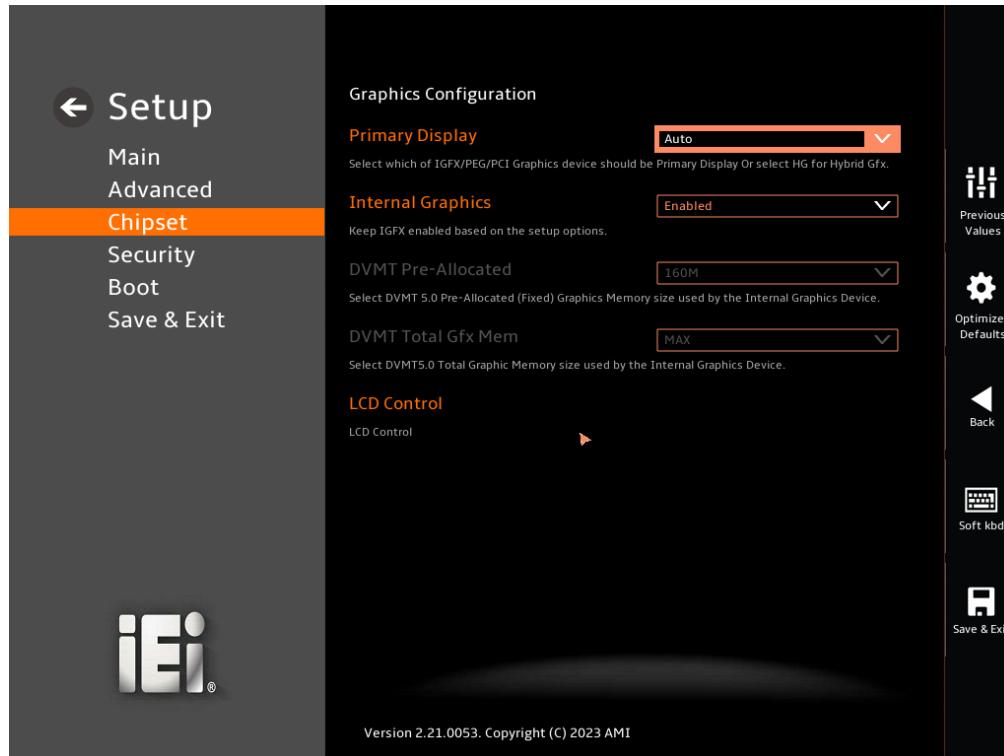

Use the **Memory Configuration** submenu (**BIOS Menu 24**) to view memory information.

BIOS Menu 24: Memory Configuration

5.4.1.2 Graphics Configuration

Use the **Graphics Configuration (BIOS Menu 25)** menu to configure the video device connected to the system.

BIOS Menu 25: Graphics Configuration

→ Primary Display [Auto]

Use the **Primary Display** option to select the primary graphics controller the system uses.

The following options are available:

- Auto **Default**
- IGFX
- PEG
- PCI

→ Internal Graphics [Enabled]

Use the **Internal Graphics** option to configure whether to keep IGFX enabled. If user wants to support dual display by internal graphics and external graphics, this Internal Graphics

NANO-EHL SBC

option should be set to Enabled and the above Primary Display option should be set to IGFX.

- ➔ **Auto** Auto mode
- ➔ **Disabled** Disables IGFX.
- ➔ **Enabled** **Default** Enables IGFX.

➔ DVMT Pre-Allocated [160M]

Use the **DVMT Pre-Allocated** option to set the amount of system memory allocated to the integrated graphics processor when the system boots. The system memory allocated can then only be used as graphics memory, and is no longer available to applications or the operating system. Configuration options are listed below:

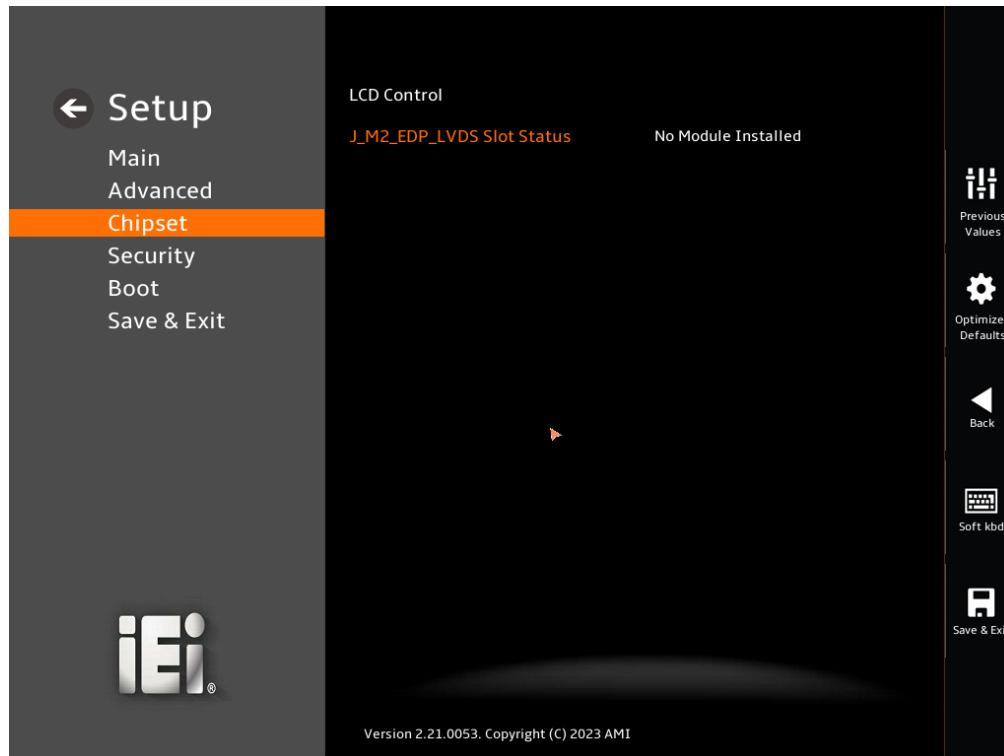

- 80M
- 160M **Default**

➔ DVMT Total Gfx Mem [MAX]

Use the **DVMT Total Gfx Mem** option to select DVMT5.0 total graphic memory size used by the internal graphic device. The following options are available:

- 128M
- 256M
- MAX **Default**

→ LCD Control

BIOS Menu 26: LCD Control

NANO-EHL SBC

5.4.2 PCH-IO Configuration

Use the PCH-IO Configuration menu (BIOS Menu 27) to configure the PCH parameters.

BIOS Menu 27: PCH-IO Configuration

→ Auto Power Button Function [Enabled(AT)]

Use the **Auto Power Button Function** BIOS option to show the power mode state. Use the **J_ATX_AT1** to switch the AT/ATX power mode.

→ Enabled (AT)

The system power mode is AT.

→ Disabled
(ATX)

The system power mode is ATX.

→ Restore AC Power Loss [Last State]

Use the **Restore AC Power Loss** BIOS option to specify what state the system returns to if there is a sudden loss of power to the system when the power mode is ATX.

→ Power Off

The system remains turned off

- ➔ **Power On** The system turns on
- ➔ **Last State** **DEFAULT** The system returns to its previous state. If it was on, it turns itself on. If it was off, it remains off.

➔ **M2_1 PCIE/USB Switch [PCIE]**

Use the **M2_1 PCIE/USB Switch** to select the M.2 A key's signal.

- ➔ **PCIE** **DEFAULT** Set the M.2 A key signal to PCIe.
- ➔ **USB** Set the M.2 A key signal to USB.

➔ **Power Saving Function(EUP) [Disabled]**

Use the **Power Saving Function(EUP)** BIOS option to enable or disable the power saving function.

- ➔ **Disabled** **DEFAULT** Power saving function is disabled.
- ➔ **Enabled** Power saving function is enabled. It will reduce power consumption when the system is off.

➔ **USB Power SW1 [+5V DUAL]**

Use the **USB Power SW1** BIOS option to configure the USB power source for the corresponding USB connectors (Figure 5-2).

- ➔ **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- ➔ **+5V** Sets the USB power source to +5V

➔ **USB Power SW2 [+5V DUAL]**

Use the **USB Power SW2** BIOS option to configure the USB power source for the corresponding USB connectors (Figure 5-2).

- ➔ **+5V DUAL** **DEFAULT** Sets the USB power source to +5V dual
- ➔ **+5V** Sets the USB power source to +5V

NANO-EHL SBC

→ USB Power SW3 [+5V DUAL]

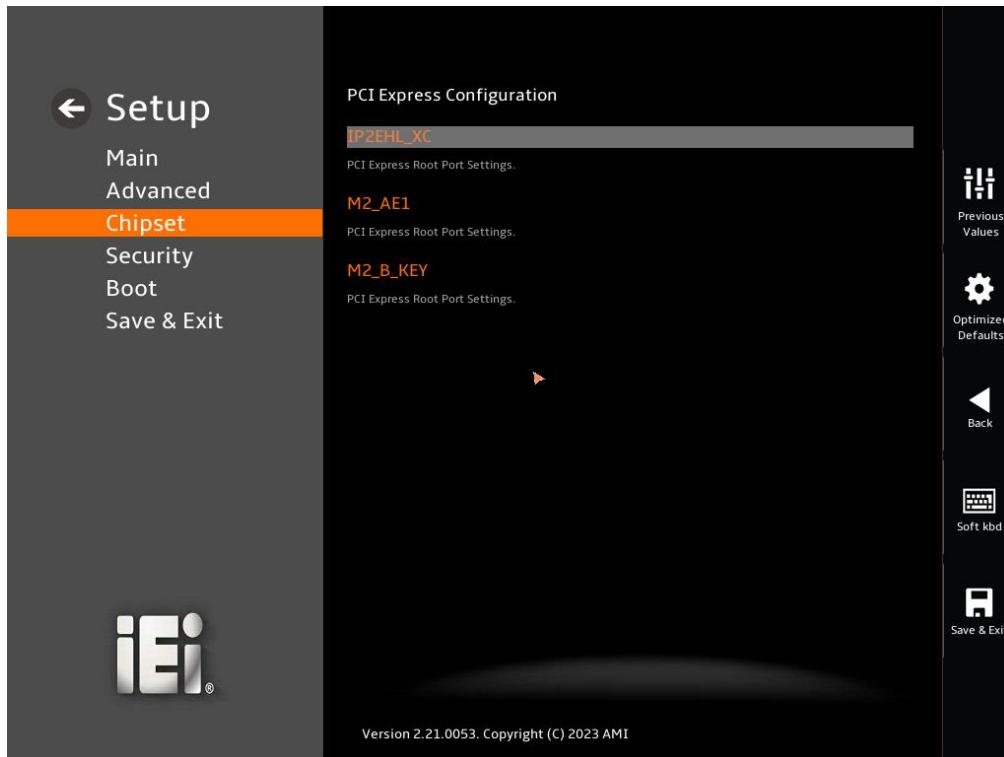

Use the **USB Power SW3** BIOS option to configure the USB power source for the corresponding USB connectors (Figure 5-2).

BIOS Options	Configured USB Ports
USB Power SW1	USB30_CON1 (external USB 3.2 Gen 2 ports)
USB Power SW2	USB20_CON1 (external USB 2.0 ports)
USB Power SW3	USB2_1 (internal USB 2.0 ports)

Figure 5-2: BIOS Options and Configured USB Ports

5.4.2.1 PCI Express Configuration

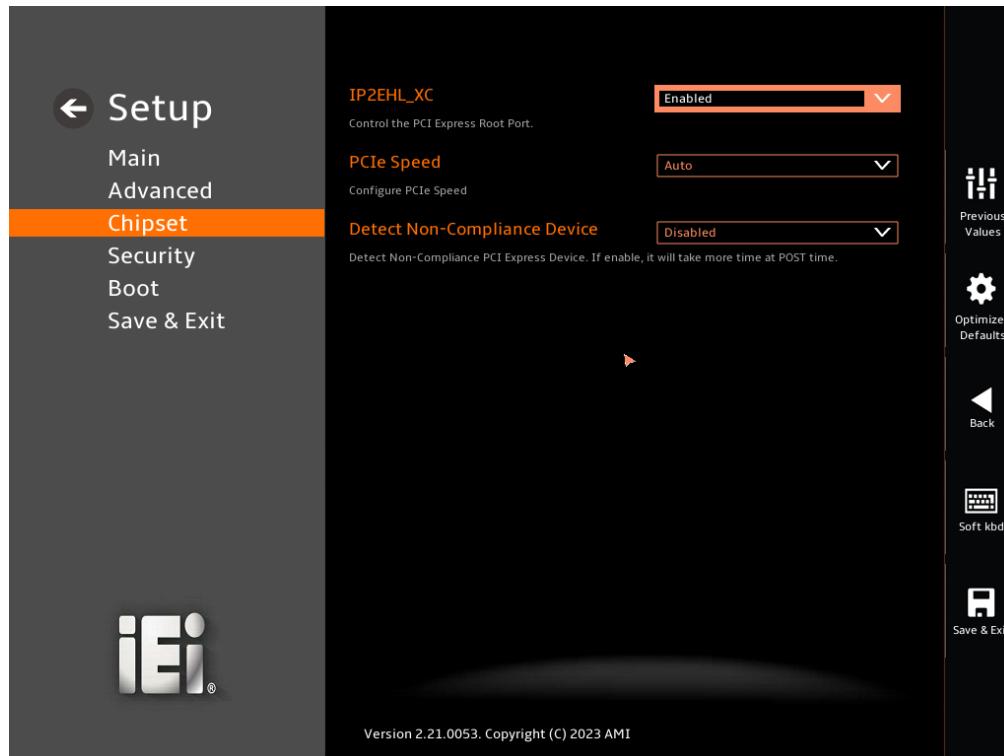

Use the **PCI Express Configuration** submenu (**BIOS Menu 28**) to configure the PCI Express slots and M.2 slots.

BIOS Menu 28: PCI Express Configuration

5.4.2.1.1 PCIe Root Port Setting

Use the **IP2EHL_XC** submenu (**BIOS Menu 29**) to configure the PCIe root port setting.

BIOS Menu 29: PCIe Slot Configuration Submenu

→ **PCIe Speed [Auto]**

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

- | | | |
|---------------|----------------|-------------------------------|
| → Auto | DEFAULT | Auto mode. |
| → Gen1 | | Configure PCIe Speed to Gen1. |
| → Gen2 | | Configure PCIe Speed to Gen2. |
| → Gen3 | | Configure PCIe Speed to Gen3. |

→ **Detect Non-Compliance Device [Disabled]**

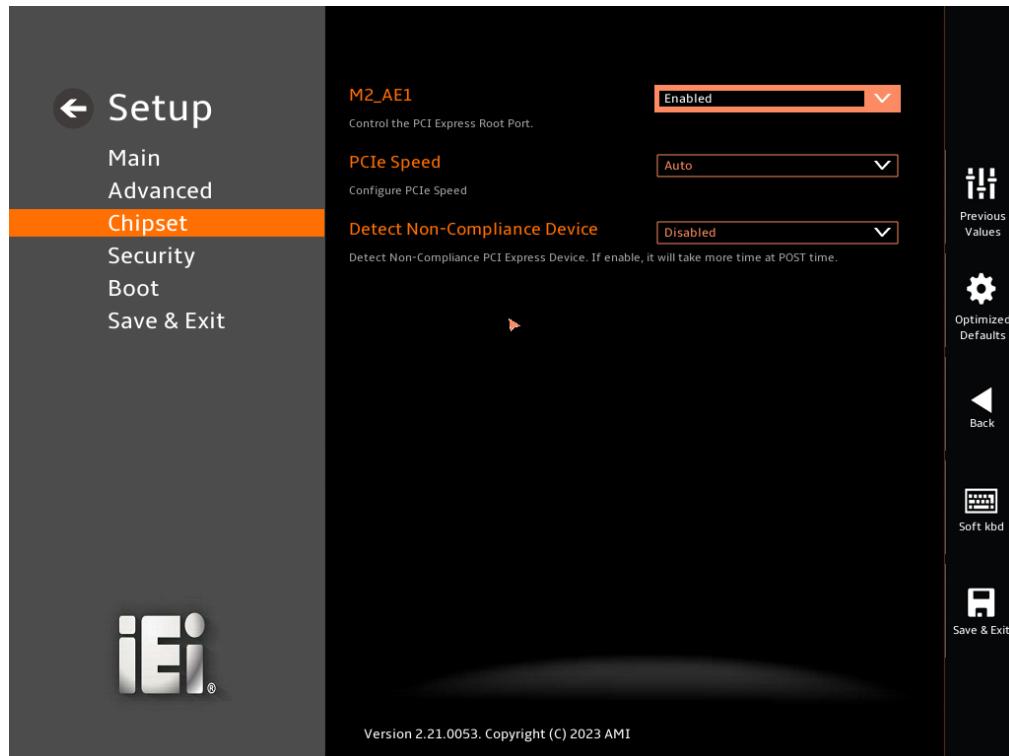

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

NANO-EHL SBC

- | | | |
|--|---|--|
| <p>→ Disabled</p> <p>→ Enabled</p> | <p>DEFAULT</p> <p>M2_AE1</p> <p>Control the PCI Express Root Port.</p> <p>PCIe Speed</p> <p>Configure PCIe Speed</p> <p>Detect Non-Compliance Device</p> <p>Detect Non-Compliance PCI Express Device. |--|---|--|

5.4.2.1.2 M2_AE1 Slot

Use the **M2_AE1** menu (**BIOS Menu 30**) to configure the M.2 A key slot.

**BIOS Menu 30: M2_A_KEY****→ PCIe Speed [Auto]**

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

- | | |
|--|---|
| <p>→ Auto</p> <p>→ Gen1</p> <p>→ Gen2</p> | <p>DEFAULT</p> <p>Auto mode.</p> <p>Configure PCIe Speed to Gen1.</p> <p>Configure PCIe Speed to Gen2.</p> |
|--|---|

→ Gen3

Configure PCIe Speed to Gen3.

→ Detect Non-Compliance Device [Disabled]

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

→ Disabled

DEFAULT Do not detect if a non-compliance PCI Express device is connected to the PCI Express port.

→ Enabled

Detect if a non-compliance PCI Express device is connected to the PCI Express port.

5.4.2.1.3 M2_B_KEY Slot

Use the **M2_B_KEY** menu (**BIOS Menu 31**) to configure the M.2 B key slot.

BIOS Menu 31: M2_B_KEY

→ PCIe Speed [Auto]

Use the **PCIe Speed** option to specify the PCI Express port speed. Configuration options are listed below.

NANO-EHL SBC

- ➔ **Auto** **DEFAULT** Auto mode.
- ➔ **Gen1** Configure PCIe Speed to Gen1.
- ➔ **Gen2** Configure PCIe Speed to Gen2.
- ➔ **Gen3** Configure PCIe Speed to Gen3.

➔ **Detect Non-Compliance Device [Disabled]**

Use the **Detect Non-Compliance Device** option to configure whether to detect if a non-compliance PCI Express device is connected to the PCI Express port.

- ➔ **Disabled** **DEFAULT** Do not detect if a non-compliance PCI Express device is connected to the PCI Express port.
- ➔ **Enabled** Detect if a non-compliance PCI Express device is connected to the PCI Express port.

5.4.2.2 SATA Configuration

Use the **SATA Configuration** menu (**BIOS Menu 32**) to change and/or set the configuration of the SATA devices installed in the system.

BIOS Menu 32: SATA Configuration

→ **SATA Controller(s) [Enabled]**

Use the **SATA Controller(s)** option to configure the SATA controller(s).

- | | | |
|-------------------|----------------|---|
| → Enabled | DEFAULT | Enables the on-board SATA controller(s). |
| → Disabled | | Disables the on-board SATA controller(s). |

→ **SATA Mode Selection [AHCI]**

Use the **SATA Mode Selection** option to determine how the SATA devices operate.

- | | | |
|---------------|----------------|---|
| → AHCI | DEFAULT | Configures SATA devices as AHCI device. |
|---------------|----------------|---|

NANO-EHL SBC

- ➔ **Intel RST Premium With Intel Optane System Acceleration** Configures SATA devices to the Intel RST Premium With Intel Optane System Acceleration mode.

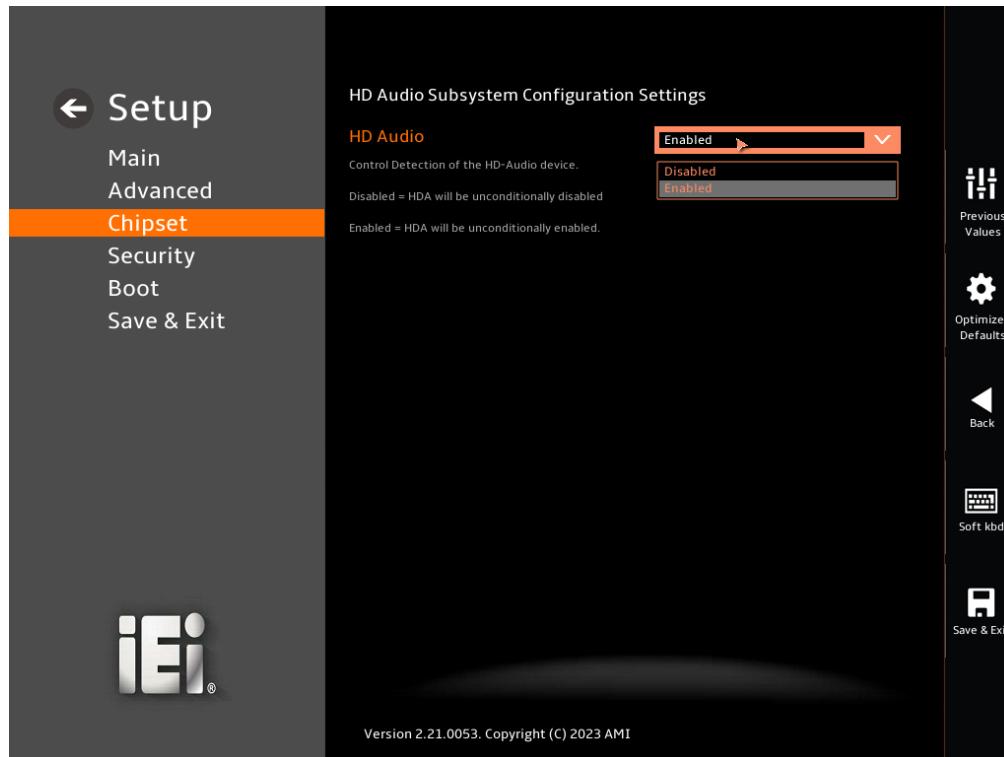

➔ **Hot Plug [Disabled]**

Use the **Hot Plug** option (for SATA1 to SATA2) to designate the correspondent port as hot-pluggable.

- ➔ **Disabled** **DEFAULT** Disables the hot-pluggable function of the SATA port.
- ➔ **Enabled** Designates the SATA port as hot-pluggable.

5.4.2.3 HD Audio Configuration

Use the **HD Audio Configuration** menu (**BIOS Menu 33**) to configure the PCH Azalia settings.

BIOS Menu 33: HD Audio Configuration

→ HD Audio [Enabled]

Use the **HD Audio** option to enable or disable the High Definition Audio controller.

- | | |
|---------------------------------|---|
| → Disabled | The onboard High Definition Audio controller is disabled. |
| → Enabled DEFAULT | The onboard High Definition Audio controller is enabled. |

5.5 Security

Use the **Security** menu (**BIOS Menu 34**) to set system and user passwords.

BIOS Menu 34: Security

→ Administrator Password

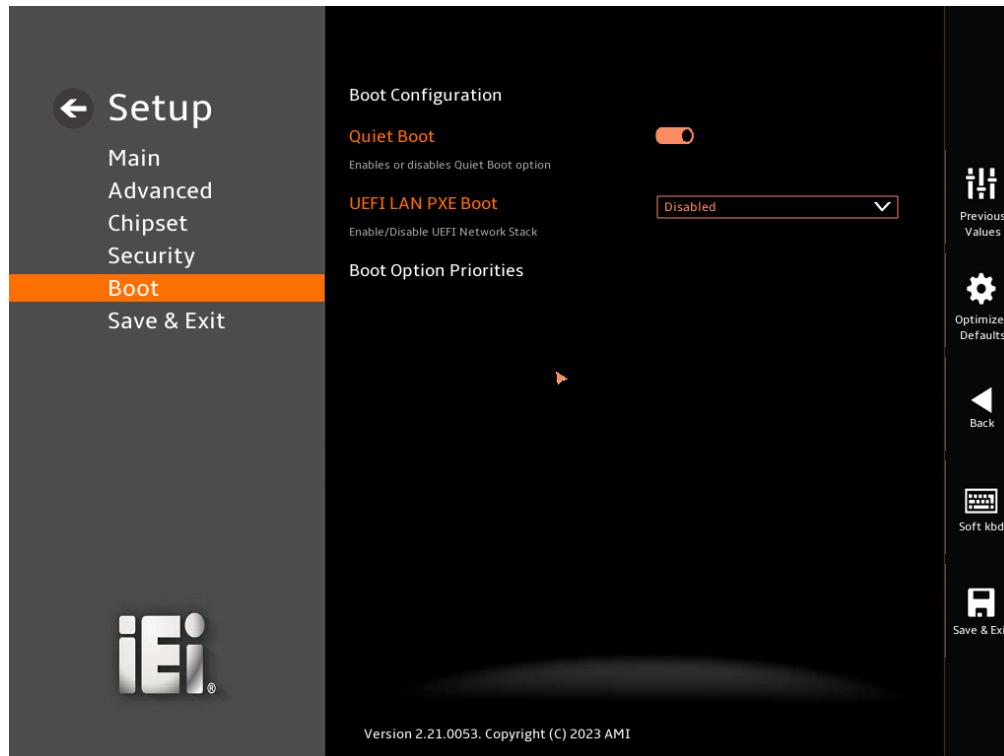

Use the **Administrator Password** to set or change a administrator password.

→ User Password

Use the **User Password** to set or change a user password.

5.6 Boot

Use the **Boot** menu (**BIOS Menu 35**) to configure system boot options.

BIOS Menu 35: Boot

→ Quiet Boot [Enabled]

Use the **Quiet Boot** BIOS option to select the screen display when the system boots.

- | | |
|---------------------------------|---|
| → Disabled | Normal POST messages displayed |
| → Enabled DEFAULT | OEM Logo displayed instead of POST messages |

→ UEFI LAN PXE Boot [Disabled]

Use the **UEFI LAN PXE Boot** option to enable or disable boot option for legacy network devices.

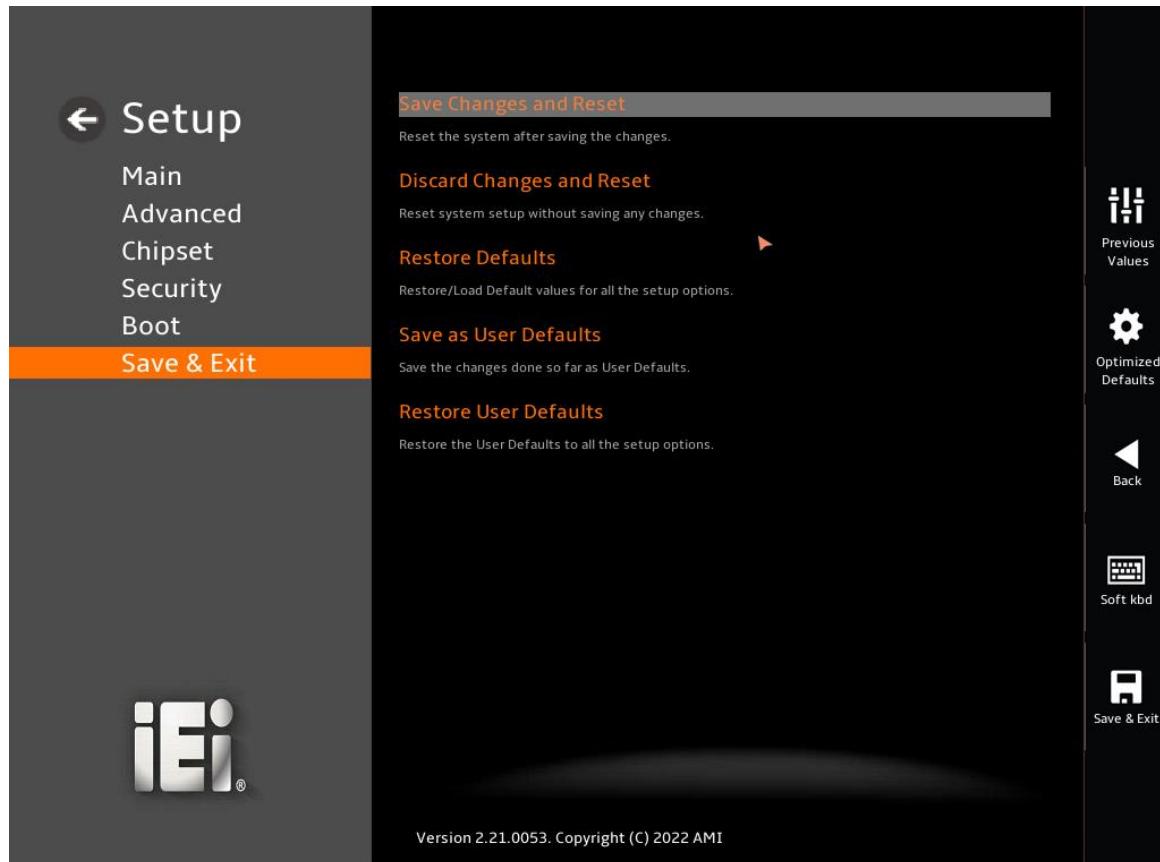

- | | | |
|-------------------|----------------|----------------------|
| → Disabled | DEFAULT | Disabled the lan pxe |
|-------------------|----------------|----------------------|

NANO-EHL SBC

- Enabled Enable the lan pxe

5.7 Save & Exit

Use the **Save & Exit** menu (**BIOS Menu 36**) to load default BIOS values, optimal failsafe values and to save configuration changes.

BIOS Menu 36: Save & Exit

→ Save Changes and Reset

Use the **Save Changes and Reset** option to save the changes made to the BIOS options and reset the system.

→ Discard Changes and Reset

Use the **Discard Changes and Reset** option to exit the system without saving the changes made to the BIOS configuration setup program.

→ **Restore Defaults**

Use the **Restore Defaults** option to load the optimal default values for each of the parameters on the Setup menus. **F3 key can be used for this operation.**

→ **Save as User Defaults**

Use the **Save as User Defaults** option to save the changes done so far as user defaults.

→ **Restore User Defaults**

Use the **Restore User Defaults** option to restore the user defaults to all the setup options.

Appendix

A

Regulatory Compliance

DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with specifications for CE marking. If the user modifies and/or installs other devices in the equipment, the CE conformity declaration may no longer apply.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Appendix

B

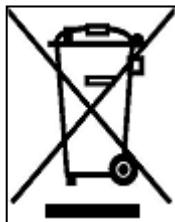

Product Disposal

**CAUTION:**

Risk of explosion if battery is replaced by an incorrect type. Only certified engineers should replace the on-board battery.

Dispose of used batteries according to instructions and local regulations.

- Outside the European Union—if you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority so as to comply with the correct disposal method.
- Within the European Union—the device that produces less waste and is easier to recycle is classified as electronic device in terms of the European Directive 2012/19/EU (WEEE), and must not be disposed of as domestic garbage.

EU-wide legislation, as implemented in each Member State, requires that waste electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you need to dispose of your device, please follow the guidance of your local authority, or ask the shop where you purchased the product. The mark on electrical and electronic products only applies to the current European Union Member States.

Please follow the national guidelines for electrical and electronic product disposal.

C

BIOS Options

Below is a list of BIOS configuration options in the BIOS chapter.

→ BIOS Information	73
→ Compute Die Information	73
→ PCH Information.....	73
→ System Date [xx/xx/xx]	74
→ System Time [xx:xx:xx]	74
→ Case Open Detection [Disabled]	76
→ Intel (VMX) Virtualization Technology [Enabled]	78
→ Active Processor Cores [All]	78
→ EIST [Enable].....	78
→ C states [Disabled].....	78
→ Power Limit 1.....	79
→ Power Limit 1 Time Window	79
→ Power Limit 2.....	79
→ Tcc Activation Offset [0].....	79
→ Turbo Mode [Enabled]	79
→ TPM Support [Enable]	80
→ Pending Operation [None]	80
→ Wake system with Fixed Time [Enabled].....	81
→ Serial Port [Enabled].....	84
→ Device Settings	84
→ Device Mode	85
→ Serial Port [Enabled].....	85
→ Device Settings	86
→ Device Mode	86
→ Serial Port [Enabled].....	87
→ Device Settings	87
→ Serial Port [Enabled].....	88

→ PC Health Status	91

NANO-EHL SBC

→ Smart Fan Control [Auto Mode].....	92
→ CPU_FAN1 Start PWM	93
→ Console Redirection [Disabled].....	95
→ Terminal Type [ANSI].....	96
→ Bits per second [115200].....	96
→ Data Bits [8]	97
→ Parity [None].....	97
→ Stop Bits [1].....	97
→ VT-d [Enabled].....	100
→ Primary Display [Auto]	102
→ Internal Graphics [Enabled]	102
→ DVMT Pre-Allocated [160M]	103
→ DVMT Total Gfx Mem [MAX].....	103
→ LCD Control	104
→ Auto Power Button Function [Enabled(AT)]	105
→ Restore AC Power Loss [Last State]	105
→ M2_1 PCIE/USB Switch [PCIE].....	106
→ Power Saving Function(EUP) [Disabled].....	106
→ USB Power SW1 [+5V DUAL].....	106
→ USB Power SW2 [+5V DUAL].....	106
→ USB Power SW3 [+5V DUAL].....	107
→ PCIe Speed [Auto].....	108
→ Detect Non-Compliance Device [Disabled]	108
→ PCIe Speed [Auto].....	109
→ Detect Non-Compliance Device [Disabled]	110
→ PCIe Speed [Auto].....	110
→ Detect Non-Compliance Device [Disabled]	111
→ SATA Controller(s) [Enabled]	112
→ SATA Mode Selection [AHCI].....	112
→ Hot Plug [Disabled]	113
→ HD Audio [Auto]	114
→ Administrator Password	115
→ User Password	115
→ Quiet Boot [Enabled]	116
→ UEFI LAN PXE Boot [Disabled].....	116

→ Save Changes and Reset	117
→ Discard Changes and Reset	117
→ Restore Defaults	118
→ Save as User Defaults	118
→ Restore User Defaults	118

Appendix

D

Watchdog Timer

**NOTE:**

The following discussion applies to DOS environment. Contact IEI support or visit the IEI website for specific drivers for other operating systems.

The Watchdog Timer is provided to ensure that standalone systems can always recover from catastrophic conditions that cause the CPU to crash. This condition may have occurred by external EMIs or a software bug. When the CPU stops working correctly, Watchdog Timer either performs a hardware reset (cold boot) or a Non-Maskable Interrupt (NMI) to bring the system back to a known state.

A BIOS function call (INT 15H) is used to control the Watchdog Timer.

INT 15H:

AH – 6FH Sub-function:	
AL – 2:	Sets the Watchdog Timer's period.
BL:	Time-out value (Its unit-second is dependent on the item "Watchdog Timer unit select" in CMOS setup).

Table D-1: AH-6FH Sub-function

Call sub-function 2 to set the time-out period of Watchdog Timer first. If the time-out value is not zero, the Watchdog Timer starts counting down. When the timer value reaches zero, the system resets. To ensure that this reset condition does not occur, calling sub-function 2 must periodically refresh the Watchdog Timer. However, the watchdog timer is disabled if the time-out value is set to zero.

A tolerance of at least 10% must be maintained to avoid unknown routines within the operating system (DOS), such as disk I/O that can be very time-consuming.

**NOTE:**

When exiting a program it is necessary to disable the Watchdog Timer, otherwise the system resets.

EXAMPLE PROGRAM:

```
; INITIAL TIMER PERIOD COUNTER

;

W_LOOP:
;

    MOV      AX, 6F02H      ;setting the time-out value
    MOV      BL, 30          ;time-out value is 48 seconds
    INT      15H

;

; ADD THE APPLICATION PROGRAM HERE
;

    CMP      EXIT_AP, 1      ;is the application over?
    JNE      W_LOOP          ;No, restart the application

    MOV      AX, 6F02H      ;disable Watchdog Timer
    MOV      BL, 0           ;
    INT      15H

;

; EXIT ;
```

Appendix

E

Error Beep Code

E.1 PEI Beep Codes

Number of Beeps	Description
1	Memory not Installed
1	Memory was installed twice (InstallPeiMemory routine in PEI Core called twice)
2	Recovery started
3	DXE IPL was not found
3	DXE Core Firmware Volume was not found
4	Recovery failed
4	S3 Resume failed
7	Reset PPI is not available

E.2 DXE Beep Codes

Number of Beeps	Description
1	Invalid password
4	Some of the Architectural Protocols are not available
5	No Console Output Devices are found
5	No Console Input Devices are found
6	Flash update is failed
7	Reset protocol is not available
8	Platform PCI resource requirements cannot be met

**NOTE:**

If you have any question, please contact IEI for further assistance.

Appendix

F

Hazardous Materials Disclosure

F.1 RoHS II Directive (2015/863/EU)

The details provided in this appendix are to ensure that the product is compliant with the RoHS II Directive (2015/863/EU). The table below acknowledges the presences of small quantities of certain substances in the product, and is applicable to RoHS II Directive (2015/863/EU).

Please refer to the following table.

Part Name	Toxic or Hazardous Substances and Elements										
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls	Polybrominated Diphenyl Ethers	Bis(2-ethylhexyl) Phthalate	Butyl benzyl phthalate (BBP)	Dibutyl phthalate (DBP)	Diisobutyl phthalate (DIBP)	
Housing	O	O	O	O	O	O	O	O	O	O	
Printed Circuit Board	O	O	O	O	O	O	O	O	O	O	
Metal Fasteners	O	O	O	O	O	O	O	O	O	O	
Cable Assembly	O	O	O	O	O	O	O	O	O	O	
Fan Assembly	O	O	O	O	O	O	O	O	O	O	
Power Supply Assemblies	O	O	O	O	O	O	O	O	O	O	
Battery	O	O	O	O	O	O	O	O	O	O	
O: This toxic or hazardous substance is contained in all of the homogeneous materials for the part is below the limit requirement in Directive (EU) 2015/863. X: This toxic or hazardous substance is contained in at least one of the homogeneous materials for this part is above the limit requirement in Directive (EU) 2015/863.											

F.2 China RoHS

此附件旨在确保本产品符合中国 RoHS 标准。以下表格标示此产品中某有毒物质的含量符合中国 RoHS 标准规定的限量要求。

本产品上会附有“环境友好使用期限”的标签，此期限是估算这些物质“不会有泄漏或突变”的年限。本产品可能包含有较短的环境友好使用期限的可替换元件，像是电池或灯管，这些元件将会单独标示出来。

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
壳体	O	O	O	O	O	O
印刷电路板	O	O	O	O	O	O
金属螺帽	O	O	O	O	O	O
电缆组装	O	O	O	O	O	O
风扇组装	O	O	O	O	O	O
电力供应组装	O	O	O	O	O	O
电池	O	O	O	O	O	O

O: 表示该有毒有害物质在该部件所有物质材料中的含量均在 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求以下。

X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T11364-2014 與 GB/T26572-2011 标准规定的限量要求。
